

Digital Learning with iPad in Singapore

Students love iPad because it can be whatever they need it to be. And Apple supports teaching and learning with iPad by providing resources and workshops around planning, implementation and management. Learn more about digital learning with iPad and how we can support your school's success.

Why iPad for Education

No matter the task, iPad is a powerful, portable tool to get it done. Its versatility empowers students to learn and teachers to teach in ways that work best for them. And with up to 10 hours of battery life* and a thin and light design, teaching and learning with iPad can happen anywhere, all day long.

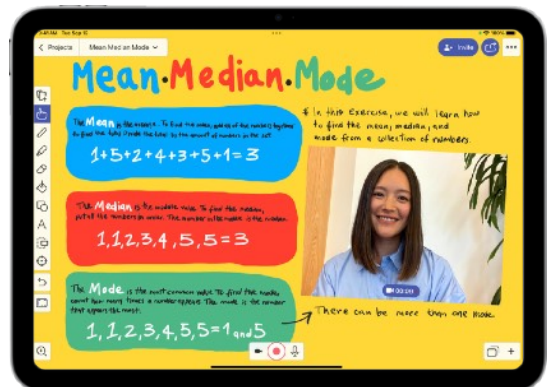

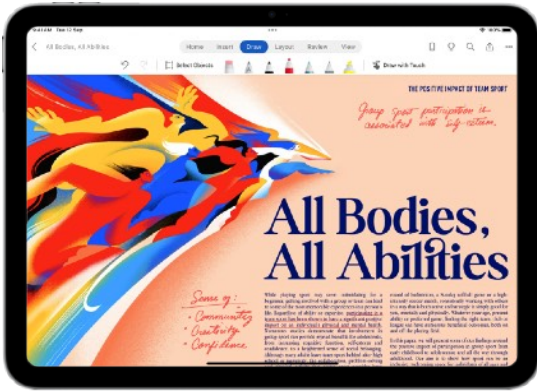

Powerful productivity

The powerful A14 Bionic chip gives students and teachers exceptional performance and responsiveness to create amazing things on iPad. Built-in apps for learning and creating take everyday tasks to the next level, while education apps in the App Store take learning even further.

Unrivalled versatility

iPad empowers students and teachers to learn and teach where, when, and how they want to. With built-in tools for creativity and collaboration, iPad can become anything students and teachers need it to be: a camera, a recording studio, a notebook, a sketchbook and much more.

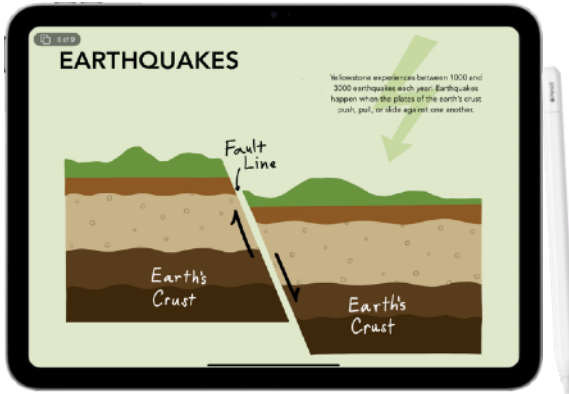

Seamless compatibility

iPad is the perfect device for the apps and workflows students and teachers depend on, including Google Workspace for Education, Microsoft 365, and many of today's common learning management systems. And the Files app on iPad makes it easy to access files from USB drives and cloud services all in one place.

Built to last

iPad is incredibly thin and weighs about a pound, so it's light enough to move wherever learning is happening. It features a durable aluminium unibody construction that's built to handle the rigours of daily student use. And with an enclosure made from 100 percent recycled aluminium, iPad is also better for the environment.

Enhanced creativity

Apple Pencil can be a pen, a paintbrush, a pastel stick and more. And even though it feels familiar, Apple Pencil opens up an entirely new way to use iPad. It's perfect for taking handwritten notes, capturing observations, sketching ideas, marking up documents and anything else students or teachers need to do. This capability supports the Singapore's art syllabus to enable students to express ideas visually.

Perfect companion

With a keyboard case for iPad, students and teachers can use familiar gestures or easily position a cursor to edit their work. They can take advantage of the full-size keyboard and high-precision trackpad with confidence that the sturdy design and construction are built to take on daily wear and tear — both in class and at home.

Compatible with Logitech keyboards and Logitech Crayon

Powerful teaching assistant

With the Classroom app, educators can guide students through lessons, keep them focused on the task at hand and easily share learning resources in both a one-to-one or shared device environment.

More reasons to choose iPad

Streamlined device management

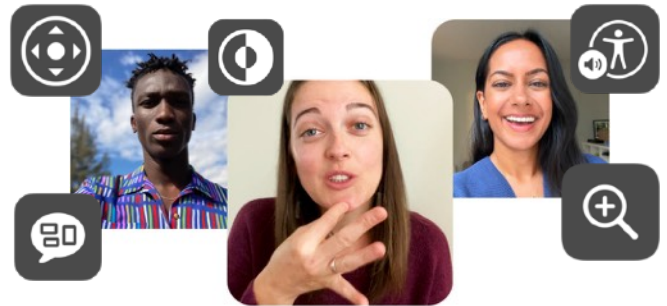

iPad supports a modern deployment and management model with efficient wireless setup. So IT can save time and get staff and students up and running in minutes. Schedule a briefing with Apple for your IT staff to discuss your school's setup and explore best practices for deploying and managing devices in a shared device or Personalised Digital Learning Programme environment.

Accessible for all

Every iPad comes with a range of built-in accessibility features. So all students and teachers can use iPad right out of the box to learn and create in ways that work best for them. Because technology is most powerful when it empowers everyone.

Privacy from the ground up

Every Apple product is designed and built with privacy and security in mind. Innovative privacy technologies and techniques minimise how much user data Apple — or anyone else — can access. And every Apple device combines hardware and software that's designed to work together for maximum security.

Apple supports your school's success

Planning Essentials — iPad for Learning Leadership workshop

Develop essential elements for creating a technology-rich learning environment in this workshop for school leaders. You'll learn how to build an effective plan based on your vision for personalised learning whether in a one-to-one or shared devices environment.

Professional learning for teachers

Apple Professional Learning Specialists help your teachers bring technology into their classes through lesson ideas, student guides and design maps that can be integrated with Singapore Student Learning Space (SLS) to keep students engaged. The Apple Education Community offers hundreds of free, Apple-created resources — from guided tutorials to lesson ideas and hands-on teaching materials. [Learn more >](#)

Test drive iPad in your school.

The iPad Learning Experience is a complimentary three-week in-school pilot program in Singapore that helps you explore how iPad can transform learning. Thereafter, your school will get up to 12 months of continuous support with project management and teacher training if you fully implement a shared device initiative or a Personalised Digital Learning Programme with iPad.
