

## MAES

### ADA Self-Evaluation

**Each MAES facility should complete this brief ADA self-evaluation on an annual basis and file a copy in the Central Civil Rights File after forwarding a copy to the Director. Please keep Director apprised of deficiencies.**

ADA regulations require that architectural and communication barriers that are structural must be removed in public areas of existing facilities when their removal is readily achievable.

The process of determining what changes are readily achievable is not a one-time effort; access should be re-evaluated annually. Barrier removal that might be difficult to carry out now may be readily achievable later.

The ADA barrier removal requirement (1995) for existing facilities supersedes less stringent local or state codes.

**Instructions: Please check all statements to which you can answer “yes.”**

#### Access Route, Parking, and Entrances

- 1. The access route to the entrance is free of barriers.
- 2. There is a ramp to ensure access for those using walkers, wheelchairs, crutches, etc.
- 3. The ground on the access route is even and the surface is not slippery.
- 4. There are handicapped parking spaces available.
- 5. These spaces are designated with signs.
- 6. All inaccessible entrances have signs indicating the location of the nearest accessible entrance.
- 7. The only accessible entrance is a service entrance.

#### Doors and Elevators

- 8. The door is equipped with (check all that applies):
  - Automatic opener
  - A bell
  - An intercom
