

Sumo Logic for education

Cost management, information security, observability, and regulatory compliance present unique challenges for educational institutions. In a tight budgetary and compliance environment, institutions need to get the most out of their technology investments while maintaining a strong security and compliance posture.

Sumo Logic provides observability and security in one central place

Sumo Logic's continuous intelligence platform provides observability and in-depth insights across the enterprise, facilitating the capture and use of machine data that is structured or unstructured from any source, whether self-hosted or cloud.

This in-depth observability extends to the full range of systems present in today's educational institutions: student registration and learning management systems, networks, on-premise applications, and cloud apps, among others. Once log data is under management, Sumo Logic's cloud-native SaaS platform supports digital transformation, risk mitigation, security and compliance to cost-effectively provide key insights across systems, networks, and campuses.

With Sumo Logic you can:

- Break down campus silos and use modern log management tools to improve your monitoring and troubleshooting, increase your security posture, and gain key business insights.
- Reduce downtime and solve customer-impacting issues faster with an integrated observability platform for all of your application data including logs, metrics, and traces across the entire development lifecycle.
- Provide security analysts with enhanced visibility to seamlessly monitor their on-premise, hybrid, and multi-cloud infrastructures and thoroughly understand the impact and context of an attack.
- Meet and comply with multiple regulatory requirements and standards that impact educational institutions, including PCI, Sarbanes-Oxley, FERPA, and HIPAA, among others.
- Leverage our cloud-native, elastic scaling solution and cloud licensing model that provides unparalleled ease of use and low total cost of ownership.

About Sumo Logic

Sumo Logic is a leader in continuous intelligence, a new category of software, which enables organizations of all sizes address the data challenges and opportunities presented by digital transformation, modern applications, and cloud computing. The Sumo Logic Continuous Intelligence Platform™ automates the collection, ingestion, and analysis of application, infrastructure, security, and IoT data to derive actionable insights within seconds. More than 2,000 customers around the world rely on Sumo Logic to build, run, and secure their modern applications and cloud infrastructures. Only Sumo Logic delivers its platform as a true, multi-tenant SaaS architecture, across multiple use-cases, enabling businesses to thrive in the Intelligence Economy.

Founded in 2010, Sumo Logic is a privately held company based in Redwood City, California, and is backed by Accel Partners, Battery Ventures, DFJ Growth, Franklin Templeton, Greylock Partners, IVP, Sapphire Ventures, Sequoia Capital, Sutter Hill Ventures, and Tiger Global Management.
