ZEISS Metrology Expert Tip

**Check the Mechanical Condition of
your Machine Remotely.**

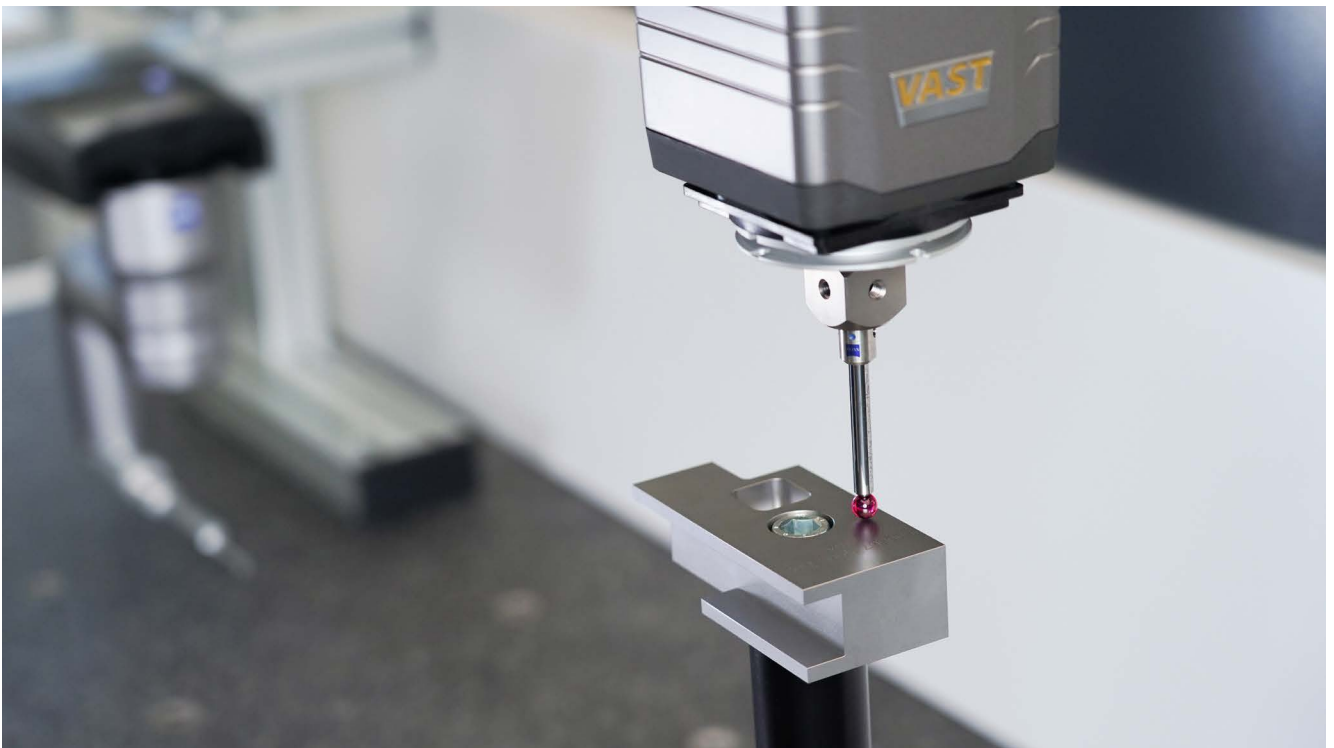

probes.zeiss.com

Regular Checks Lead to Higher Uptime.

Extended usage and collisions can affect the lifetime of your ZEISS Coordinate Measuring Machine. Therefore, regular checks are essential for maintaining high uptime. If you are uncertain about the mechanical condition of your machine, it is crucial to act quickly to prevent unexpected breakdowns and ensure accurate measurements.

Did you know that ZEISS can diagnose the mechanical condition of your machine remotely?

The ZEISS Smart Services Remote Health Check is a proactive service that enables you to diagnose the condition of your ZEISS Coordinate Measuring Machine remotely. This helps to identify any potential issues that may affect your machine and increase its reliability and uptime.

ZEISS Coordinate Measuring Machine with installed ZEISS Smart Services Remote Health Check Kit prepared for health check.

ZEISS Smart Services Remote Health Check

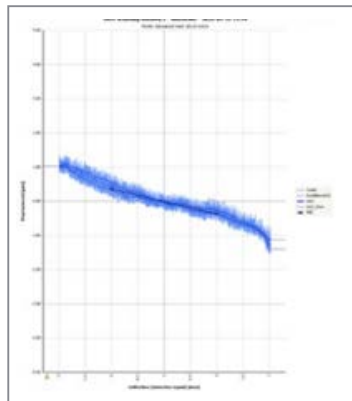

Prearrangement

Before conducting a health check, make sure that you are prepared. You need the **ZEISS Smart Services Remote Health Check Kit**, a stable internet connection, and an appointment with a **ZEISS Service engineer to support you remotely**.

Diagnostic Process

The health check covers specific mechanical and electronic components of your machine. ZEISS **examines** components such as the **probe head, drives, measuring system, balancing cylinder, temperature**, and more.

Comprehensive Reporting

Once the health check is complete, we provide you with a **detailed report along with predictive recommendations** for future service activities. This ensures that you're well-informed about the condition of your machine and can avoid unexpected breakdowns.

It is important to note that the ZEISS Smart Services Remote Health Check is not a replacement for regular maintenance and calibration of your machine. However, it can help you to identify potential issues early on and take corrective actions.

With the **ZEISS Smart Services Remote Health Check Kit**, you are always prepared to perform a health check to assess the mechanical condition of your ZEISS Coordinate Measuring Machine. Additionally, we recommend using the ZEISS Accuracy Check to verify the accuracy of your machine after a collision or routinely between calibrations. By following these expert tips and using the ZEISS Smart Services Remote Health Check and ZEISS Accuracy Check, you can trust your ZEISS measuring machine at all times.
