1.5.2. Contact Person	4
1.5.3. Person Determining CPS suitability for the policy	5
1.5.4. CPS approval procedures	5
1.6. Definitions and acronyms	5
1.6.1. Definitions	5
1.6.2. Acronyms	17
1.6.3. References	18
1.6.4. Conventions	20
2. PUBLICATION AND REPOSITORY RESPONSIBILITIES	20
2.1. Repositories	20
2.2. Publication of information	20
2.3. Time or frequency of publication	21
2.4. Access controls on repositories	21
3. IDENTIFICATION AND AUTHENTICATION	21
3.1. Naming	21
3.1.1. Types of names	21
3.1.2. Need for names to be meaningful	21
3.1.3. Anonymity or pseudonymity of subscribers	21
3.1.4. Rules for interpreting various name forms	21
3.1.5. Uniqueness of names	21
3.1.6. Recognition, authentication, and role of trademarks	21
3.2. Initial identity validation	22

3.2.1. Method to Prove Possession of Private Key	22
3.2.2. Authentication of Organization and Domain Identity.....	22
3.2.3. Verification Requirements - Overview	23
3.2.4. Acceptable Methods of Verification - Overview	24
3.2.5. Verification of Applicant's Legal Existence and Identity	24
3.2.6. Verification of Applicant's Legal Existence and Identity - Assumed Name	29
3.2.7. Verification of Applicant's Physical Existence	30
3.2.8. Verified Method of Communication	31
3.2.9. Verification of Applicant's Operational Existence	31
3.2.10. Verification of Identity and Authority of Contract Signer and Certificate Approver....	32
3.2.11. Verification of Signature on Subscriber Agreement and Mark Certificate Requests....	36
3.2.12. Verification of Approval of Mark Certificate Request	37
3.2.13. Verification of Certain Information Sources	37
3.2.14. Validation of Domain Authorization or Control	43
3.2.15. CAA Records for Mark Certificates	49
3.2.16. Mark Verification in Common Mark Certificates	51
3.2.17. Mark Verification in Verified Mark Certificates	53
3.2.18. Other Verification Requirements	55
3.2.19. Final Cross-Correlation and Due Diligence.....	57
3.2.20. Criteria for Interoperation or Certification	57
3.3. Identification and authentication for re-key requests	58
3.3.1. Identification and Authentication for Routine Re-key.....	58
3.3.2. Identification and Authentication for Re-key After Revocation	58
3.4. Identification and authentication for revocation request	58
4. CERTIFICATE LIFE-CYCLE OPERATIONAL REQUIREMENTS	58
4.1. Certificate Application.....	58
4.1.1. Who Can Submit a Certificate Application.....	58
4.1.2. Enrollment Process and Responsibilities	58
4.2. Certificate application processing	59
4.2.1. Performing Identification and Authentication Functions	59
4.2.2. Approval or Rejection of Certificate Applications.....	60
4.2.3. Time to Process Certificate Applications.....	60
4.3. Certificate issuance	60
4.3.1. CA Actions during Certificate Issuance	60
4.3.2. Notification of Certificate Issuance	60
4.4. Certificate acceptance	60
4.4.1. Conduct constituting certificate acceptance.....	60
4.4.2. Publication of the certificate by the CA.....	60
4.4.3. Notification of certificate issuance by the CA to other entities	60
4.5. Key pair and certificate usage	60
4.5.1. Subscriber private key and certificate usage.....	60

4.5.2. Relying party public key and certificate usage	61
4.6. Certificate renewal	61
4.6.1. Circumstance for certificate renewal	61
4.6.2. Who may request renewal	61
4.6.3. Processing certificate renewal requests	61
4.6.4. Notification of new certificate issuance to subscriber	61
4.6.5. Conduct constituting acceptance of a renewal certificate	61
4.6.6. Publication of the renewal certificate by the CA	61
4.6.7. Notification of certificate issuance by the CA to other entities	61
4.7. Certificate re-key	61
4.7.1. Circumstance for certificate re-key	61
4.7.2. Who may request certification of a new public key	61
4.7.3. Processing certificate re-keying requests	61
4.7.4. Notification of new certificate issuance to subscriber	62
4.7.5. Conduct constituting acceptance of a re-keyed certificate	62
4.7.6. Publication of the re-keyed certificate by the CA	62
4.7.7. Notification of certificate issuance by the CA to other entities	62
4.8. Certificate modification	62
4.8.1. Circumstance for certificate modification	62
4.8.2. Who may request certificate modification	62
4.8.3. Processing certificate modification requests	62
4.8.4. Notification of new certificate issuance to subscriber	62
4.8.5. Conduct constituting acceptance of modified certificate	62
4.8.6. Publication of the modified certificate by the CA	62
4.8.7. Notification of certificate issuance by the CA to other entities	63
4.9. Certificate revocation and suspension	63
4.9.1. Circumstances for Revocation	63
4.9.2. Who Can Request Revocation	64
4.9.3. Procedure for Revocation Request	64
4.9.4. Revocation Request Grace Period	65
4.9.5. Time within which CA Must Process the Revocation Request	65
4.9.6. Revocation Checking Requirement for Relying Parties	65
4.9.7. CRL Issuance Frequency	65
4.9.8. Maximum Latency for CRLs	65
4.9.9. On-line Revocation/Status Checking Availability	65
4.9.10. On-line Revocation Checking Requirements	66
4.9.11. Other Forms of Revocation Advertisements Available	66
4.9.12. Special Requirements Related to Key Compromise	66
4.9.13. Circumstances for Suspension	67
4.9.14. Who Can Request Suspension	67
4.9.15. Procedure for Suspension Request	67

4.9.16. Limits on Suspension Period	67
4.10. Certificate status services	67
4.10.1. Operational Characteristics	67
4.10.2. Service Availability	67
4.10.3. Optional Features	67
4.11. End of subscription	67
4.12. Key escrow and recovery	67
4.12.1. Key escrow and recovery policy and practices	67
4.12.2. Session key encapsulation and recovery policy and practices	68
5. MANAGEMENT, OPERATIONAL, and Physical CONTROLS	68
5.1. Physical security Controls	69
5.1.1. Site location and construction	69
5.1.2. Physical access	69
5.1.3. Power and air conditioning	69
5.1.4. Water exposures	69
5.1.5. Fire prevention and protection	69
5.1.6. Media storage	69
5.1.7. Waste disposal	69
5.1.8. Off-site backup	69
5.2. Procedural controls	69
5.2.1. Trusted Roles	69
5.2.2. Number of Individuals Required per Task	70
5.2.3. Identification and Authentication for Trusted Roles	70
5.2.4. Roles Requiring Separation of Duties	70
5.3. Personnel controls	70
5.3.1. Qualifications, Experience, and Clearance Requirements	70
5.3.2. Background Check Procedures	70
5.3.3. Training Requirements and Procedures	70
5.3.4. Retraining Frequency and Requirements	70
5.3.5. Job Rotation Frequency and Sequence	71
5.3.6. Sanctions for Unauthorized Actions	71
5.3.7. Independent Contractor Controls	71
5.3.8. Documentation Supplied to Personnel	71
5.4. Audit logging procedures	71
5.4.1. Types of Events Recorded	71
5.4.2. Frequency for Processing and Archiving Audit Logs	72
5.4.3. Retention Period for Audit Logs	72
5.4.4. Protection of Audit Log	72
5.4.5. Audit Log Backup Procedures	72
5.4.6. Audit Log Accumulation System (internal vs. external)	72
5.4.7. Notification to Event-Causing Subject	73

5.4.8. Vulnerability Assessments	73
5.5. Records archival	73
5.5.1. Types of Records Archived	73
5.5.2. Retention Period for Archive	73
5.5.3. Protection of Archive	73
5.5.4. Archive Backup Procedures	73
5.5.5. Requirements for Time-stamping of Records	73
5.5.6. Archive Collection System (internal or external)	73
5.5.7. Procedures to Obtain and Verify Archive Information	73
5.6. Key changeover	74
5.7. Compromise and disaster recovery	74
5.7.1. Incident and Compromise Handling Procedures	74
5.7.2. Recovery Procedures if Computing Resources, Software, and/or Data Are Corrupted ...	74
5.7.3. Recovery Procedures After Key Compromise	75
5.7.4. Business Continuity Capabilities after a Disaster	75
5.8. CA or RA termination	75
6. TECHNICAL SECURITY CONTROLS	75
6.1. Key pair generation and installation	75
6.1.1. Key Pair Generation	75
6.1.2. Private Key Delivery to Subscriber	76
6.1.3. Public Key Delivery to Certificate Issuer	76
6.1.4. CA Public Key Delivery to Relying Parties	76
6.1.5. Algorithm type and key sizes	76
6.1.6. Public Key Parameters Generation and Quality Checking	77
6.1.7. Key Usage Purposes	77
6.2. Private Key Protection and Cryptographic Module Engineering Controls	77
6.2.1. Cryptographic Module Standards and Controls	77
6.2.2. Private Key (n out of m) Multi-person Control	78
6.2.3. Private Key Escrow	78
6.2.4. Private Key Backup	78
6.2.5. Private Key Archival	78
6.2.6. Private Key Transfer into or from a Cryptographic Module	78
6.2.7. Private Key Storage on Cryptographic Module	78
6.2.8. Activating Private Keys	78
6.2.9. Deactivating Private Keys	78
6.2.10. Destroying Private Keys	78
6.2.11. Cryptographic Module Capabilities	78
6.3. Other aspects of key pair management	79
6.3.1. Public Key Archival	79
6.3.2. Certificate Operational Periods and Key Pair Usage Periods	79
6.4. Activation data	79

6.4.1. Activation data generation and installation	79
6.4.2. Activation data protection	79
6.4.3. Other aspects of activation data	79
6.5. Computer security controls	79
6.5.1. Specific Computer Security Technical Requirements	79
6.5.2. Computer Security Rating	79
6.6. Life cycle technical controls	79
6.6.1. System development controls	79
6.6.2. Security management controls	80
6.6.3. Life cycle security controls	80
6.7. Network security controls	80
6.8. Time-stamping	80
7. CERTIFICATE, CRL, AND OCSP PROFILES	80
7.1. Certificate profile	80
7.1.1. Version Number(s)	80
7.1.2. Certificate Content and Extensions; Application of RFC 5280	80
7.1.3. Algorithm Object Identifiers	84
7.1.4. Name Forms	84
7.1.5. Name Constraints	93
7.1.6. Certificate Policy Object Identifier	93
7.1.7. Usage of Policy Constraints Extension	93
7.1.8. Policy Qualifiers Syntax and Semantics	93
7.1.9. Processing Semantics for the Critical Certificate Policies Extension	93
7.2. CRL profile	93
7.2.1. Version number(s)	93
7.2.2. CRL and CRL entry extensions	93
7.3. OCSP profile	94
7.3.1. Version number(s)	94
7.3.2. OCSP extensions	94
8. COMPLIANCE AUDIT AND OTHER ASSESSMENTS	94
8.1. Frequency or circumstances of assessment	94
8.2. Identity/qualifications of assessor	94
8.3. Assessor's relationship to assessed entity	95
8.4. Topics covered by assessment	95
8.5. Actions taken as a result of deficiency	95
8.6. Communication of results	95
8.7. Self-Audits	95
9. OTHER BUSINESS AND LEGAL MATTERS	95
9.1. Fees	96
9.1.1. Certificate issuance or renewal fees	96
9.1.2. Certificate access fees	96

9.1.3. Revocation or status information access fees	96
9.1.4. Fees for other services	96
9.1.5. Refund policy	96
9.2. Financial responsibility	96
9.2.1. Insurance coverage	96
9.2.2. Other assets	96
9.2.3. Insurance or warranty coverage for end-entities	96
9.3. Confidentiality of business information	96
9.3.1. Scope of confidential information	96
9.3.2. Information not within the scope of confidential information	96
9.3.3. Responsibility to protect confidential information	97
9.4. Privacy of personal information	97
9.4.1. Privacy plan	97
9.4.2. Information treated as private	97
9.4.3. Information not deemed private	97
9.4.4. Responsibility to protect private information	97
9.4.5. Notice and consent to use private information	97
9.4.6. Disclosure pursuant to judicial or administrative process	97
9.4.7. Other information disclosure circumstances	97
9.5. Intellectual property rights	97
9.6. Representations and warranties	97
9.6.1. CA Representations and Warranties	97
9.6.2. RA Representations and Warranties	99
9.6.3. Subscriber Representations and Warranties	99
9.6.4. Relying Party Representations and Warranties	100
9.6.5. Representations and Warranties of Other Participants	100
9.7. Disclaimers of warranties	101
9.8. Limitations of liability	101
9.9. Indemnities	101
9.9.1. Indemnification by CAs	101
9.9.2. Indemnification by Subscribers	101
9.9.3. Indemnification by Relying Parties	101
9.10. Term and termination	101
9.10.1. Term	101
9.10.2. Termination	102
9.10.3. Effect of termination and survival	102
9.11. Individual notices and communications with participants	102
9.12. Amendments	102
9.12.1. Procedure for amendment	102
9.12.2. Notification mechanism and period	102
9.12.3. Circumstances under which OID must be changed	102

9.13. Dispute resolution provisions	102
9.14. Governing law	102
9.15. Compliance with applicable law	102
9.16. Miscellaneous provisions	102
9.16.1. Entire Agreement	102
9.16.2. Assignment	103
9.16.3. Severability	103
9.16.4. Enforcement (attorneys' fees and waiver of rights).	103
9.16.5. Force Majeure	103
9.17. Other provisions	103
Appendix A: DNS Contact Properties	103
A.1. CAA Methods	103
A.1.1. CAA contactemail Property	104
A.1.2. CAA contactphone Property	104
A.2. DNS TXT Methods	104
A.2.1. DNS TXT Record Email Contact	104
A.2.2. DNS TXT Record Phone Contact	105

H.2.1. Japan	116
Appendix I: Abstract Syntax Notation One module for EV certificates	118
Appendix J: Registration Schemes	119

1. INTRODUCTION

1.1. Overview

This document describes an integrated set of technologies, protocols, and identity and mark proofing requirements that are necessary for the issuance and management of Mark Certificates (MCs) - certificates that are trusted by Consuming Entities. Upon adoption, they are mandatory for Certification Authorities who issue or plan to issue Mark Certificates.

MCs assert a cryptographically verifiable and auditable binding between an identity, a logo, and a domain. The key pair of an end entity MC is unused, and there are no requirements around the generation, storage, and protection of such key pairs. In particular, Certification Authorities MAY generate such key pairs on behalf of their customers, and MCs need not be revoked if the unused key pair is compromised.

MCs present Consuming Entities and Relying Parties with information about and marks asserted by the Mark Asserting Entity, some of which is gathered from legal documents and government registries (including trademark registries). When Mark Verifying Authorities verify marks presented by a Mark Asserting Entity for inclusion in a MC, or when Mark Verifying Authorities present MCs and the information or marks they contain to Consuming Entities, or when Consuming Entities present MCs and the information or marks they contain to Relying Parties, they are not providing legal advice to any party.

In adopting these Mark Certificate Requirements (MCR), the AuthIndicators Working Group is not providing legal advice to any party. All parties (Mark Asserting Entities, Mark Verifying Authorities, Consuming Entities and Relying Parties) are advised to consult their own legal counsel on all matters.

Mark Verifying Authorities have no legal obligation to issue MCs to any Mark Asserting Entity. Consuming Entities have no legal obligation to use or display MCs or the information or marks they contain to any Relying Party, and may choose at their sole discretion not to use or display MCs (or groups or categories of MCs) or the information or marks they contain to Relying Parties or to any subset of Relying Parties they may choose.

Mark Certificates may be issued with respect to marks accredited by legislation (such as Registered Marks that are in good standing with a Trademark Office) or other types of Marks described herein, and which are claimed, owned by, or licensed to the Applicant. CAs may issue Mark Certificates provided that the CA satisfies the requirements in this document.

All Subscribers/Mark Asserting Entities, Consuming Entities, and Relying Parties are bound by the MC Terms attached as [Appendix D](#) according to their terms. CAs who issue Mark Certificates SHALL include the MC Terms in their applicable Certification Practice Statement.

The four types of Mark Certificates included in these MC Requirements are as follows:

Mark Certificates

1. Common Mark Certificates

- a. Prior Use Mark Certificates
 - b. Modified Registered Trademark Certificates
2. Verified Mark Certificates
- a. Registered Mark Certificates
 - b. Government Mark Certificates

Relevant sections of these MCRs have been synchronized with the following versions of the CA/Browser Forum standards:

- Baseline Requirements for the Issuance and Management of Publicly-Trusted Certificates v1.7.0
- Guidelines For The Issuance And Management Of Extended Validation Certificates v1.7.2

This document may be synchronized from time to time with future versions of the CA/Browser Forum documents at the sole discretion of the AuthIndicators Working Group. However, this document is independent of any actions of the CA/Browser Forum or of its documents.

1.2. Document name and Identification

This document SHALL be known as the Mark Certificate Requirements (or “MC Requirements” or simply “MCR”). These MC Requirements SHALL take effect upon public adoption by one or more Certification Authorities (CAs) that offer Mark Certificates to Subscribers and by one or more Consuming Entities that recognize and utilize the Mark Certificates.

1.2.1. Revisions

Version	Adopted	Effective
0.97	12-19-2019	12-19-2019
0.984	06-24-2019	06-24-2019
0.985	05-26-2020	05-26-2020
0.986	02-05-2021	02-05-2021
1.0	07-09-2021	07-09-2021
1.1	09-10-2021	09-10-2021
1.2	11-28-2021	11-28-2021
1.3	01-31-2022	01-31-2022
1.4	03-31-2022	03-31-2022
1.5	07-15-2023	07-15-2023
1.6	03-07-2024	03-07-2024

1.2.2. Mark Certificate OIDs

Certificates adhering to these MC Requirements SHALL be identified by the presence of the MC policy OID in the Certificate Policies Extension as described in [Section 7.1.6](#).

1.3. PKI Participants

The AuthIndicators Working Group is a voluntary organization that maintains these MC Requirements. These will be published at www.bimigroup.org.

1.3.1. Certification Authorities

Certification Authority (CA), also known as Mark Verifying Authority, is defined in [Section 1.6.1](#).

1.3.2. Registration Authorities

With the exception of [Section 3.2.14](#), the CA MAY delegate the performance of all, or any part, of [Section 3.2](#) requirements to a Delegated Third Party, provided that the process as a whole fulfills all of the requirements of [Section 3.2](#).

Before the CA authorizes a Delegated Third Party to perform a delegated function, the CA SHALL contractually require the Delegated Third Party to:

1. Meet the qualification requirements of [Section 5.3.1](#), when applicable to the delegated function;
2. Retain documentation in accordance with [Section 5.5.2](#);
3. Abide by the other provisions of these Requirements that are applicable to the delegated function; and
4. Comply with:
 - a. the CA's Certificate Policy/Certification Practice Statement; or
 - b. the Delegated Third Party's practice statement that the CA has verified complies with these Requirements.

The CA MAY designate an Enterprise RA to verify certificate requests from the Enterprise RA's own organization.

The CA SHALL NOT accept certificate requests authorized by an Enterprise RA unless the following requirements are satisfied:

1. The CA SHALL confirm that the requested Fully-Qualified Domain Name(s) are within the Enterprise RA's verified Domain Namespace.
2. If the certificate request includes a Subject name of a type other than a Fully-Qualified Domain Name, the CA SHALL confirm that the name is either that of the delegated enterprise, or an Affiliate of the delegated enterprise, or that the delegated enterprise is an agent of the named Subject. For example, the CA SHALL NOT issue a Certificate containing the Subject name "XYZ Co." on the authority of Enterprise RA "ABC Co.", unless the two companies are affiliated (see [Section 3.2](#)) or "ABC Co." is the agent of "XYZ Co.". This requirement applies regardless of whether the accompanying requested Subject FQDN falls within the Domain Namespace of ABC Co.'s Registered Domain Name.

The CA SHALL impose these limitations as a contractual requirement on the Enterprise RA and monitor compliance by the Enterprise RA.

1.3.3. Subscribers

Subscribers may also be known as Mark Asserting Entities. Both are as defined in [Section 1.6.1](#).

1.3.4. Relying Parties

“Relying Party” and “Application Software Supplier” and “Consuming Entities” are defined in [Section 1.6.1](#).

1.3.5. Other Participants

Other groups that have participated in the development of these Requirements include the CPA Canada WebTrust for Certification Authorities task force. Participation by CPA Canada does not imply its endorsement, recommendation, or approval of the final product.

1.4. Certificate Usage

1.4.1. Appropriate Certificate Uses

The primary goal of these Requirements is to enable efficient and secure electronic communication, while addressing user concerns about the trustworthiness of Certificates. These Requirements also serve to inform users and help them to make informed decisions when relying on Certificates.

1.4.2. Prohibited Certificate Uses

No Stipulation.

1.5. Policy administration

The Mark Certificate Requirements present criteria established by the AuthIndicators Working Group for use by Certification Authorities when issuing, maintaining, and revoking Mark Certificates. This document may be revised from time to time, as appropriate, in accordance with procedures adopted by the AuthIndicators Working Group. Because one of the primary beneficiaries of this document is the end user, the AuthIndicators Working Group openly invites anyone to make recommendations and suggestions by email to <https://bimigroup.org/contact-us/>. AuthIndicators Working Group members value all input, regardless of source, and will seriously consider all such input.

1.5.1. Organization Administering the Document

AuthIndicators Working Group <https://bimigroup.org/>.

1.5.2. Contact Person

Contact information for AuthIndicators Working Group is available here: <https://bimigroup.org/contact-us/>

In this section of a CA's Certification Practice Statement (CPS), the CA SHALL provide a link to a web

page or an email address for contacting the person or persons responsible for operation of the CA.

1.5.3. Person Determining CPS suitability for the policy

No stipulation.

1.5.4. CPS approval procedures

No stipulation.

1.6. Definitions and acronyms

1.6.1. Definitions

Accounting Practitioner: A certified public accountant, chartered accountant, or a person with an equivalent license within the country of the Applicant's Jurisdiction of Incorporation or Registration or any jurisdiction where the Applicant maintains an office or physical facility; provided that an accounting standards body in the jurisdiction maintains full (not "suspended" or "associate") membership status with the International Federation of Accountants.

Affiliate: A corporation, partnership, joint venture or other entity controlling, controlled by, or under common control with another entity, or an agency, department, political subdivision, or any entity operating under the direct control of a Government Entity.

Applicant: A person, entity, or organization applying for a Mark Certificate, but which has not yet been issued a Mark Certificate, or a person, entity, or organization that currently has a Mark Certificate or Certificates and that is applying for renewal of such Mark Certificate or Certificates or for an additional Mark Certificate or Certificates.

***Applicant Representative:** A natural person or human sponsor who is either the Applicant, employed by the Applicant, or an authorized agent who has express authority to represent the Applicant: (i) who signs and submits, or approves a certificate request on behalf of the Applicant, and/or (ii) who signs and submits a Subscriber Agreement on behalf of the Applicant, and/or (iii) who acknowledges the Terms of Use on behalf of the Applicant when the Applicant is an Affiliate of the CA or is the CA.

Application Software Supplier: A supplier of relying-party application software that displays or uses Mark Certificates and incorporates Root Certificates.

Archive Webpage Sources: Online public sources that are reliable and that show screen captures of webpages and the date(s) on which the screen captures were made. See Section 3.2.16.2.3.2 for the list of sources allowed by these Requirements.

Attestation Letter: A letter attesting that Subject Information is correct written by an accountant, lawyer, government official, or other reliable third party customarily relied upon for such information.

Audit Period: In a period-of-time audit, the period between the first day (start) and the last day of operations (end) covered by the auditors in their engagement. (This is not the same as the period of

time when the auditors are on-site at the CA.) The coverage rules and maximum length of audit periods are defined in [Section 8.1](#).

Audit Report: A report from a Qualified Practitioner stating the Qualified Practitioner's opinion on whether an entity's processes and controls comply with the mandatory provisions of these Requirements.

Authorization Domain Name: The Domain Name used to obtain authorization for certificate issuance for a given FQDN. The CA may use the FQDN returned from a DNS CNAME lookup as the FQDN for the purposes of domain validation. The CA may prune zero or more labels from left to right until encountering a Base Domain Name and may use any one of the intermediate values for the purpose of domain validation.

Authorized Ports: One of the following ports: 80 (http), 443 (https), 25 (smtp), 22 (ssh).

Base Domain Name: The portion of an applied-for FQDN that is the first domain name node left of a registry-controlled or public suffix plus the registry-controlled or public suffix (e.g. "example.co.uk" or "example.com"). For FQDNs where the right-most domain name node is a gTLD having ICANN Specification 13 in its registry agreement, the gTLD itself may be used as the Base Domain Name.

Business Entity: Any entity that is not a Private Organization, Government Entity, or Non-Commercial Entity as defined herein. Examples include, but are not limited to, general partnerships, unincorporated associations, sole proprietorships, etc.

CA: The Certification Authority that issues a Mark Certificate. Also known as a Mark Verifying Authority.

CAA: From RFC 8659 (<https://tools.ietf.org/html/rfc8659>): "The Certification Authority Authorization (CAA) DNS Resource Record allows a DNS domain name holder to specify one or more Certification Authorities (CAs) authorized to issue certificates for that domain name. CAA Resource Records allow a public CA to implement additional controls to reduce the risk of unintended certificate mis-issue."

Certificate: A Mark Certificate.

Certificate Approver: A natural person who is either the Applicant, employed by the Applicant, or an authorized agent who has express authority to represent the Applicant to (i) act as a Certificate Requester and to authorize other employees or third parties to act as a Certificate Requester, and (ii) to approve MC Requests submitted by other Certificate Requesters. The Certificate Approver may also serve as the Designated Individual during the F2F Verification Procedure.

Certificate Data: Certificate requests and data related thereto (whether obtained from the Applicant or otherwise) in the CA's possession or control or to which the CA has access.

Certificate Management Process: Processes, practices, and procedures associated with the use of keys, software, and hardware, by which the CA verifies Certificate Data, issues Certificates, maintains a Repository, and revokes Certificates.

Certificate Policy: A set of rules that indicates the applicability of a named Certificate to a

particular community and/or PKI implementation with common security requirements.

Certificate Problem Report: Complaint of Certificate misissuance, Certificate misuse, or other types of fraud, compromise, misuse, or inappropriate conduct related to Certificates.

Certificate Profile: A set of documents or files that defines requirements for Certificate content and Certificate extensions in accordance with [Section 7](#) of these Requirements, e.g., a Section in a CA's CPS or a certificate template file used by CA software.

Certificate Requester: A natural person who is either the Applicant, employed by the Applicant, an authorized agent who has express authority to represent the Applicant, or a third party (such as an ISP or hosting company) that completes and submits a MC Certificate Request on behalf of the Applicant.

Certificate Revocation List: A regularly updated time-stamped list of revoked Certificates that is created and digitally signed by the CA that issued the Certificates.

Certification Authority: An organization that is responsible for the creation, issuance, revocation, and management of Certificates, also known as a Mark Verifying Authority. The term applies equally to both Roots CAs and Subordinate CAs.

Certification Practice Statement: One of several documents forming the governance framework in which Certificates are created, issued, managed, and used.

Combined Mark: A mark consisting of a graphic design, stylized logo, or image, with words and/or letters having a particular stylized appearance. For greater certainty, a "Combined Mark" includes marks made up of both word and design elements. See [Appendix B](#) for mapping of the names used by different trademarks offices to the definition of Combined Mark.

Common Mark: A mark or logo used by an Applicant/Subscriber which the Applicant/Subscriber asserts a right to use under common law (or equivalent in civil law countries). The Common Mark may or may not also be a Registered Mark.

Common Mark Certificate: : A Mark Certificate that contains a Mark Representation that has not been verified as a Registered Mark or Government Mark.

Confirmation Request: An appropriate out-of-band communication requesting verification or confirmation of the particular fact at issue.

Confirming Person: A position within an Applicant's organization that confirms the particular fact at issue.

Conflicting Trademark Owner: The owner or licensee of a registered trademark who asserts that the Mark Representation in a Mark Certificate is being used in a way that infringes upon the owner's or licensee's registered trademark.

Consuming Entity ("CE"): An entity that incorporates and uses the Mark Representation and related data contained in a Mark Certificate in its products and services in accordance with the MC Terms. Consuming Entities include mailbox providers.

Contract Signer: A natural person who is either the Applicant, employed by the Applicant, or an

authorized agent who has express authority to represent the Applicant, and who has authority on behalf of the Applicant to sign Subscriber Agreements. The Contract Signer may also serve as the Designated Individual during the F2F Verification Procedure.

Control: “Control” (and its correlative meanings, “controlled by” and “under common control with”) means

possession, directly or indirectly, of the power to: (1) direct the management, personnel, finances, or plans of such entity; (2) control the election of a majority of the directors; or (3) vote that portion of voting shares required for “control” under the law of the entity’s Jurisdiction of Incorporation or Registration but in no case less than 10%.

Country: Either a member of the United Nations OR a geographic region recognized as a Sovereign State by at least two UN member nations.

Court Order of Infringement: A final order from a court of competent jurisdiction or trademark office tribunal (or equivalent) stating that the Mark Representation contained in a Mark Certificate improperly infringes the registered trademark of a Conflicting Trademark Owner (with details sufficient to identify the trademark and the owner).

CRL: Certificate Revocation List as defined in RFC5280. A CRL is a list identifying which certificates are revoked meaning invalid, published periodically by CAs.

Cross Certificate: A certificate that is used to establish a trust relationship between two Root CAs.

CSPRNG: A random number generator intended for use in cryptographic system.

Delegated Third Party: A natural person or Legal Entity that is not the CA, and whose activities are not within the scope of the appropriate CA audits, but is authorized by the CA to assist in the Certificate Management Process by performing or fulfilling one or more of the CA requirements found herein.

Demand Deposit Account: A deposit account held at a bank or other financial institution, the funds deposited in which are payable on demand. The primary purpose of demand accounts is to facilitate cashless payments by means of check, bank draft, direct debit, electronic funds transfer, etc. Usage varies among countries, but a demand deposit account is commonly known as a share draft account, a current account, or a checking account.

Design Mark: A mark consisting of a graphic design, stylized logo, or image, without words and/or letters. For greater certainty, a “Design Mark” includes marks made up solely of design elements. For Registered Marks, see [Appendix B](#) for mapping of the names used by different trademarks offices to the definition of Design Mark.

Designated Individual: The person who completes any of the verification procedures described in [Appendix G](#).

DNS CAA Email Contact: The email address defined in [Section A.1.1](#).

DNS CAA Phone Contact: The phone number defined in [Section A.1.2](#).

DNS TXT Record Email Contact: The email address defined in [Section A.2.1](#).

DNS TXT Record Phone Contact: The phone number defined in [Section A.2.2](#).

Domain Authorization Document: Documentation provided by, or a CA's documentation of a communication with, a Domain Name Registrar, the Domain Name Registrant, or the person or entity listed in WHOIS as the Domain Name Registrant (including any private, anonymous, or proxy registration service) attesting to the authority of an Applicant to request a Certificate for a specific Domain Namespace.

Domain Contact: The Domain Name Registrant, technical contact, or administrative contact (or the equivalent under a ccTLD) as listed in the WHOIS record of the Base Domain Name or in a DNS SOA record, or as obtained through direct contact with the Domain Name Registrar.

Domain Name: The label assigned to a node in the Domain Name System.

Domain Namespace: The set of all possible Domain Names that are subordinate to a single node in the Domain Name System.

Domain Name Registrant: Sometimes referred to as the “owner” of a Domain Name, but more properly the person(s) or entity(ies) registered with a Domain Name Registrar as having the right to control how a Domain Name is used, such as the natural person or Legal Entity that is listed as the “Registrant” by WHOIS or the Domain Name Registrar.

Domain Name Registrar: A person or entity that registers Domain Names under the auspices of or by agreement with: (i) the Internet Corporation for Assigned Names and Numbers (ICANN), (ii) a national Domain Name authority/registry, or (iii) a Network Information Center (including their affiliates, contractors, delegates, successors, or assignees).

Expiry Date: The “Not After” date in a Certificate that defines the end of a Certificate's validity period.

F2F Verification Procedure: Any of the F2F verification procedures permitted under [Appendix G](#), as chosen by the CA.

Fully-Qualified Domain Name: A Domain Name that includes the labels of all superior nodes in the Internet Domain Name System.

Global Legal Entity Identifier Foundation (GLEIF): The organization established by the Financial Stability Board to support the implementation and use of the Legal Entity Identifier (LEI). See <https://www.gleif.org>.

Global Legal Entity Identifier Index: The GLEIF public index of LEI records for those legal entities identifiable with an LEI.

Government Agency: In the context of a Private Organization, the government agency in the Jurisdiction of Incorporation under whose authority the legal existence of Private Organizations is established (e.g., the government agency that issued the Certificate of Incorporation). In the context of Business Entities, the government agency in the jurisdiction of operation that registers business entities. In the case of a Government Entity, the entity that enacts law, regulations, or decrees establishing the legal existence of Government Entities.

Government Entity: A government-operated legal entity, agency, department, ministry, branch, or

similar element of the government of a country, or political subdivision within such country (such as a state, province, city, county, etc.).

Government Mark: A Mark or equivalent granted to or claimed by a government organization (or granted to a private organization or other organization) through official statute, regulation, treaty, or government action as it appears or is described in the statute, regulation, treaty, or government action and confirmed by a Mark Verifying Authority using the procedures prescribed in [Section 3.2.17.2](#). A Mark that has been registered by a Government Entity as a trademark with a Trademark Office is not considered a “Government Mark”.

Government Mark Certificate: One type of Verified Mark Certificate.

Incorporating Agency: In the context of a Private Organization, the government agency in the Jurisdiction of Incorporation under whose authority the legal existence of the entity is registered (e.g., the government agency that issues certificates of formation or incorporation). In the context of a Government Entity, the entity that enacts law, regulations, or decrees establishing the legal existence of Government Entities.

Independent Confirmation From Applicant: Confirmation of a particular fact received by the CA pursuant to the provisions of the Requirements or binding upon the Applicant.

Internal Name: A string of characters (not an IP address) in a Common Name or Subject Alternative Name field of a Certificate that cannot be verified as globally unique within the public DNS at the time of certificate issuance because it does not end with a Top Level Domain registered in IANA’s Root Zone Database.

International Organization: An organization founded by a constituent document, e.g., a charter, treaty, convention or similar document, signed by, or on behalf of, a minimum of two Sovereign State governments.

Issuing CA: In relation to a particular Certificate, the CA that issued the Certificate. This could be either a Root CA or a Subordinate CA.

Jurisdiction of Incorporation: In the context of a Private Organization, the country and (where applicable) the state or province or locality where the organization’s legal existence was established by a filing with (or an act of) an appropriate government agency or entity (e.g., where it was incorporated). In the context of a Government Entity, the country and (where applicable) the state or province where the Entity’s legal existence was created by law.

Jurisdiction of Registration: In the case of a Business Entity, the state, province, or locality where the organization has registered its business presence by means of filings by a Principal Individual involved in the business.

Key Generation Script: A documented plan of procedures for the generation of a CA Key Pair

Key Pair: The Private Key and its associated Public Key.

Latin Notary: A person with legal training whose commission under applicable law not only includes authority to authenticate the execution of a signature on a document but also responsibility for the correctness and content of the document. A Latin Notary is sometimes

referred to as a Civil Law Notary.

Legal Entity: A Private Organization, Government Entity, Business Entity, or Non-Commercial Entity.

Legal Existence: A Private Organization, Government Entity, or Business Entity has Legal Existence if it has been validly formed and not otherwise terminated, dissolved, or abandoned.

Legal Practitioner: A person who is either a lawyer or a Latin Notary as described in these Requirements and competent to render an opinion on factual claims of the Applicant.

Legal Entity Identifier (“LEI”): LEI is specified in the ISO 17442 and names legal entities in the Global Legal Entity Identifier Index.

Mark: A Combined Mark, Design Mark, or Word Mark. Such Marks may either be (1) registered with a Trademark Office (Registered Mark) or created through government action (Government Mark); or (2) a mark or logo which qualifies to be included in a Mark Certificate.

Mark Asserting Entity (“MAE”): An Applicant for/Subscriber of a Mark Certificate. May be the same as the Applicant and/or Subscriber.

Mark Certificate: A certificate that contains subject information and extensions specified in these MC Requirements and that has been verified and issued by a MVA in accordance with these MC Requirements but whose Mark is not a Registered Mark or a Government Mark.

Mark Representation: A digital representation of a Combined Mark, Design Mark, or Word Mark such as a digital or computer file, containing structured binary or textual data which can be interpreted to recreate (render) a visual representation of the mark so that it can be seen. The Mark Representation will be used as the Logotype Extension under [Section 7.1.2.3](#).

Mark Verifying Authority (“MVA”): The authority who issues a Mark Certificate. Also referred to as a Certification Authority or CA.

Maximum Validity Period: 1. The maximum time period for which the issued MC is valid. 2. The maximum period after validation by the CA that certain Applicant information may be relied upon in issuing a MC pursuant to these Requirements.

MC Authority: A source other than the Certificate Approver, through which verification occurs that the Certificate Approver is expressly authorized by the Applicant, as of the date of the MC Certificate Request, to take the Request actions described in these Requirements.

MC Certificate Request: A request from an Applicant to the CA requesting that the CA issue an MC Certificate to the Applicant, which request is validly authorized by the Applicant and signed by the Certificate Approver.

MC Mark: The Mark Representation and Word Mark, if any, contained in a MAE’s Mark Certificate application.

MCR: These MC Requirements.

MC Marks: Any Mark permitted in a Mark Certificate by the Mark Certificate Requirements.

MC Terms: The terms of use that apply to an MC Certificate and to the Mark Representation and related data contained in a Mark Certificate, as set out in [Appendix D](#) to these MC Requirements.

Modified Registered Trademark Certificate: One type of Common Mark Certificate.

Notary: A notary (or legal equivalent in the applicable jurisdiction), Latin Notary, lawyer, solicitor, or other person or organization in the jurisdiction where the Contract Signer or Certificate Approver (also known as the “Designated Individual”) will be verified whose commission under applicable law includes authority to authenticate the execution of a signature on a document. “Notarize” includes Remote Notarization.

Notarize: The process by which the Notary verifies the identity of the Contract Signer or Certificate Approver by means of a government-issued photo ID, observes the Contract Signer or Certificate Approver sign a Verification Document prepared by the CA, and signs and affixes the Notary’s notarization seal or other equivalent method to the Verification Document to indicate the Notarization process has been completed by the Notary.

Object Identifier: A unique alphanumeric or numeric identifier registered under the International Organization for Standardization’s applicable standard for a specific object or object class.

OCSP Responder: An online server operated under the authority of the CA and connected to its Repository for processing Certificate status requests. See also, Online Certificate Status Protocol.

Online Certificate Status Protocol: An online Certificate-checking protocol as defined in RFC6960 that enables Relying Parties and relying-party application software to determine the status of an identified Certificate. See also OCSP Responder.

Parent Company: A company that Controls a Subsidiary Company.

Private Key: The key of a Key Pair that corresponds to the Public Key used by the Subscriber to sign a MC certificate request. Once the Private Key-Public Key pair has been generated, the Private Key is not used and may be discarded.

Place of Business: The location of any facility (such as a factory, retail store, warehouse, etc) where the Applicant’s business is conducted.

Principal Individual: An individual of a Private Organization, Government Entity, or Business Entity that is either an owner, partner, managing member, director, or officer, as identified by their title of employment, or an employee, contractor or agent authorized by such entity or organization to conduct business related to the request, issuance, and use of Mark Certificates.

Prior Use Mark Certificate: One type of Common Mark Certificate.

Private Organization: A non-governmental legal entity (whether ownership interests are privately held or publicly traded) whose existence was created by a filing with (or an act of) the Incorporating Agency or equivalent in its Jurisdiction of Incorporation.

Public Key: The key of a Key Pair that may be publicly disclosed by the holder of the corresponding Private Key and that is used to generate MC signing requests for the CA on behalf of the Subscriber.

Public Key Infrastructure: A set of hardware, software, people, procedures, rules, policies, and

obligations used to facilitate the trustworthy creation, issuance, management, and use of Certificates and keys based on Public Key Cryptography.

Publicly-Trusted Certificate: A Certificate that is trusted by virtue of the fact that its corresponding Root Certificate is distributed as a trust anchor in widely-available application software.

Qualified Practitioner: A natural person or Legal Entity that meets the requirements of [Section 8.2](#).

Qualified Government Information Source: A database maintained by a Government Entity (e.g. SEC filings) that meets the requirements of [Section 3.2.13.6](#).

Qualified Government Tax Information Source: A Qualified Governmental Information Source that specifically contains tax information relating to Private Organizations, Business Entities, or Individuals.

Qualified Independent Information Source: A regularly-updated and current, publicly available, database designed for the purpose of accurately providing the information for which it is consulted, and which is generally recognized as a dependable source of such information.

Random Value: A value specified by a CA to the Applicant that exhibits at least 112 bits of entropy.

Registered Domain Name: A Domain Name that has been registered with a Domain Name Registrar. A Registered Domain Name may also be called an Organizational Domain.

Registered Agent: An individual or entity that is: (i) authorized by the Applicant to receive service of process and business communications on behalf of the Applicant; and (ii) listed in the official records of the Applicant's Jurisdiction of Incorporation as acting in the role specified in (i) above.

Registered Office: The official address of a company, as recorded with the Incorporating Agency, to which official documents are sent and at which legal notices are received.

Registered Mark Certificate: One type of Verified Mark Certificate.

Registration Authority (RA): Any Legal Entity that is responsible for identification and authentication of subjects of Certificates, but is not a CA, and hence does not sign or issue Certificates. An RA may assist in the certificate application process or revocation process or both. When "RA" is used as an adjective to describe a role or function, it does not necessarily imply a separate body, but can be part of the CA as stipulated in [Section 1.3.2](#).

Registration Agency: A Governmental Agency that registers business information in connection with an entity's business formation or authorization to conduct business under a license, charter or other certification. A Registration Agency MAY include, but is not limited to (i) a State Department of Corporations or a Secretary of State; (ii) a licensing agency, such as a State Department of Insurance; or (iii) a chartering agency, such as a state office or department of financial regulation, banking or finance, or a federal agency such as the Office of the Comptroller of the Currency or Office of Thrift Supervision.

Registration Number: The unique number assigned to a Private Organization by the Incorporating Agency in such entity's Jurisdiction of Incorporation

Registration Reference: A unique identifier assigned to a Legal Entity.

Regulated Financial Institution: A financial institution that is regulated, supervised, and examined by governmental, national, state or provincial, or local authorities.

Relying Party: Any natural or legal person that relies on a MC or the information or Marks contained in a MC or displayed to the person by a Consuming Entity. An Application Software Supplier is not considered a Relying Party when software distributed by such Supplier merely displays information relating to a Certificate.

Remote Notarization: The process by which a Notary Notarizes a document over a live video/audio link while the Notary and the Contract Signer or Certificate Approver are physically in different locations.

Repository: An online database containing publicly-disclosed MC governance documents (such as Certification Practice Statements) and Certificate status information, either in the form of a CRL or an OCSP response.

Request Token: A value, derived in a method specified by the CA which binds this demonstration of control to the certificate request. The CA SHOULD define within its CPS (or a document clearly referenced by the CPS) the format and method of Request Tokens it accepts.

The Request Token SHALL incorporate the key used in the certificate request.

A Request Token MAY include a timestamp to indicate when it was created.

A Request Token MAY include other information to ensure its uniqueness.

A Request Token that includes a timestamp SHALL remain valid for no more than 30 days from the time of creation.

A Request Token that includes a timestamp SHALL be treated as invalid if its timestamp is in the future.

A Request Token that does not include a timestamp is valid for a single use and the CA SHALL NOT re-use it for a subsequent validation.

The binding SHALL use a digital signature algorithm or a cryptographic hash algorithm at least as strong as that to be used in signing the certificate request.

NOTE | Examples of Request Tokens include, but are not limited to:

(i) a hash of the public key; or

(ii) a hash of the Subject Public Key Info [X.509]; or

(iii) a hash of a PKCS#10 CSR.

A Request Token may also be concatenated with a timestamp or other data. If a CA wanted to always use a hash of a PKCS#10 CSR as a Request Token and did not want to incorporate a timestamp and did want to allow certificate key re-use then the applicant might use the challenge

password in the creation of a CSR with OpenSSL to ensure uniqueness even if the subject and key are identical between subsequent requests.

Note: This simplistic shell command produces a Request Token which has a timestamp and a hash of a CSR.

```
echo date -u +%Y%m%d%H%M sha256sum <r2.csr \ | sed "s/[ -]//g"
```

The script outputs:

```
201602251811c9c863405fe7675a3988b97664ea6baf442019e4e52fa335f406f7c5f26cf14f
```

Required Website Content: Either a Random Value or a Request Token, together with additional information that uniquely identifies the Subscriber, as specified by the CA.

Requirements: The MC Requirements found in this document.

Root CA: The top level Certification Authority whose Root Certificate is distributed by Application Software Suppliers and that issues Subordinate CA Certificates.

Root Certificate: The self-signed Certificate issued by the Root CA to identify itself and to facilitate verification of Certificates issued to its Subordinate CAs.

Sovereign State: A state or country that administers its own government, and is not dependent upon, or subject to, another power.

Subscriber: A person, entity, or organization that has applied for and has been issued a Verified Mark Certificate.

Subject: The natural person, device, system, unit, or Legal Entity identified in a Certificate as the Subject. The Subject is the Subscriber.

Subject Identity Information: Information that identifies the Certificate Subject. Subject Identity Information does not include a domain name listed in the subjectAltName extension or the Subject commonName field.

Subordinate CA: A Certification Authority whose Certificate is signed by the Root CA, or another Subordinate CA.

Subscriber: A natural person or Legal Entity to whom a Certificate is issued and who is legally bound by a Subscriber Agreement or Terms of Use.

Subscriber Agreement: An agreement between the CA and the Applicant/Subscriber that specifies the rights and responsibilities of the parties.

Subsidiary Company: A company that is controlled by a Parent Company.

Superior Government Entity: Based on the structure of government in a political subdivision, the Government Entity or Entities that have the ability to manage, direct and control the activities of the Applicant.

SVG Guidelines: The draft-svg-tiny-ps-abrotman-01 version of the SVG Tiny Portable/Secure (SVG

Tiny PS) Guidelines document located at this URL: https://bimigroup.org/resources/RFC_SVG_PS.txt as well as a RNC validator located at this URL: http://bimigroup.org/resources/SVG_PS-latest.rnc.txt.

Both are published by the AuthIndicators Working Group.

Terms of Use: Provisions regarding the safekeeping and acceptable uses of a Certificate issued in accordance with these Requirements when the Applicant/Subscriber is an Affiliate of the CA or is the CA.

Third-Party Validator: A person or organization who performs the F2F Verification Procedure of the Contract Signer or Certificate Approver using the Notarization process under [Section G.1](#).

Trademark Office: An intellectual property office recognized by the World Intellectual Property Organization for registration of trademarks (see names of intellectual property offices as listed in the column “Office” at <https://www.wipo.int/directory/en/urls.jsp>).

Translator: An individual or Business Entity that possesses the requisite knowledge and expertise to accurately translate the words of a document written in one language to the native language of the CA.

Trustworthy System: Computer hardware, software, and procedures that are: reasonably secure from intrusion and misuse; provide a reasonable level of availability, reliability, and correct operation; are reasonably suited to performing their intended functions; and enforce the applicable security policy.

Valid Certificate: A Certificate that passes the validation procedure specified in RFC 5280.

Validation Specialists: Someone who performs the information verification duties specified by these Requirements.

Validity Period: The period of time measured from the date when the Certificate is issued until the Expiry Date.

Verification Document: A document used to verify the identity and relevant information of the Contract Signer or Certificate Approver (acting as the Designated Individual) that is Notarized by a Notary. The Verification Document should:

1. List the Contract Signer or Certificate Approver’s name and the address where the Contract Signer or Certificate Approver is located when the Notarization procedure occurs,
2. Contain language that the Contract Signer or Certificate Approver confirms the information listed in (1) is correct and a place for the Contract Signer or Certificate Approver to sign the document, and
3. Contain appropriate text for the Notary to sign and affix a seal (as appropriate in the jurisdiction) to indicate the Verification Document was Notarized by the Notary.

Verified Accountant Letter: A document meeting the requirements specified in [Section 3.2.13.2](#) of these Requirements

Verified Legal Opinion: A document meeting the requirements specified in [Section 3.2.13.1](#) of these Requirements.

Verified Mark Certificate: A certificate that contains subject information and extensions specified in these MC Requirements and that has been verified and issued by a CA in accordance with these MC Requirements. Additionally, the certificate contains a Mark Representation that has been verified as a Registered Mark or Government Mark.

Verified Method of Communication: The use of a telephone number, a fax number, an email address, or postal delivery address, confirmed by the CA in accordance with [Section 3.2.8](#) of the Requirements as a reliable way of communicating with the Applicant.

Verified Professional Letter: A Verified Accountant Letter or Verified Legal Opinion.

WHOIS: Information retrieved directly from the Domain Name Registrar or registry operator via the protocol defined in RFC 3912, the Registry Data Access Protocol defined in RFC 7482, or an HTTPS website.

Word Mark: A mark consisting exclusively of text expressed without regard to the font, style, size or color. For Registered Marks, see [Appendix B](#) for mapping of the names used by different trademarks offices to the definition of Word Mark.

1.6.2. Acronyms

AICPA	American Institute of Certified Public Accountants
ADN	Authorization Domain Name
CA	Certification Authority
CAA	Certification Authority Authorization
ccTLD	Country Code Top-Level Domain
CP	Certificate Policy
CPS	Certification Practice Statement
CRL	Certificate Revocation List
DBA	Doing Business As
DNS	Domain Name System
FIPS	(US Government) Federal Information Processing Standard
FQDN	Fully Qualified Domain Name
IM	Instant Messaging
IANA	Internet Assigned Numbers Authority
ICANN	Internet Corporation for Assigned Names and Numbers
ISO	International Organization for Standardization
NIST	(US Government) National Institute of Standards and Technology

OCSP	Online Certificate Status Protocol
OID	Object Identifier
PKI	Public Key Infrastructure
RA	Registration Authority
S/MIME	Secure MIME (Multipurpose Internet Mail Extensions)
SSL	Secure Sockets Layer
TLD	Top-Level Domain
TLS	Transport Layer Security
VoIP	Voice Over Internet Protocol
BIPM	International Bureau of Weights and Measures
BIS	(US Government) Bureau of Industry and Security
CEO	Chief Executive Officer
CFO	Chief Financial Officer
CIO	Chief Information Officer
CISO	Chief Information Security Officer
COO	Chief Operating Officer
CPA	Chartered Professional Accountant
CSO	Chief Security Officer
EV	Extended Validation
gTLD	Generic Top-Level Domain
IFAC	International Federation of Accountants
IRS	Internal Revenue Service
ISP	Internet Service Provider
QGIS	Qualified Government Information Source
QTIS	Qualified Government Tax Information Source
QIIS	Qualified Independent Information Source
SEC	(US Government) Securities and Exchange Commission
UTC(k)	National realization of Coordinated Universal Time

X.509, Recommendation ITU-T X.509 (10/2012) | ISO/IEC 9594-8:2014 (E), Information technology - Open Systems Interconnection - The Directory: Public-key and attribute certificate frameworks.

1.6.4. Conventions

The key words “MUST”, “MUST NOT”, “REQUIRED”, “SHALL”, “SHALL NOT”, “SHOULD”, “SHOULD NOT”, “RECOMMENDED”, “MAY”, and “OPTIONAL” in these Requirements shall be interpreted in accordance with RFC 2119.

2. PUBLICATION AND REPOSITORY RESPONSIBILITIES

The CA SHALL develop, implement, enforce, and annually update a Certificate Policy and/or Certification Practice Statement that describes in detail how the CA implements the latest version of these Requirements.

2.1. Repositories

The CA SHALL make revocation information for Subordinate Certificates and Subscriber Certificates available in accordance with this Policy.

2.2. Publication of information

The CA SHALL publicly disclose its Certificate Policy and/or Certification Practice Statement through an appropriate and readily accessible online means that is available on a 24x7 basis. The CA SHALL publicly disclose its CA business practices to the extent required by the CA’s selected audit scheme (see [Section 8.1](#)).

The Certificate Policy and/or Certification Practice Statement MUST be structured in accordance with RFC 3647 and MUST include all material required by RFC 3647.

Section 4.2 of a CA’s Certificate Policy and/or Certification Practice Statement SHALL state the CA’s policy or practice on processing CAA Records for Fully Qualified Domain Names; that policy SHALL be consistent with these Requirements. It SHALL clearly specify the set of Issuer Domain Names that the CA recognizes in CAA “issuevmc” records as permitting it to issue. The CA SHALL log all actions taken, if any, consistent with its processing practice.

The CA SHALL publicly give effect to these Requirements and represent that it will adhere to the latest published version. The CA MAY fulfill this requirement by incorporating these Requirements directly into its Certificate Policy and/or Certification Practice Statements or by incorporating them by reference using a clause such as the following (which MUST include a link to the official version of these Requirements):

[Name of CA] conforms to the current version of the Mark Certificate Requirements published at <https://bimigroup.org>. In the event of any inconsistency between this document and those Requirements, those requirements take precedence over this document.

2.3. Time or frequency of publication

The CA SHALL develop, implement, enforce, and annually update a Certificate Policy and/or Certification Practice Statement that describes in detail how the CA implements the latest version of these Requirements.

2.4. Access controls on repositories

The CA SHALL make its Repository publicly available in a read-only manner.

3. IDENTIFICATION AND AUTHENTICATION

3.1. Naming

3.1.1. Types of names

No stipulation.

3.1.2. Need for names to be meaningful

No stipulation.

3.1.3. Anonymity or pseudonymity of subscribers

No stipulation.

3.1.4. Rules for interpreting various name forms

No stipulation.

3.1.5. Uniqueness of names

No stipulation.

3.1.6. Recognition, authentication, and role of trademarks

No stipulation.

3.2. Initial identity validation

3.2.1. Method to Prove Possession of Private Key

The Public Key contained in Mark Certificates is not used, so CAs are not required to prove possession of the associated Private Key.

3.2.2. Authentication of Organization and Domain Identity

The CA MAY only issue MC Certificates to Applicants that meet the Private Organization, Government Entity, Business Entity and Non-Commercial Entity requirements specified below.

3.2.2.1. Private Organization Subjects

An Applicant qualifies as a Private Organization if:

1. The entity's legal existence is created or recognized by a filing with (or an act of) the Incorporating or Registration Agency in its Jurisdiction of Incorporation or Registration (e.g., by issuance of a certificate of incorporation, registration number, etc.) or created or recognized by a Government Agency (e.g. under a charter, treaty, convention, or equivalent recognition instrument);
2. The entity designated with the Incorporating or Registration Agency a Registered Agent, a Registered Office (as required under the laws of the Jurisdiction of Incorporation or Registration), or an equivalent facility;
3. The entity is not designated on the records of the Incorporating or Registration Agency by labels such as "inactive," "invalid," "not current," or the equivalent;
4. The entity has a verifiable physical existence and business presence;
5. The entity's Jurisdiction of Incorporation, Registration, Charter, or License, and/or its Place of Business is not in any country where the CA is prohibited from doing business or issuing a certificate by the laws of the CA's jurisdiction; and
6. The entity is not listed on any government denial list or prohibited list (e.g., trade embargo) under the laws of the CA's jurisdiction.

3.2.2.2. Government Entity Subjects

An Applicant qualifies as a Government Entity if:

1. The entity's legal existence was established by the political subdivision in which the entity operates;
2. The entity is not in any country where the CA is prohibited from doing business or issuing a certificate by the laws of the CA's jurisdiction; and
3. The entity is not listed on any government denial list or prohibited list (e.g., trade embargo) under the laws of the CA's jurisdiction.

3.2.2.3. Business Entity Subjects

An Applicant qualifies as a Business Entity if:

1. The entity is a legally recognized entity that filed certain forms with a Registration Agency in its jurisdiction, the Registration Agency issued or approved the entity's charter, certificate, or license, and the entity's existence can be verified with that Registration Agency;
2. The entity has a verifiable physical existence and business presence;
3. At least one Principal Individual associated with the entity is identified and validated by the CA;
4. The identified Principal Individual attests to the representations made in the Subscriber Agreement;
5. The entity and the identified Principal Individual associated with the entity are not located or residing in any country where the CA is prohibited from doing business or issuing a certificate by the laws of the CA's jurisdiction; and
6. The entity and the identified Principal Individual associated with the entity are not listed on any government denial list or prohibited list (e.g., trade embargo) under the laws of the CA's jurisdiction.

3.2.2.4. Non-Commercial Entity Subjects

An Applicant qualifies as a Non-Commercial Entity if:

1. The Applicant is an International Organization Entity, created under a charter, treaty, convention or equivalent instrument that was signed by, or on behalf of, more than one country's government. The CA/Browser Forum may publish a listing of Applicants who qualify as an International Organization for Mark eligibility; and
2. The Applicant is not headquartered in any country where the CA is prohibited from doing business or issuing a certificate by the laws of the CA's jurisdiction; and
3. The Applicant is not listed on any government denial list or prohibited list (e.g., trade embargo) under the laws of the CA's jurisdiction.

Subsidiary organizations or agencies of an entity that qualifies as a Non-Commercial Entity also qualifies for Mark Certificates as a Non-Commercial Entity.

3.2.3. Verification Requirements - Overview

Before issuing a Mark Certificate, the CA MUST ensure that all Subject organization information to be included in the MC conforms to the requirements of, and is verified in accordance with, these Requirements and matches the information confirmed and documented by the CA pursuant to its verification processes. Such verification processes are intended to accomplish the following:

1. Verify Applicant's existence and identity, including:
 - a. Verify the Applicant's legal existence and identity (as more fully set forth in [Section 3.2](#) herein),
 - b. Verify the Applicant's physical existence (business presence at a physical address), and
 - c. Verify the Applicant's operational existence (business activity).

2. Verify the Applicant is a registered holder, or has control, of the Domain Name(s) to be included in the Mark Certificate;
3. Verify a reliable means of communication with the entity to be named as the Subject in the Certificate;
4. Verify the Applicant's authorization for the Mark Certificate, including:
 - a. Verify the name, title, and authority of the Contract Signer, Certificate Approver, and Certificate Requester,
 - b. Verify that a Contract Signer signed the Subscriber Agreement or that a duly authorized individual acknowledged and agreed to the Terms of Use; and
 - c. Verify that a Certificate Approver has signed or otherwise approved the Mark Certificate Request.

3.2.4. Acceptable Methods of Verification - Overview

As a general rule, the CA is responsible for taking all verification steps reasonably necessary to satisfy each of the Verification Requirements set forth in the subsections below. The Acceptable Methods of Verification set forth in each of [Section 3.2.5](#) through [Section 3.2.19](#) (which usually include alternatives) are considered to be the minimum acceptable level of verification required of the CA. In all cases, however, the CA is responsible for taking any additional verification steps that may be reasonably necessary under the circumstances to satisfy the applicable Verification Requirement.

3.2.5. Verification of Applicant's Legal Existence and Identity

3.2.5.1. Verification Requirements

To verify the Applicant's legal existence and identity, the CA MUST do the following.

3.2.5.1.1. Private Organization Subjects

a. Legal Existence

Verify that the Applicant is a legally recognized entity, in existence and validly formed (e.g., incorporated) with the Incorporating or Registration Agency in the Applicant's Jurisdiction of Incorporation or Registration, and not designated on the records of the Incorporating or Registration Agency by labels such as "inactive", "invalid", "not current", or the equivalent.

b. Organization Name

Verify that the Applicant's formal legal name as recorded with the Incorporating or Registration Agency in the Applicant's Jurisdiction of Incorporation or Registration matches the Applicant's name in the Mark Certificate Request.

c. Registration Number

Obtain the specific Registration Number assigned to the Applicant by the Incorporating or Registration Agency in the Applicant's Jurisdiction of Incorporation or Registration. Where the Incorporating or Registration Agency does not assign a Registration Number, the CA SHALL

obtain the Applicant's date of Incorporation or Registration.

d. Registered Agent

Obtain the identity and address of the Applicant's Registered Agent or Registered Office (as applicable in the Applicant's Jurisdiction of Incorporation or Registration).

3.2.5.1.2. Government Entity Subjects

a. Legal Existence

Verify that the Applicant is a legally recognized Government Entity, in existence in the political subdivision in which such Government Entity operates.

b. Entity Name

Verify that the Applicant's formal legal name matches the Applicant's name in the Mark Certificate Request.

c. Registration Number

The CA MUST attempt to obtain the Applicant's date of incorporation, registration, or formation, or the identifier for the legislative act that created the Government Entity. In circumstances where this information is not available, the CA MUST enter appropriate language to indicate that the Subject is a Government Entity.

3.2.5.1.3. Business Entity Subjects

a. Legal Existence

Verify that the Applicant is engaged in business under the name submitted by the Applicant in the Application.

b. Organization Name

Verify that the Applicant's formal legal name as recognized by the Registration Agency in the Applicant's Jurisdiction of Registration matches the Applicant's name in the Mark Certificate Request.

c. Registration Number

Attempt to obtain the specific unique Registration Number assigned to the Applicant by the Registration Agency in the Applicant's Jurisdiction of Registration. Where the Registration Agency does not assign a Registration Number, the CA SHALL obtain the Applicant's date of Registration.

d. Principal Individual

Verify the identity of the identified Principal Individual.

3.2.5.1.4. Non-Commercial Entity Subjects (International Organizations)

a. Legal Existence

Verify that the Applicant is a legally recognized International Organization Entity.

b. Entity Name

Verify that the Applicant's formal legal name matches the Applicant's name in the Mark Certificate Request.

c. Registration Number

The CA MUST attempt to obtain the Applicant's date of formation, or the identifier for the legislative act that created the International Organization Entity. In circumstances where this information is not available, the CA MUST enter appropriate language to indicate that the Subject is an International Organization Entity.

3.2.5.2. Acceptable Method of Verification

1. Private Organization Subjects

All items listed in [Section 3.2.5.1.1](#) MUST be verified directly with, or obtained directly from, the Incorporating or Registration Agency in the Applicant's Jurisdiction of Incorporation or Registration. Such verification MAY be through use of a Qualified Government Information Source operated by, or on behalf of, the Incorporating or Registration Agency, or by direct contact with the Incorporating or Registration Agency in person or via mail, e-mail, Web address, or telephone, using an address or phone number obtained directly from the Qualified Government Information Source, Incorporating or Registration Agency, or from a Qualified Independent Information Source.

2. Government Entity Subjects

All items listed in [Section 3.2.5.1.2](#) MUST either be verified directly with, or obtained directly from, one of the following:

- a. a Qualified Government Information Source in the political subdivision in which such Government Entity operates;
- b. a superior governing Government Entity in the same political subdivision as the Applicant (e.g. a Secretary of State may verify the legal existence of a specific State Department)

Such verification MAY be by direct contact with the appropriate Government Entity in person or via mail, e-mail, Web address, or telephone, using an address or phone number obtained from a Qualified Independent Information Source.

3. Business Entity Subjects

Items listed in [Section 3.2.5.1.3](#) (a) through (c) above, MUST be verified directly with, or obtained directly from, the Registration Agency in the Applicant's Jurisdiction of Registration. Such verification MAY be performed by means of a Qualified Government Information Source, a Qualified Governmental Tax Information Source, or by direct contact with the Registration

Agency in person or via mail, e-mail, Web address, or telephone, using an address or phone number obtained directly from the Qualified Government Information Source, Qualified Governmental Tax Information Source or Registration Agency, or from a Qualified Independent Information Source. In addition, the CA MUST validate a Principal Individual associated with the Business Entity pursuant to the requirements in subsection (4), below.

4. Principal Individual

A Principal Individual associated with the Business Entity MUST be validated in a face-to-face setting. The CA MAY rely upon a face-to-face validation of the Principal Individual performed by the Registration Agency, provided that the CA has evaluated the validation procedure and concluded that it satisfies the requirements of the Requirements for face-to-face validation procedures. Where no face-to-face validation was conducted by the Registration Agency, or the Registration Agency's face-to-face validation procedure does not satisfy the requirements of the Requirements, the CA SHALL perform face-to-face validation.

a. Face-To-Face Validation

The face-to-face validation MUST be conducted before either an employee of the CA, a Latin Notary, a Notary (or equivalent in the Applicant's jurisdiction), a Lawyer, or Accountant (Third-Party Validator). In all cases, the Third-Party Validator must be working on behalf of the CA. The Principal Individual(s) MUST present the following documentation (Vetting Documents) directly to the Third-Party Validator:

- i. A Personal Statement that includes the following information:
 - A. Full name or names by which a person is, or has been, known (including all other names used);
 - B. Residential Address at which he/she can be located;
 - C. Date of birth; and
 - D. An affirmation that all of the information contained in the Certificate Request is true and correct.
- ii. A current signed government-issued identification document that includes a photo of the Individual and is signed by the Individual such as:
 - A. A passport;
 - B. A driver's license;
 - C. A personal identification card;
 - D. A concealed weapons permit; or
 - E. A military ID.
- iii. At least two secondary documentary evidences to establish his/her identity that include the name of the Individual, one of which MUST be from a financial institution.
 - A. Acceptable financial institution documents include:
 - I. A major credit card, provided that it contains an expiration date and it has not expired'

- II. A debit card from a regulated financial institution, provided that it contains an expiration date and it has not expired,
 - III. A mortgage statement from a recognizable lender that is less than six months old,
 - IV. A bank statement from a regulated financial institution that is less than six months old.
- B. Acceptable non-financial documents include:
- I. Recent original utility bills or certificates from a utility company confirming the arrangement to pay for the services at a fixed address (not a mobile/cellular telephone bill),
 - II. A copy of a statement for payment of a lease, provided that the statement is dated within the past six months,
 - III. A certified copy of a birth certificate,
 - IV. A local authority tax bill for the current year,
 - V. A certified copy of a court order, such as a divorce certificate, annulment papers, or adoption papers.

The Third-Party Validator performing the face-to-face validation MUST:

1. Attest to the signing of the Personal Statement and the identity of the signer; and
2. Identify the original Vetting Documents used to perform the identification. In addition, the Third-Party Validator MUST attest on a copy of the current signed government-issued photo identification document that it is a full, true, and accurate reproduction of the original.

b. Verification of Third-Party Validator

The CA MUST independently verify that the Third-Party Validator is a legally-qualified Latin Notary or Notary (or legal equivalent in the Applicant's jurisdiction), lawyer, or accountant in the jurisdiction of the Individual's residency, and that the Third-Party Validator actually did perform the services and did attest to the signature of the Individual.

c. Cross-checking of Information

The CA MUST obtain the signed and attested Personal Statement together with the attested copy of the current signed government-issued photo identification document. The CA MUST review the documentation to determine that the information is consistent, matches the information in the application, and identifies the Individual. The CA MAY rely on electronic copies of this documentation, provided that:

- i. the CA confirms their authenticity (not improperly modified when compared with the underlying original) with the Third-Party Validator; and
- ii. electronic copies of similar kinds of documents are recognized as legal substitutes for originals under the laws of the CA's jurisdiction.

5. Non-Commercial Entity Subjects (International Organization)

Unless verified under subsection (6), all items listed in [Section 3.2.5.1.4](#) MUST be verified either:

- a. With reference to the constituent document under which the International Organization was formed; or
- b. Directly with a signatory country's government in which the CA is permitted to do business. Such verification may be obtained from an appropriate government agency or from the laws of that country, or by verifying that the country's government has a mission to represent it at the International Organization; or
- c. Directly against any current list of qualified entities that the AuthIndicators/BIMI Group may maintain at <https://bimigroup.org>.
- d. In cases where the International Organization applying for the MC is an organ or agency - including a non-governmental organization of a verified International Organization, then the CA may verify the International Organization Applicant directly with the verified umbrella International Organization of which the Applicant is an organ or agency.

3.2.6. Verification of Applicant's Legal Existence and Identity - Assumed Name

3.2.6.1. Verification Requirements

If, in addition to the Applicant's formal legal name, as recorded with the applicable Incorporating Agency or Registration Agency in the Applicant's Jurisdiction of Incorporation or Registration, the Applicant's identity, as asserted in the Mark Certificate, is to contain any assumed name (also known as "doing business as", "DBA", or "d/b/a" in the US, and "trading as" in the UK) under which the Applicant conducts business, the CA MUST verify that:

1. the Applicant has registered its use of the assumed name with the appropriate government agency for such filings in the jurisdiction of its Place of Business (as verified in accordance with these Guidelines), and
2. that such filing continues to be valid.

3.2.6.2. Acceptable Method of Verification

To verify any assumed name under which the Applicant conducts business:

1. The CA MAY verify the assumed name through use of a Qualified Government Information Source operated by, or on behalf of, an appropriate government agency in the jurisdiction of the Applicant's Place of Business, or by direct contact with such government agency in person or via mail, e-mail, Web address, or telephone; or
2. The CA MAY verify the assumed name through use of a Qualified Independent Information Source provided that the QIIS has verified the assumed name with the appropriate government agency.
3. The CA MAY rely on a Verified Professional Letter that indicates the assumed name under which the Applicant conducts business, the government agency with which the assumed name is registered, and that such filing continues to be valid.

3.2.7. Verification of Applicant's Physical Existence

3.2.7.1. Address of Applicant's Place of Business

3.2.7.1.1. Verification Requirements

To verify the Applicant's physical existence and business presence, the CA MUST verify that the physical address provided by the Applicant is an address where the Applicant or a Parent/Subsidiary Company conducts business operations (not, for example, a mail drop or P.O. box, or 'care of' (C/O) address, such as an address for an agent of the Organization), and is the address of the Applicant's Place of Business.

3.2.7.1.2. Acceptable Methods of Verification

1. Place of Business in the Country of Incorporation or Registration

For Applicants whose Place of Business is in the same country as the Applicant's Jurisdiction of Incorporation or Registration and whose Place of Business is NOT the same as that indicated in the relevant Qualified Government Information Source used in [Section 3.2.5](#) to verify legal existence:

- a. For Applicants listed at the same Place of Business address in the current version of either at least one QGIS (other than that used to verify legal existence), QIIS or QTIS, the CA MUST confirm that the Applicant's address, as listed in the Mark Certificate Request, is a valid business address for the Applicant or a Parent/Subsidiary Company by reference to such QGIS, QIIS, or QTIS, and MAY rely on the Applicant's representation that such address is its Place of Business;
- b. For Applicants who are not listed at the same Place of Business address in the current version of either at least one QIIS or QTIS, the CA MUST confirm that the address provided by the Applicant in the Mark Certificate Request is the Applicant's or a Parent/Subsidiary Company's business address, by obtaining documentation of a site visit to the business address, which MUST be performed by a reliable individual or firm. The documentation of the site visit MUST:
 - i. Verify that the Applicant's business is located at the exact address stated in the Mark Certificate Request (e.g., via permanent signage, employee confirmation, etc.),
 - ii. Identify the type of facility (e.g., office in a commercial building, private residence, storefront, etc.) and whether it appears to be a permanent business location,
 - iii. Indicate whether there is a permanent sign (that cannot be moved) that identifies the Applicant,
 - iv. Indicate whether there is evidence that the Applicant is conducting ongoing business activities at the site (not that it is just, for example, a mail drop, P.O. box, etc.), and
 - v. Include one or more photos of:
 - A. the exterior of the site (showing signage indicating the Applicant's name, if present, and showing the street address if possible), and
 - B. the interior reception area or workspace.
 - vi. For all Applicants, the CA MAY alternatively rely on a Verified Professional Letter that

indicates the address of the Applicant's or a Parent/Subsidiary Company's Place of Business and that business operations are conducted there.

- vii. For Government Entity Applicants, the CA MAY rely on the address contained in the records of the QGIS in the Applicant's jurisdiction.
- viii. For Applicants whose Place of Business is in the same country as the Applicant's Jurisdiction of Incorporation or Registration and where the QGIS used in [Section 3.2.5](#) to verify legal existence contains a business address for the Applicant, the CA MAY rely on the address in the QGIS to confirm the Applicant's or a Parent/Subsidiary Company's address as listed in the Mark Certificate Request, and MAY rely on the Applicant's representation that such address is its Place of Business.

2. Place of Business not in the Country of Incorporation or Registration

The CA MUST rely on a Verified Professional Letter that indicates the address of the Applicant's Place of Business and that business operations are conducted there.

3.2.8. Verified Method of Communication

3.2.8.1. Verification Requirements

To assist in communicating with the Applicant and confirming that the Applicant is aware of and approves issuance, the CA MUST verify a telephone number, fax number, email address, or postal delivery address as a Verified Method of Communication with the Applicant.

3.2.8.2. Acceptable Methods of Verification

To verify a Verified Method of Communication with the Applicant, the CA MUST:

1. Verify that the Verified Method of Communication belongs to the Applicant, or a Parent/Subsidiary or Affiliate of the Applicant, by matching it with one of the Applicant's Parent/Subsidiary or Affiliate's Places of Business in:
 - a. records provided by the applicable phone company;
 - b. a QGIS, QTIS, or QIIS; or
 - c. a Verified Professional Letter; and
2. Confirm the Verified Method of Communication by using it to obtain an affirmative response sufficient to enable a reasonable person to conclude that the Applicant, or a Parent/Subsidiary or Affiliate of Applicant, can be contacted reliably by using the Verified Method of Communication.

3.2.9. Verification of Applicant's Operational Existence

3.2.9.1. Verification Requirements

The CA MUST verify that the Applicant has the ability to engage in business by verifying the Applicant's, or Affiliate/Parent/Subsidiary Company's, operational existence. The CA MAY rely on its verification of a Government Entity's legal existence under [Section 3.2.5.1.2](#) as verification of a Government Entity's operational existence.

3.2.9.2. Acceptable Methods of Verification

To verify the Applicant's ability to engage in business, the CA MUST verify the operational existence of the Applicant, or its Affiliate/Parent/Subsidiary Company, by:

1. Verifying that the Applicant, Affiliate, Parent Company, or Subsidiary Company has been in existence for at least three years, as indicated by the records of an Incorporating Agency or Registration Agency;
2. Verifying that the Applicant, Affiliate, Parent Company, or Subsidiary Company is listed in either a current QIIS or QTIS;
3. Verifying that the Applicant, Affiliate, Parent Company, or Subsidiary Company has an active current Demand Deposit Account with a Regulated Financial Institution by receiving authenticated documentation of the Applicant's, Affiliate's, Parent Company's, or Subsidiary Company's Demand Deposit Account directly from a Regulated Financial Institution; or
4. Relying on a Verified Professional Letter to the effect that the Applicant has an active current Demand Deposit Account with a Regulated Financial Institution.

3.2.10. Verification of Identity and Authority of Contract Signer and Certificate Approver

3.2.10.1. Verification Requirements

For both the Contract Signer and the Certificate Approver, the CA MUST verify the following.

1. Name, Title and Agency

The CA MUST verify the name and title of the Contract Signer and the Certificate Approver, as applicable. The CA MUST also verify that the Contract Signer and the Certificate Approver are agents representing the Applicant.

2. Signing Authority of Contract Signer

The CA MUST verify that the Contract Signer is authorized by the Applicant to enter into the Subscriber Agreement (and any other relevant contractual obligations) on behalf of the Applicant, including a contract that designates one or more Certificate Approvers on behalf of the Applicant.

3. MC Authority of Certificate Approver

The CA MUST verify, through a source other than the Certificate Approver him- or herself, that the Certificate Approver is expressly authorized by the Applicant to do the following, as of the date of the Mark Certificate Request:

- a. Submit, and, if applicable, authorize a Certificate Requester to submit, the Mark Certificate Request on behalf of the Applicant; and
- b. Provide, and, if applicable, authorize a Certificate Requester to provide, the information requested from the Applicant by the CA for issuance of the Mark Certificate; and
- c. Approve Mark Certificate Requests submitted by a Certificate Requester.

4. F2F Verification Procedure

The CA must conduct a F2F Verification Procedure of the Contract Signer or Certificate Approver for the Applicant following the verification steps described in [Section G.1](#) or [Section G.2](#). If the Notarization process of [Section G.1](#) is used, the CA must verify that the validator is a legally-qualified Notary (or legal equivalent in the Contract Signer or Certificate Approver's jurisdiction), Latin Notary, lawyer, or solicitor (collectively, "Notary") in the jurisdiction where the Contract Signer or Certificate Approver is verified.

3.2.10.2. Acceptable Methods of Verification - Name, Title and Agency

Acceptable methods of verification of the name, title, and agency status of the Contract Signer and the Certificate Approver include the following.

1. Name and Title

The CA MAY verify the name and title of the Contract Signer and the Certificate Approver by any appropriate method designed to provide reasonable assurance that a person claiming to act in such a role is in fact the named person designated to act in such role.

2. Agency

The CA MAY verify the agency of the Contract Signer and the Certificate Approver by:

- a. Contacting the Applicant using a Verified Method of Communication for the Applicant, and obtaining confirmation that the Contract Signer and/or the Certificate Approver, as applicable, is an employee; or
- b. Obtaining an Independent Confirmation From the Applicant (as described in [Section 3.2.13.4](#)), or a Verified Professional Letter verifying that the Contract Signer and/or the Certificate Approver, as applicable, is either an employee or has otherwise been appointed as an agent of the Applicant; or
- c. Obtaining confirmation from a QIIS or QGIS that the Contract Signer and/or Certificate Approver is an employee of the Applicant.

The CA MAY also verify the agency of the Certificate Approver via a certification from the Contract Signer (including in a contract between the CA and the Applicant signed by the Contract Signer), provided that the employment or agency status and Signing Authority of the Contract Signer has been verified.

3.2.10.3. Acceptable Methods of Verification - Authority

Acceptable methods of verification of the Signing Authority of the Contract Signer, and the MC Authority of the Certificate Approver, as applicable, include:

1. Corporate Resolution:

The Signing Authority of the Contract Signer, and/or the MC Authority of the Certificate Approver, MAY be verified by reliance on a properly authenticated corporate resolution that confirms that the person has been granted such Signing Authority, provided that such

resolution is: .. certified by the appropriate corporate officer (e.g., secretary), and .. the CA can reliably verify that the certification was validly signed by such person, and that such person does have the requisite authority to provide such certification;

2. Independent Confirmation from Applicant

The Signing Authority of the Contract Signer, and/or the MC Authority of the Certificate Approver, MAY be verified by obtaining an Independent Confirmation from the Applicant (as described in [Section 3.2.13.4](#));

3. Contract between CA and Applicant

The MC Authority of the Certificate Approver MAY be verified by reliance on a contract between the CA and the Applicant that designates the Certificate Approver with such MC Authority, provided that the contract is signed by the Contract Signer and provided that the agency and Signing Authority of the Contract Signer have been verified;

4. Prior Equivalent Authority

The signing authority of the Contract Signer, and/or the MC Authority* of the Certificate Approver, MAY be verified by relying on a demonstration of Prior Equivalent Authority.

a. Prior Equivalent Authority of a Contract Signer MAY be relied upon for confirmation or verification of the signing authority of the Contract Signer when the Contract Signer has executed a binding contract between the CA and the Applicant with a legally valid and enforceable seal or handwritten signature and only when the contract was executed more than 90 days prior to the Mark Certificate application. The CA MUST record sufficient details of the previous agreement to correctly identify it and associate it with the Mark application. Such details MAY include any of the following:

- i. Agreement title,
- ii. Date of Contract Signer's signature,
- iii. Contract reference number, and
- iv. Filing location.

b. Prior Equivalent Authority of a Certificate Approver MAY be relied upon for confirmation or verification of the MC Authority of the Certificate Approver when the Certificate Approver has performed one or more of the following:

- i. Under contract to the CA, has served (or is serving) as an Enterprise RA for the Applicant, or
- ii. Has participated in the approval of one or more certificate requests, for certificates issued by the CA and which are currently and verifiably in use by the Applicant. In this case the CA MUST have contacted the Certificate Approver by phone at a previously validated phone number or have accepted a signed and notarized letter approving the certificate request.

5. QIIS or QGIS

The Signing Authority of the Contract Signer, and/or the MC Authority of the Certificate

Approver, MAY be verified by a QIIS or QGIS that identifies the Contract Signer and/or the Certificate Approver as a corporate officer, sole proprietor, or other senior official of the Applicant.

6. Contract Signer's Representation/Warranty

Provided that the CA verifies that the Contract Signer is an employee or agent of the Applicant, the CA MAY rely on the signing authority of the Contract Signer by obtaining a duly executed representation or warranty from the Contract Signer that includes the following acknowledgments:

- a. That the Applicant authorizes the Contract Signer to sign the Subscriber Agreement on the Applicant's behalf,
- b. That the Subscriber Agreement is a legally valid and enforceable agreement,
- c. That, upon execution of the Subscriber Agreement, the Applicant will be bound by all of its terms and conditions,
- d. That serious consequences attach to the misuse of an Mark certificate, and
- e. The contract signer has the authority to obtain the digital equivalent of a corporate seal, stamp or officer's signature to establish the authenticity of the company's Web site.

3.2.10.4. Pre-Authorized Certificate Approver

Where the CA and Applicant contemplate the submission of multiple future Mark Certificate Requests, then, after the CA:

1. Has verified the name and title of the Contract Signer and that he/she is an employee or agent of the Applicant; and
2. Has verified the Signing Authority of such Contract Signer in accordance with one of the procedures in [Section 3.2.10](#).

The CA and the Applicant MAY enter into a written agreement, signed by the Contract Signer on behalf of the Applicant, whereby, for a specified term, the Applicant expressly authorizes one or more Certificate Approver(s) designated in such agreement to exercise MC Authority with respect to each future Mark Certificate Request submitted on behalf of the Applicant and properly authenticated as originating with, or otherwise being approved by, such Certificate Approver(s).

Such an agreement MUST provide that the Applicant SHALL be obligated under the Subscriber Agreement for all Mark Certificates issued at the request of, or approved by, such Certificate Approver(s) until such MC Authority is revoked, and MUST include mutually agreed-upon provisions for:

1. authenticating the Certificate Approver when Mark Certificate Requests are approved,
2. periodic re-confirmation of the MC Authority of the Certificate Approver,
3. secure procedures by which the Applicant can notify the CA that the MC Authority of any such Certificate Approver is revoked, and
4. such other appropriate precautions as are reasonably necessary.

3.2.11. Verification of Signature on Subscriber Agreement and Mark Certificate Requests

Both the Subscriber Agreement and each non-pre-authorized Mark Certificate Request MUST be signed. The Subscriber Agreement MUST be signed by an authorized Contract Signer. The Mark Certificate Request MUST be signed by the Certificate Requester submitting the document, unless the Certificate Request has been pre-authorized in line with [Section 3.2.10.4](#) of these Requirements. If the Certificate Requester is not also an authorized Certificate Approver, then an authorized Certificate Approver MUST independently approve the Mark Certificate Request. In all cases, applicable signatures MUST be a legally valid and contain an enforceable seal or handwritten signature (for a paper Subscriber Agreement and/or Mark Certificate Request), or a legally valid and enforceable electronic signature (for an electronic Subscriber Agreement and/or Mark Certificate Request), that binds the Applicant to the terms of each respective document.

3.2.11.1. Verification Requirements

1. Signature

The CA MUST authenticate the signature of the Contract Signer on the Subscriber Agreement and the signature of the Certificate Requester on each Mark Certificate Request in a manner that makes it reasonably certain that the person named as the signer in the applicable document is, in fact, the person who signed the document on behalf of the Applicant.

2. Approval Alternative

In cases where an Mark Certificate Request is signed and submitted by a Certificate Requester who does not also function as a Certificate Approver, approval and adoption of the Mark Certificate Request by a Certificate Approver in accordance with the requirements of [Section 3.2.12](#) can substitute for authentication of the signature of the Certificate Requester on such Mark Certificate Request.

3.2.11.2. Acceptable Methods of Signature Verification

Acceptable methods of authenticating the signature of the Certificate Requester or Contract Signer include the following:

1. Contacting the Applicant using a Verified Method of Communication for the Applicant, for the attention of the Certificate Requester or Contract Signer, as applicable, followed by a response from someone who identifies themselves as such person confirming that he/she did sign the applicable document on behalf of the Applicant;
2. A letter mailed to the Applicant's or Agent's address, as verified through independent means in accordance with these Requirements, for the attention of the Certificate Requester or Contract Signer, as applicable, followed by a response through a Verified Method of Communication from someone who identifies themselves as such person confirming that he/she did sign the applicable document on behalf of the Applicant;
3. Use of a signature process that establishes the name and title of the signer in a secure manner, such as through use of an appropriately secure login process that identifies the signer before signing, or through use of a digital signature made with reference to an appropriately verified

certificate; or

4. Notarization by a notary, provided that the CA independently verifies that such notary is a legally qualified notary in the jurisdiction of the Certificate Requester or Contract Signer.

3.2.12. Verification of Approval of Mark Certificate Request

3.2.12.1. Verification Requirements

In cases where an Mark Certificate Request is submitted by a Certificate Requester, before the CA issues the requested Mark Certificate, the CA MUST verify that an authorized Certificate Approver reviewed and approved the Mark Certificate Request.

3.2.12.2. Acceptable Methods of Verification

Acceptable methods of verifying the Certificate Approver's approval of a Mark Certificate Request include:

1. Contacting the Certificate Approver using a Method of Communication for the Applicant and obtaining oral or written confirmation that the Certificate Approver has reviewed and approved the Mark Certificate Request;
2. Notifying the Certificate Approver that one or more new Mark Certificate Requests are available for review and approval at a designated access-controlled and secure Web site, followed by a login by, and an indication of approval from, the Certificate Approver in the manner required by the Web site; or
3. Verifying the signature of the Certificate Approver on the Mark Certificate Request in accordance with [Section 3.2.11](#) of these Requirements.

3.2.13. Verification of Certain Information Sources

3.2.13.1. Verified Legal Opinion

3.2.13.1.1. Verification Requirements

Before relying on a legal opinion submitted to the CA, the CA MUST verify that such legal opinion meets the following requirements:

1. Status of Author

The CA MUST verify that the legal opinion is authored by an independent legal practitioner retained by and representing the Applicant (or an in-house legal practitioner employed by the Applicant) (Legal Practitioner) who is either:

- a. A lawyer (or solicitor, barrister, advocate, or equivalent) licensed to practice law in the country of the Applicant's Jurisdiction of Incorporation or Registration or any jurisdiction where the Applicant maintains an office or physical facility, or
- b. A Latin Notary who is currently commissioned or licensed to practice in the country of the Applicant's Jurisdiction of Incorporation or Registration or any jurisdiction where the Applicant maintains an office or physical facility (and that such jurisdiction recognizes the

role of the Latin Notary);

2. Basis of Opinion

The CA MUST verify that the Legal Practitioner is acting on behalf of the Applicant and that the conclusions of the Verified Legal Opinion are based on the Legal Practitioner's stated familiarity with the relevant facts and the exercise of the Legal Practitioner's professional judgment and expertise;

3. Authenticity

The CA MUST confirm the authenticity of the Verified Legal Opinion.

3.2.13.1.2. Acceptable Methods of Verification

Acceptable methods of establishing the foregoing requirements for a Verified Legal Opinion are:

1. Status of Author

The CA MUST verify the professional status of the author of the legal opinion by directly contacting the authority responsible for registering or licensing such Legal Practitioner(s) in the applicable jurisdiction;

2. Basis of Opinion

The text of the legal opinion MUST make it clear that the Legal Practitioner is acting on behalf of the Applicant and that the conclusions of the legal opinion are based on the Legal Practitioner's stated familiarity with the relevant facts and the exercise of the practitioner's professional judgment and expertise. The legal opinion MAY also include disclaimers and other limitations customary in the Legal Practitioner's jurisdiction, provided that the scope of the disclaimed responsibility is not so great as to eliminate any substantial risk (financial, professional, and/or reputational) to the Legal Practitioner, should the legal opinion prove to be erroneous;

3. Authenticity

To confirm the authenticity of the legal opinion, the CA MUST make a telephone call or send a copy of the legal opinion back to the Legal Practitioner at the address, phone number, facsimile, or (if available) e-mail address for the Legal Practitioner listed with the authority responsible for registering or licensing such Legal Practitioner, and obtain confirmation from the Legal Practitioner or the Legal Practitioner's assistant that the legal opinion is authentic. If a phone number is not available from the licensing authority, the CA MAY use the number listed for the Legal Practitioner in records provided by the applicable phone company, QGIS, or QIIS.

In circumstances where the opinion is digitally signed, in a manner that confirms the authenticity of the document and the identity of the signer, as verified by the CA in [Section 3.2.13.1.2 \(1\)](#), no further verification of authenticity is required.

3.2.13.2. Verified Accountant Letter

3.2.13.2.1. Verification Requirements

Before relying on an accountant letter submitted to the CA, the CA MUST verify that such accountant letter meets the following requirements:

1. Status of Author

The CA MUST verify that the accountant letter is authored by an Accounting Practitioner retained or employed by the Applicant and licensed within the country of the Applicant's Jurisdiction of Incorporation, Jurisdiction of Registration, or country where the Applicant maintains an office or physical facility. Verification of license MUST be through the member organization or regulatory organization in the Accounting Practitioner's country or jurisdiction that is appropriate to contact when verifying an accountant's license to practice in that country or jurisdiction. Such country or jurisdiction must have an accounting standards body that maintains full membership status with the International Federation of Accountants.

2. Basis of Opinion

The CA MUST verify that the Accounting Practitioner is acting on behalf of the Applicant and that the conclusions of the Verified Accountant Letter are based on the Accounting Practitioner's stated familiarity with the relevant facts and the exercise of the Accounting Practitioner's professional judgment and expertise;

3. Authenticity

The CA MUST confirm the authenticity of the Verified Accountant Letter.

3.2.13.2.2. Acceptable Methods of Verification

Acceptable methods of establishing the foregoing requirements for a Verified Accountant Letter are listed here.

1. Status of Author

The CA MUST verify the professional status of the author of the accountant letter by directly contacting the authority responsible for registering or licensing such Accounting Practitioners in the applicable jurisdiction.

2. Basis of Opinion

The text of the Verified Accountant Letter MUST make clear that the Accounting Practitioner is acting on behalf of the Applicant and that the information in the letter is based on the Accounting Practitioner's stated familiarity with the relevant facts and the exercise of the practitioner's professional judgment and expertise. The Verified Accountant Letter MAY also include disclaimers and other limitations customary in the Accounting Practitioner's jurisdiction, provided that the scope of the disclaimed responsibility is not so great as to eliminate any substantial risk (financial, professional, and/or reputational) to the Accounting Practitioner, should the Verified Accountant Letter prove to be erroneous.

3. Authenticity

To confirm the authenticity of the accountant's opinion, the CA MUST make a telephone call or send a copy of the Verified Accountant Letter back to the Accounting Practitioner at the address, phone number, facsimile, or (if available) e-mail address for the Accounting Practitioner listed with the authority responsible for registering or licensing such Accounting Practitioners and obtain confirmation from the Accounting Practitioner or the Accounting Practitioner's assistant that the accountant letter is authentic. If a phone number is not available from the licensing authority, the CA MAY use the number listed for the Accountant in records provided by the applicable phone company, QGIS, or QIIS.

In circumstances where the opinion is digitally signed, in a manner that confirms the authenticity of the document and the identity of the signer, as verified by the CA in [Section 3.2.13.2.2 \(1\)](#), no further verification of authenticity is required.

3.2.13.3. Face-to-Face Validation using the Notarization process

3.2.13.3.1. Verification Requirements

Before relying on F2F Verification Procedure documents using the Notarization process under [Section G.1](#) that are submitted to the CA, the CA MUST verify that the Third-Party Validator meets the following requirements:

1. Qualification of Third-Party Validator

The CA MUST independently verify that the Third-Party Validator is a legally-qualified Latin Notary or Notary (or legal equivalent in the Applicant's jurisdiction), Lawyer, or Accountant in the jurisdiction of the individual's residency;

2. Document Chain of Custody

The CA MUST verify that the Third-Party Validator viewed the Vetting Documents in a face-to-face meeting with the individual being validated;

3. Verification of Attestation

If the Third-Party Validator is not a Latin Notary, then the CA MUST confirm the authenticity of the attestation and vetting documents.

3.2.13.3.2. Acceptable Methods of Verification

Acceptable methods of establishing the foregoing requirements for vetting documents are:

1. Qualification of Third-Party Validator

The CA MUST verify the professional status of the Third-Party Validator by directly contacting the authority responsible for registering or licensing such Third-Party Validators in the applicable jurisdiction;

2. Document Chain of Custody

The Third-Party Validator MUST submit a statement to the CA which attests that they obtained the Vetting Documents submitted to the CA for the individual during a face-to-face meeting with

the individual;

3. Verification of Attestation

If the Third-Party Validator is not a Latin Notary, then the CA MUST confirm the authenticity of the vetting documents received from the Third-Party Validator. The CA MUST make a telephone call to the Third-Party Validator and obtain confirmation from them or their assistant that they performed the face-to-face validation. The CA MAY rely upon self-reported information obtained from the Third-Party Validator for the sole purpose of performing this verification process. In circumstances where the attestation is digitally signed, in a manner that confirms the authenticity of the documents, and the identity of the signer as verified by the CA in [Section 3.2.13.1.1](#) (1), no further verification of authenticity is required.

3.2.13.4. Independent Confirmation From Applicant

An Independent Confirmation from the Applicant is a confirmation of a particular fact (e.g., confirmation of the employee or agency status of a Contract Signer or Certificate Approver, confirmation of the MC Authority of a Certificate Approver, etc.) that is:

1. Received by the CA from a Confirming Person (someone other than the person who is the subject of the inquiry) that has the appropriate authority to confirm such a fact, and who represents that he/she has confirmed such fact;
2. Received by the CA in a manner that authenticates and verifies the source of the confirmation; and
3. Binding on the Applicant.

An Independent Confirmation from the Applicant MAY be obtained via the following procedure:

1. Confirmation Request

The CA MUST initiate a Confirmation Request via an appropriate out-of-band communication, requesting verification or confirmation of the particular fact at issue as follows:

a. Addressee

The Confirmation Request MUST be directed to:

- i. A position within the Applicant's organization that qualifies as a Confirming Person (e.g., Secretary, President, CEO, CFO, COO, CIO, CSO, Director, etc.) and is identified by name and title in a current QGIS, QIIS, QTIS, Verified Legal Opinion, Verified Accountant Letter, or by contacting the Applicant using a Verified Method of Communication; or
- ii. The Applicant's Registered Agent or Registered Office in the Jurisdiction of Incorporation as listed in the official records of the Incorporating Agency, with instructions that it be forwarded to an appropriate Confirming Person; or
- iii. A named individual verified to be in the direct line of management above the Contract Signer or Certificate Approver by contacting the Applicant's Human Resources Department by phone or mail (at the phone number or address for the Applicant's Place of Business, verified in accordance with these Requirements).

b. Means of Communication

The Confirmation Request MUST be directed to the Confirming Person in a manner reasonably likely to reach such person. The following options are acceptable:

- i. By paper mail addressed to the Confirming Person at:
 - A. The address of the Applicant's Place of Business as verified by the CA in accordance with these Requirements, or
 - B. The business address for such Confirming Person specified in a current QGIS, QTIS, QIIS, Verified Professional Letter, or
 - C. The address of the Applicant's Registered Agent or Registered Office listed in the official records of the Jurisdiction of Incorporation, or
- ii. By e-mail addressed to the Confirming Person at the business e-mail address for such person listed in a current QGIS, QTIS, or QIIS, Verified Legal Opinion, or Verified Accountant Letter; or
- iii. By telephone call to the Confirming Person, where such person is contacted by calling the main phone number of the Applicant's Place of Business (verified in accordance with these Requirements) and asking to speak to such person, and a person taking the call identifies him- or herself as such person; or
- iv. By facsimile to the Confirming Person at the Place of Business. The facsimile number must be listed in a current QGIS, QTIS, or QIIS, Verified Legal Opinion, or Verified Accountant Letter. The cover page must be clearly addressed to the Confirming Person.

2. Confirmation Response

The CA MUST receive a response to the Confirmation Request from a Confirming Person that confirms the particular fact at issue. Such response MAY be provided to the CA by telephone, by e-mail, or by paper mail, so long as the CA can reliably verify that it was provided by a Confirming Person in response to the Confirmation Request.

3. The CA MAY rely on a verified Confirming Person to confirm their own contact information: email address, telephone number, and facsimile number. The CA MAY rely on this verified contact information for future correspondence with the Confirming Person if:
 - a. The domain of the e-mail address is owned by the Applicant and is the Confirming Person's own e-mail address and not a group e-mail alias;
 - b. The Confirming Person's telephone/fax number is verified by the CA to be a telephone number that is part of the organization's telephone system, and is not the personal phone number for the person.

3.2.13.5. Qualified Independent Information Source

A Qualified Independent Information Source (QIIS) is a regularly-updated and publicly available database that is generally recognized as a dependable source for certain information. A database qualifies as a QIIS if the CA determines that:

1. Industries other than the certificate industry rely on the database for accurate location, contact, or other information; and

2. The database provider updates its data on at least an annual basis.

The CA SHALL use a documented process to check the accuracy of the database and ensure its data is acceptable, including reviewing the database provider's terms of use. The CA SHALL NOT use any data in a QIIS that the CA knows is:

1. self-reported and
2. not verified by the QIIS as accurate.

Databases in which the CA or its owners or affiliated companies maintain a controlling interest, or in which any Registration Authorities or subcontractors to whom the CA has outsourced any portion of the vetting process (or their owners or affiliated companies) maintain any ownership or beneficial interest, do not qualify as a QIIS.

3.2.13.6. Qualified Government Information Source

A Qualified Government Information Source (QGIS) is a regularly-updated and current, publicly available, database designed for the purpose of accurately providing the information for which it is consulted, and which is generally recognized as a dependable source of such information provided that it is maintained by a Government Entity, the reporting of data is required by law, and false or misleading reporting is punishable with criminal or civil penalties. Nothing in these Requirements SHALL prohibit the use of third-party vendors to obtain the information from the Government Entity provided that the third party obtains the information directly from the Government Entity.

3.2.13.7. Qualified Government Tax Information Source

A Qualified Government Tax Information Source is a Qualified Government Information Source that specifically contains tax information relating to Private Organizations, Business Entities or Individuals (e.g., the IRS in the United States).

3.2.14. Validation of Domain Authorization or Control

This section defines the permitted processes and procedures for validating the Applicant's ownership or control of the domain.

The CA SHALL confirm that prior to issuance, the CA has validated each Fully-Qualified Domain Name (FQDN) listed in the Certificate using at least one of the methods listed below.

Completed validations of Applicant authority may be valid for the issuance of multiple Certificates over time. In all cases, the validation must have been initiated within the time period specified in the relevant requirement (such as [Section 4.2.1](#) of this document) prior to Certificate issuance. For purposes of domain validation, the term Applicant includes the Applicant's Parent Company, Subsidiary Company, or Affiliate.

CAs SHALL maintain a record of which domain validation method, including relevant MC Requirements version number, they used to validate every domain.

NOTE FQDNs may be listed in Subscriber Certificates using `dNSNames` in the `subjectAltName` extension or in Subordinate CA Certificates via `dNSNames` in `permittedSubtrees` within the Name Constraints extension.

3.2.14.1. Validating the Applicant as a Domain Contact

This method has been retired and **MUST NOT** be used. Prior validations using this method and validation data gathered according to this method **SHALL NOT** be used to issue certificates.

3.2.14.2. Email, Fax, SMS, or Postal Mail to Domain Contact

Confirming the Applicant's control over the FQDN by sending a Random Value via email, fax, SMS, or postal mail and then receiving a confirming response utilizing the Random Value. The Random Value **MUST** be sent to an email address, fax/SMS number, or postal mail address identified as a Domain Contact.

Each email, fax, SMS, or postal mail **MAY** confirm control of multiple Authorization Domain Names.

The CA **MAY** send the email, fax, SMS, or postal mail identified under this section to more than one recipient provided that every recipient is identified by the Domain Name Registrar as representing the Domain Name Registrant for every FQDN being verified using the email, fax, SMS, or postal mail.

The Random Value **SHALL** be unique in each email, fax, SMS, or postal mail.

The CA **MAY** resend the email, fax, SMS, or postal mail in its entirety, including re-use of the Random Value, provided that the communication's entire contents and recipient(s) remain unchanged.

The Random Value **SHALL** remain valid for use in a confirming response for no more than 30 days from its creation. The CPS **MAY** specify a shorter validity period for Random Values, in which case the CA **MUST** follow its CPS.

NOTE Once the FQDN has been validated using this method, the CA **MAY** also issue Certificates for other FQDNs that end with all the labels of the validated FQDN.

3.2.14.3. Phone Contact with Domain Contact

This method has been retired and **MUST NOT** be used. Prior validations using this method and validation data gathered according to this method **SHALL NOT** be used to issue certificates.

3.2.14.4. Constructed Email to Domain Contact

Confirm the Applicant's control over the FQDN by

1. sending an email to one or more addresses created by using 'admin', 'administrator', 'webmaster', 'hostmaster', or 'postmaster' as the local part, followed by the at-sign ("@"), followed by an Authorization Domain Name,
2. including a Random Value in the email, and

3. receiving a confirming response utilizing the Random Value.

Each email MAY confirm control of multiple FQDNs, provided the Authorization Domain Name used in the email is an Authorization Domain Name for each FQDN being confirmed.

The Random Value SHALL be unique in each email.

The email MAY be re-sent in its entirety, including the re-use of the Random Value, provided that its entire contents and recipient SHALL remain unchanged.

The Random Value SHALL remain valid for use in a confirming response for no more than 30 days from its creation. The CPS MAY specify a shorter validity period for Random Values.

NOTE

Once the FQDN has been validated using this method, the CA MAY also issue Certificates for other FQDNs that end with all the labels of the validated FQDN.

3.2.14.5. Domain Authorization Document

This method has been retired and MUST NOT be used. Prior validations using this method and validation data gathered according to this method SHALL NOT be used to issue certificates.

3.2.14.6. Agreed-Upon Change to Website

This method has been retired and MUST NOT be used. Prior validations using this method and validation data gathered according to this method SHALL NOT be used to issue certificates.

3.2.14.7. DNS Change

Confirming the Applicant's control over the FQDN by confirming the presence of a Random Value or Request Token for either in a DNS CNAME, TXT or CAA record for either 1) an Authorization Domain Name; or 2) an Authorization Domain Name that is prefixed with a label that begins with an underscore character.

If a Random Value is used, the CA SHALL provide a Random Value unique to the Certificate request and SHALL not use the Random Value after (i) 30 days or (ii) if the Applicant submitted the Certificate request, the timeframe permitted for reuse of validated information relevant to the Certificate (such as in [Section 4.2.1](#) of these Requirements).

NOTE

Once the FQDN has been validated using this method, the CA MAY also issue Certificates for other FQDNs that end with all the labels of the validated FQDN.

3.2.14.8. IP Address

This method has been retired and MUST NOT be used. Prior validations using this method and validation data gathered according to this method SHALL NOT be used to issue certificates.

3.2.14.9. Test Certificate

This method has been retired and MUST NOT be used. Prior validations using this method and validation data gathered according to this method SHALL NOT be used to issue certificates.

3.2.14.10. TLS Using a Random Number

This method has been retired and MUST NOT be used. Prior validations using this method and validation data gathered according to this method SHALL NOT be used to issue certificates.

3.2.14.11. Any Other Method

This method has been retired and MUST NOT be used.

3.2.14.12. Validating Applicant as a Domain Contact

Confirming the Applicant's control over the FQDN by validating the Applicant is the Domain Contact. This method may only be used if the CA is also the Domain Name Registrar, or an Affiliate of the Registrar, of the Base Domain Name.

NOTE

Once the FQDN has been validated using this method, the CA MAY also issue Certificates for other FQDNs that end with all the labels of the validated FQDN.

3.2.14.13. Email to DNS CAA Contact

Confirming the Applicant's control over the FQDN by sending a Random Value via email and then receiving a confirming response utilizing the Random Value. The Random Value MUST be sent to a DNS CAA Email Contact. The relevant CAA Resource Record Set MUST be found using the search algorithm defined in RFC 8659.

Each email MAY confirm control of multiple FQDNs, provided that each email address is a DNS CAA Email Contact for each Authorization Domain Name being validated. The same email MAY be sent to multiple recipients as long as all recipients are DNS CAA Email Contacts for each Authorization Domain Name being validated.

The Random Value SHALL be unique in each email. The email MAY be re-sent in its entirety, including the re-use of the Random Value, provided that its entire contents and recipient(s) SHALL remain unchanged. The Random Value SHALL remain valid for use in a confirming response for no more than 30 days from its creation. The CPS MAY specify a shorter validity period for Random Values.

NOTE

Once the FQDN has been validated using this method, the CA MAY also issue Certificates for other FQDNs that end with all the labels of the validated FQDN.

3.2.14.14. Email to DNS TXT Contact

Confirming the Applicant's control over the FQDN by sending a Random Value via email and then receiving a confirming response utilizing the Random Value. The Random Value MUST be sent to a DNS TXT Record Email Contact for the Authorization Domain Name selected to validate the FQDN.

Each email MAY confirm control of multiple FQDNs, provided that each email address is DNS TXT Record Email Contact for each Authorization Domain Name being validated. The same email MAY be sent to multiple recipients as long as all recipients are DNS TXT Record Email Contacts for each Authorization Domain Name being validated.

The Random Value SHALL be unique in each email. The email MAY be re-sent in its entirety, including the re-use of the Random Value, provided that its entire contents and recipient(s) SHALL remain unchanged. The Random Value SHALL remain valid for use in a confirming response for no more than 30 days from its creation. The CPS MAY specify a shorter validity period for Random Values.

NOTE Once the FQDN has been validated using this method, the CA MAY also issue Certificates for other FQDNs that end with all the labels of the validated FQDN.

3.2.14.15. Phone Contact with Domain Contact

Confirm the Applicant's control over the FQDN by calling the Domain Contact's phone number and obtain a confirming response to validate the ADN. Each phone call MAY confirm control of multiple ADNs provided that the same Domain Contact phone number is listed for each ADN being verified and they provide a confirming response for each ADN.

In the event that someone other than a Domain Contact is reached, the CA MAY request to be transferred to the Domain Contact.

In the event of reaching voicemail, the CA may leave the Random Value and the ADN(s) being validated. The Random Value MUST be returned to the CA to approve the request.

The Random Value SHALL remain valid for use in a confirming response for no more than 30 days from its creation. The CPS MAY specify a shorter validity period for Random Values.

NOTE Once the FQDN has been validated using this method, the CA MAY also issue Certificates for other FQDNs that end with all the labels of the validated FQDN.

3.2.14.16. Phone Contact with DNS TXT Record Phone Contact

Confirm the Applicant's control over the FQDN by calling the DNS TXT Record Phone Contact's phone number and obtain a confirming response to validate the ADN. Each phone call MAY confirm control of multiple ADNs provided that the same DNS TXT Record Phone Contact phone number is listed for each ADN being verified and they provide a confirming response for each ADN.

The CA MAY NOT knowingly be transferred or request to be transferred as this phone number has been specifically listed for the purposes of Domain Validation.

In the event of reaching voicemail, the CA may leave the Random Value and the ADN(s) being validated. The Random Value MUST be returned to the CA to approve the request.

The Random Value SHALL remain valid for use in a confirming response for no more than 30 days from its creation. The CPS MAY specify a shorter validity period for Random Values.

NOTE Once the FQDN has been validated using this method, the CA MAY also issue Certificates for other FQDNs that end with all the labels of the validated FQDN.

3.2.14.17. Phone Contact with DNS CAA Phone Contact

Confirm the Applicant's control over the FQDN by calling the DNS CAA Phone Contact's phone number and obtain a confirming response to validate the ADN. Each phone call MAY confirm control of multiple ADNs provided that the same DNS CAA Phone Contact phone number is listed for each ADN being verified and they provide a confirming response for each ADN. The relevant CAA Resource Record Set MUST be found using the search algorithm defined in RFC 8659.

The CA MUST NOT be transferred or request to be transferred as this phone number has been specifically listed for the purposes of Domain Validation.

In the event of reaching voicemail, the CA may leave the Random Value and the ADN(s) being validated. The Random Value MUST be returned to the CA to approve the request.

The Random Value SHALL remain valid for use in a confirming response for no more than 30 days from its creation. The CPS MAY specify a shorter validity period for Random Values.

NOTE	Once the FQDN has been validated using this method, the CA MAY also issue Certificates for other FQDNs that end with all the labels of the validated FQDN.
-------------	--

3.2.14.18. Agreed-Upon Change to Website v2

Confirming the Applicant's control over the FQDN by verifying that the Request Token or Random Value is contained in the contents of a file.

1. The entire Request Token or Random Value MUST NOT appear in the request used to retrieve the file, and
2. the CA MUST receive a successful HTTP response from the request (meaning a 2xx HTTP status code must be received).

The file containing the Request Token or Random Number:

1. MUST be located on the Authorization Domain Name, and
2. MUST be located under the "/.well-known/pki-validation" directory, and
3. MUST be retrieved via either the "http" or "https" scheme, and
4. MUST be accessed over an Authorized Port.

If the CA follows redirects the following apply:

1. Redirects MUST be initiated at the HTTP protocol layer (e.g. using a 3xx status code).
2. Redirects MUST be the result of an HTTP status code result within the 3xx Redirection class of status codes, as defined in RFC 7231, Section 6.4.
3. Redirects MUST be to resource URLs with either via the "http" or "https" scheme.
4. Redirects MUST be to resource URLs accessed via Authorized Ports.

If a Random Value is used, then:

1. The CA MUST provide a Random Value unique to the certificate request.

2. The Random Value MUST remain valid for use in a confirming response for no more than 30 days from its creation. The CPS MAY specify a shorter validity period for Random Values, in which case the CA MUST follow its CPS.

NOTE

Once the FQDN has been validated using this method, the CA MAY also issue Certificates for other FQDNs that end with all the labels of the validated FQDN.

3.2.14.19. Agreed-Upon Change to Website - ACME

Confirming the Applicant's control over a FQDN by validating domain control of the FQDN using the ACME HTTP Challenge method defined in section 8.3 of RFC 8555. The following are additive requirements to RFC 8555.

The CA MUST receive a successful HTTP response from the request (meaning a 2xx HTTP status code must be received).

The token (as defined in RFC 8555, section 8.3) MUST NOT be used for more than 30 days from its creation. The CPS MAY specify a shorter validity period for Random Values, in which case the CA MUST follow its CPS.

If the CA follows redirects:

1. Redirects MUST be initiated at the HTTP protocol layer (e.g. using a 3xx status code).
2. Redirects MUST be the result of an HTTP status code result within the 3xx Redirection class of status codes, as defined in RFC 7231, Section 6.4.
3. Redirects MUST be to resource URLs with either via the "http" or "https" scheme.
4. Redirects MUST be to resource URLs accessed via Authorized Ports.

NOTE

Once the FQDN has been validated using this method, the CA MAY also issue Certificates for other FQDNs that end with all the labels of the validated FQDN.

3.2.14.20. TLS Using ALPN

Confirming the Applicant's control over a FQDN by validating domain control of the FQDN by negotiating a new application layer protocol using the TLS Application-Layer Protocol Negotiation (ALPN) Extension [RFC7301] as defined in RFC 8737. The following are additive requirements to RFC 8737.

The token (as defined in RFC 8737, section 3) MUST NOT be used for more than 30 days from its creation. The CPS MAY specify a shorter validity period for the token, in which case the CA MUST follow its CPS.

3.2.15. CAA Records for Mark Certificates

1. As part of the issuance process, the CA MUST check for CAA records and follow the processing instructions found, for each `dnsName` in the `subjectAltName` extension of the certificate to be issued, as specified in Subsection (2). If the CA issues, they MUST do so within the TTL of the CAA record, or 8 hours, whichever is greater.

This stipulation does not prevent the CA from checking CAA records at any other time.

RFC 8659 requires that CAs "MUST NOT issue a certificate unless either:

1. the certificate request is consistent with the applicable CAA Resource Record set or
2. an exception specified in the relevant Certificate Policy or Certification Practices Statement applies."

For issuances conforming to these Requirements, CAs MUST NOT rely on any exceptions specified in their CP or CPS unless they are one of the following: . CAA checking is optional for certificates for which a Certificate Transparency pre-certificate was created and logged in at least one public log listed in [Appendix F](#), and for which CAA was checked. . CAA checking is optional if the CA or an Affiliate of the CA is the DNS Operator (as defined in RFC 7719) of the domain's DNS.

CAs are permitted to treat a record lookup failure as permission to issue if:

1. the failure is outside the CA's infrastructure; and
2. the lookup has been retried at least once; and
3. the domain's zone does not have a DNSSEC validation chain to the ICANN root.

CAs MUST document potential issuances that were prevented by a CAA record and SHOULD dispatch reports of such issuance requests to the contact(s) stipulated in the CAA iodef record(s), if present. CAs are not expected to support URL schemes in the iodef record other than mailto: or https:.

2. Prior to the issuance of Mark Certificates, the CA MUST check for the publication of a Relevant RRSet for each FQDN to be included in a `dnsName` within the Mark Certificate's `subjectAlternativeName` extension. The Relevant RRSet for each FQDN must be determined using the algorithm defined in section 3 of RFC 8659.

For each FQDN, if a Relevant RRSet exists, the CA MUST NOT issue the Certificate unless the CA determines that the certificate request is consistent with the Relevant RRSet. If the Relevant RRSet for an FQDN does not contain any Property Tags that restrict issuance of a Mark Certificate and does not contain any unrecognized Property Tags that are marked critical, then the Relevant RRSet does not restrict issuance of a Mark Certificate containing the given FQDN. In particular, CAA records with "issue" and "issuewild" Property Tags do not restrict the issuance of Mark Certificates.

If a CAA record with the "issuevmc" Property Tag is present in the Relevant RRset for an FQDN, it is a request that the CA:

1. Perform CAA issue restriction processing for the FQDN, and
2. Grant authorization to issue Mark Certificates containing that FQDN to the holder of the issuer-domain-name or a party acting under the explicit authority of the holder of the issuer-domain-name.

The sub-syntax of the "issuevmc" Property Tag value is the same as the "issue" Property Tag as defined in section 4.2 of RFC 8659. The semantics of the "issuevmc" Property Tag are similar to

the “issue” Property Tag, with the only difference being that the “issuevmc” Property Tag restricts issuance of Mark Certificates as opposed to TLS Server Authentication Certificates.

3.2.16. Mark Verification in Common Mark Certificates

The CA SHALL verify Marks using one of the following methods for use in Common Mark Certificates.

3.2.16.1. Proof of Prior Use

3.2.16.1.1. Verification of Prior Use of Mark for Minimum Period

This type of Mark Certificate is appropriate for Common Marks that are not Registered Marks.

The Applicant will provide the CA with the Mark Representation in SVG format that the Applicant wishes to include in the Mark Certificate. The CA SHALL verify that:

1. a Mark that matches the Mark Representation is currently displayed on a website. The Applicant’s control of the domain name of the website MUST be verified using at least one method specified in [Section 3.2.14](#), and
2. a Mark that matches the Mark Representation was historically displayed at least 12 months earlier than the date of Mark verification on a domain currently controlled by the applicant, where the historical display is verified via one of the Archive Webpage Sources allowed by these Requirements.

The CA SHALL also retain a screenshot or other record of the Mark Representation provided by the Applicant and all Mark images found during the verification process stated in the previous paragraph.

3.2.16.1.2. Approved Archive Webpage Sources

Validations of Mark Representations performed in accordance with [Section 3.2.16.1.1](#) SHALL employ one of the following Archive Webpage Sources:

- archive.org

This approved list may be modified from time to time.

3.2.16.1.3. Color Restrictions

Mark Representations in Mark Certificates based on proof of prior use shall follow the same color rules that apply to Common Marks in the applicable jurisdiction.

In determining whether the colors in the Mark Representation submitted by the Subscriber match the colors permitted by the rules that apply to Common Marks in the applicable jurisdiction, the CA SHALL maintain a record of its decision and reasons therefor in the CA’s records required in [Section 3.2.16.1.1](#).

3.2.16.2. Modification of Registered Trademark

3.2.16.2.1. Verification of Modification of Registered Trademark

The CA will perform the verification steps under [Section 3.2.17.1.1](#) and [Section 3.2.17.1.2](#) for the Registered Mark that is to be the basis of the modification proposed by the Applicant. The Applicant will provide the Mark Representation in SVG format that the Applicant wishes to include in the Mark Certificate.

3.2.16.2.2. Confirmation of Mark Representation

The CA may accept the following forms of modification of the Registered Mark in the Mark Representation:

1. For Combined Marks, the location of any word mark elements MAY be rearranged in relation to the design mark elements (for example, the word mark elements may be relocated from the right side of the design mark elements to below the design mark elements, and MAY also include separating and stacking the word mark elements into a more compact area).
2. For Design Marks and Combined Marks, a portion of the design mark element MAY be removed (but more than 49% of the design mark element SHALL NOT be removed), but the remaining design mark element SHALL NOT be altered from the original. In the case of Combined Marks, the word mark elements MAY also be relocated in relation to the remaining design mark element as described in (1).
3. For Word Marks and Combined Marks where the word mark element consists of a single word, the one word MAY be separated into multiple parts which may be stacked or not.
4. For Word Marks and Combined Marks where the word mark element consists of multiple words, MAY be separated into multiple parts which may be stacked or not, or the multiple words MAY be combined into a single word.
5. Modified Word Marks MAY be shown in any font or color against a colored or patterned background.

The CA SHOULD review the modified Mark Representation to determine if the modification makes a significant change to the obvious meaning of the original mark (as compared to the Registered Mark), and if so should notify the Applicant that the modifications cannot be accepted as submitted but must be further modified. However, the Applicant may continue to request a Mark Certificate with the requested further modifications at the Applicant's option.

As a requirement to accepting a modification in the Mark Representation from the Registered Mark, the CA MAY require the Applicant to defend, indemnify, and hold harmless the CA from all claims which may arise from any party as a result of such modification.

The following are examples of permitted modifications to registered Word Marks and word mark elements of Combined Marks.

Registered Word Mark	Permitted Modifications	
Pretty Logo	<i>Pretty</i>	Pretty
	<i>Logo</i>	Logo
Long-named Company	Long-named	L ong-
	Company	N amed C ompany

3.2.17. Mark Verification in Verified Mark Certificates

In addition to the identity and domain verification required by [Section 3.2](#), CAs issuing Verified Mark Certificates SHALL perform verification of the submitted Mark as follows:

3.2.17.1. Registered Mark Verification

3.2.17.1.1. Verification of Mark with Trademark Office

The Subscriber will provide the CA with:

1. the Registered Mark’s trademark registration number and name of the Trademark Office that granted the trademark registration, and
2. the Mark Representation in SVG format that the Applicant wishes to include in the Verified Mark Certificate. Registered Marks must be in good standing and MUST be verified through consultation with the official database of the applicable Trademark Office, to be eligible for inclusion within a Verified Mark Certificate. In addition, only Registered Marks are eligible for inclusion within the logotype (as defined in RFC3709). For clarity and without limitation, unregistered marks are not eligible as a logotype in the registered mark profile.

In the alternative, the CA MAY verify the Registered Mark through the WIPO Global Brand Database at <https://www.wipo.int/reference/en/branddb/>.

3.2.17.1.2. Verification of Registered Mark Ownership or License

The CA SHALL confirm that the owner of the Registered Mark identified in the official database of the applicable Trademark Office or the WIPO Global Brand Database is the same Subject organization verified by the Verified Mark vetting process under [Section 3.2](#) (or to a Parent, Subsidiary, or Affiliate of the organization as confirmed in accordance with the Verified Mark Requirements), or if the owner of the Registered Mark is not the same organization, that the Subject organization has obtained the right to use the Registered Mark through a mutually agreed-upon license from the entity who is the owner of record of the Registered Mark (or a Parent, Subsidiary, or Affiliate of the owner). If the owner of a Registered Mark is not the Applicant, the CA SHALL NOT issue a Certificate for the Registered Mark unless the CA obtains an authorization letter from the owner of record of the Registered Mark.

In determining whether the Applicant is the owner or a licensee of the Registered Mark corresponding to the Mark Representation, the CA SHALL maintain a record of its decisions and reasons therefor in the CA’s records required in [Section 3.2.17.1.1](#).

3.2.17.1.3. Confirmation of Mark Representation

The CA SHALL confirm that the Mark Representation submitted by the Subject organization matches the Registered Mark as it appears in the official database of the applicable Trademark Office or the WIPO Global Brand Database. In determining whether the Mark Representation matches the Registered Mark, the CA SHALL maintain a record of its decisions and reasons therefor. The CA may, but is not required to, follow the guidelines in [Appendix E](#) for comparison of the Registered Trademark with the Mark Representation.

The CA SHALL also retain a screenshot or other record of the Mark Representation provided by the Applicant and all information about the Registered Mark obtained from the applicable Trademark Office as well as all other supporting data that the CA relies upon in issuing the Verified Mark Certificate.

3.2.17.1.4. Color Restrictions

Mark Representations in Verified Mark Certificates for Combined Marks and Design Marks SHALL only be in colors as permitted for the Registered Mark by the applicable Trademark Office. The CA SHALL examine the Registered Mark to determine what rights, if any, the Subject organization has to use of the Registered Mark in the colors of the Mark Representation submitted by the Subscriber.

In determining whether the colors in the Mark Representation submitted by the Subscriber match the colors permitted by the Registered Mark registration, the CA SHALL maintain a record of its decision and reasons therefor in the CA's records required in [Section 3.2.17.1.1](#).

3.2.17.2. Government Mark Verification

VMCs may be issued to Government Entities for Government Marks under the Registered Mark Profile designated by a Certificate General Policy Identifier OID (1.3.6.1.4.1.53087.1.1) as described under [Section 7.1.2.2](#) and [Section 7.1.2.3](#). The CA SHALL confirm that a Mark or equivalent was granted to or claimed by a Government Entity or Non-Commercial Entity (International Organization) (or granted to a private organization or other organization by a Government Entity or Non-Commercial Entity [International Organization] through official statute, regulation, treaty, or government action) as it appears or is described in the statute, regulation, treaty, or government action and confirmed by a Mark Verifying Authority.

In addition to the identity and domain verification required by [Section 3.2](#), CAs issuing Verified Mark Certificates SHALL perform verification of the submitted Government Mark as follows:

3.2.17.2.1. Verification of Statute, Regulation, Treaty, or Action

The CA SHALL confirm that the Government Mark was granted to or claimed by a Government Entity or Non-Commercial Entity (International Organization) (or granted to a private organization or other organization by a Government Entity or Non-Commercial Entity (International Organization) through official statute, regulation, treaty, or government action by confirming the grant or claim in publicly available records of the statute, regulation, treaty, or government action. The CA shall maintain a copy of the statute, regulation, treaty, or government action including all official references (e.g., statute or regulation number and jurisdiction) and a copy of the Mark image as contained in or referenced by the statute or regulation. Example: US Department of the Treasury - Treasury Order 100-01 approving the design of the Treasury seal which accompanies the

Order, pursuant to 31 U.S.C. § 301(g).

The CA SHALL also retain a screenshot or other record of the Mark Representation provided by the Applicant and all information supporting the verification of the Government Mark obtained from the applicable statute, regulation, treaty, or government action.

3.2.17.2.2. Verification of Government Mark Ownership or License

The CA SHALL confirm that the owner of the Government Mark confirmed under subsection (1) is the same Subject organization verified by the Verified Mark vetting process under [Section 3.2](#), or if the owner of the Government Mark is not the same Subject organization, that the Subject organization has obtained the right to use the Government Mark through statute, regulation, treaty, or government action, or by a mutually agreed-upon license from the entity who is the owner of record of the Government Mark. If the owner of a Government Mark is not the Applicant, the Applicant may only use the Government Mark if the CA obtains an authorization letter from the owner of record of the Government Mark.

In determining whether the Applicant is the owner or a licensee of the Government Mark corresponding to the Mark Representation, the CA SHALL maintain a record of its decisions and reasons therefor in the CA's records required in [Section 3.2.17.2.1](#).

3.2.17.2.3. Confirmation of Mark Representation

The CA SHALL confirm that the Mark Representation submitted by the Applicant matches the Government Mark as confirmed under subsection (1). In determining whether the Mark Representation matches the Government Mark so confirmed, the CA SHALL maintain a record of its decisions and reasons therefor. The CA MAY follow the guidelines in [Appendix E](#) for comparison of the Government Mark as confirmed with the Mark Representation.

3.2.17.2.4. Color Restrictions

Mark Representations in Verified Mark Certificates for Combined Marks and Design Marks SHALL only be in colors as permitted for the Government Mark by the applicable statute, regulation, treaty, or government action verified by the CA. The CA SHALL examine the Government Mark to determine what rights, if any, the Subject organization has to use of the Government Mark in the colors of the Mark Representation submitted by the Subscriber.

In determining whether the colors in the Mark Representation submitted by the Subscriber match the colors permitted by the statute, regulation, treaty, or government action verified by the CA, the CA SHALL maintain a record of its decision and reasons therefor in the CA's records required in [Section 3.2.17.2.1](#).

3.2.18. Other Verification Requirements

3.2.18.1. Denied Lists and Other Legal Block Lists

3.2.18.1.1. Verification Requirements

The CA MUST verify whether the Applicant, the Contract Signer, the Certificate Approver, the Applicant's Jurisdiction of Incorporation, Registration, or Place of Business:

1. Is identified on any government denied list, list of prohibited persons, or other list that prohibits doing business with such organization or person under the laws of the country of the CA's jurisdiction(s) of operation; or
2. Has its Jurisdiction of Incorporation, Registration, or Place of Business in any country with which the laws of the CA's jurisdiction prohibit doing business.

The CA MUST NOT issue any Mark Certificate to the Applicant if either the Applicant, the Contract Signer, or Certificate Approver or if the Applicant's Jurisdiction of Incorporation or Registration or Place of Business is on any such list.

3.2.18.1.2. Acceptable Methods of Verification

The CA MUST take reasonable steps to verify with the following lists and regulations:

1. If the CA has operations in the U.S., the CA MUST take reasonable steps to verify with the following US Government denied lists and regulations:
 - a. BIS Denied Persons List - <http://www.bis.doc.gov/dpl/thedeniallist.asp>
 - b. BIS Denied Entities List - <http://www.bis.doc.gov/Entities/Default.htm>
 - c. US Treasury Department List of Specially Designated Nationals and Blocked Persons - <http://www.treas.gov/ofac/t11sdn.pdf>
 - d. US Government export regulations
2. If the CA has operations in any other country, the CA MUST take reasonable steps to verify with all equivalent denied lists and export regulations (if any) in such other country.

3.2.18.2. Parent/Subsidiary/Affiliate Relationship

A CA verifying an Applicant using information of the Applicant's Parent, Subsidiary, or Affiliate, when allowed under [Section 3.2.7.1](#), [Section 3.2.8](#), [Section 3.2.9](#), or [Section 3.2.14](#), MUST verify the Applicant's relationship to the Parent, Subsidiary, or Affiliate. Acceptable methods of verifying the Applicant's relationship to the Parent, Subsidiary, or Affiliate include the following:

1. QIIS or QGIS

The relationship between the Applicant and the Parent, Subsidiary, or Affiliate is identified in a QIIS or QGIS;

2. Independent Confirmation from the Parent, Subsidiary, or Affiliate

A CA MAY verify the relationship between an Applicant and a Parent, Subsidiary, or Affiliate by obtaining an Independent Confirmation from the appropriate Parent, Subsidiary, or Affiliate (as described in [Section 3.2.13.2](#));

3. Contract between CA and Parent, Subsidiary, or Affiliate

A CA MAY verify the relationship between an Applicant and a Parent, Subsidiary, or Affiliate by relying on a contract between the CA and the Parent, Subsidiary, or Affiliate that designates the Certificate Approver with such MC Authority, provided that the contract is signed by the Contract Signer and provided that the agency and Signing Authority of the Contract Signer have

been verified;

4. Corporate Resolution

A CA MAY verify the relationship between an Applicant and a Subsidiary by relying on a properly authenticated corporate resolution that approves creation of the Subsidiary or the Applicant, provided that such resolution is: .. certified by the appropriate corporate officer (e.g., secretary), and .. the CA can reliably verify that the certification was validly signed by such person, and that such person does have the requisite authority to provide such certification.

3.2.19. Final Cross-Correlation and Due Diligence

1. The results of the verification processes and procedures outlined in these Requirements are intended to be viewed both individually and as a group. Thus, after all of the verification processes and procedures are completed, the CA MUST have a second Validation Specialist who is not responsible for the collection of information review all of the information and documentation assembled in support of the Mark Certificate application and look for discrepancies or other details requiring further explanation.
2. The CA MUST obtain and document further explanation or clarification from the Applicant, Certificate Approver, Certificate Requester, Qualified Independent Information Sources, and/or other sources of information, as necessary, to resolve those discrepancies or details that require further explanation.
3. The CA MUST refrain from issuing a Mark Certificate until the entire corpus of information and documentation assembled in support of the Mark Certificate Request is such that issuance of the Mark Certificate will not communicate factual information that the CA knows, or the exercise of due diligence should discover from the assembled information and documentation, to be inaccurate, If satisfactory explanation and/or additional documentation are not received within a reasonable time, the CA MUST decline the Mark Certificate Request and SHOULD notify the Applicant accordingly.
4. In the case where some or all of the documentation used to support the application is in a language other than the CA's normal operating language, the CA or its Affiliate MUST perform the requirements of this Final Cross-Correlation and Due Diligence section using employees under its control and having appropriate training, experience, and judgment in confirming organizational identification and authorization and fulfilling all qualification requirements contained in [Section 5.3](#) of these Requirements. When employees under the control of the CA do not possess the language skills necessary to perform the Final Cross-Correlation and Due Diligence a CA MAY rely* on language translations of the relevant portions of the documentation, provided that the translations are received from a Translator.

3.2.20. Criteria for Interoperation or Certification

The CA SHALL disclose all Cross Certificates that identify the CA as the Subject, provided that the CA arranged for or accepted the establishment of the trust relationship (i.e. the Cross Certificate at issue).

3.3. Identification and authentication for re-key requests

3.3.1. Identification and Authentication for Routine Re-key

No stipulation.

3.3.2. Identification and Authentication for Re-key After Revocation

No stipulation.

3.4. Identification and authentication for revocation request

No stipulation.

4. CERTIFICATE LIFE-CYCLE OPERATIONAL REQUIREMENTS

4.1. Certificate Application

4.1.1. Who Can Submit a Certificate Application

In accordance with [Section 5.5.2](#), the CA SHALL maintain an internal database of all previously revoked Certificates and previously rejected certificate requests due to suspected phishing or other fraudulent usage or concerns. The CA SHALL use this information to identify subsequent suspicious certificate requests.

The CA SHALL establish a process that allows an Applicant to specify the individuals who may request Certificates. If an Applicant specifies, in writing, the individuals who may request a Certificate, then the CA SHALL NOT accept any certificate requests that are outside this specification. The CA SHALL provide an Applicant with a list of its authorized certificate requesters upon the Applicant's verified written request.

4.1.2. Enrollment Process and Responsibilities

Prior to the issuance of a Certificate, the CA SHALL obtain the following documentation from the Applicant:

1. A certificate request, which may be electronic; and
2. An executed Subscriber Agreement or Terms of Use, which may be electronic.

The CA SHOULD obtain any additional documentation the CA determines necessary to meet these Requirements.

Prior to the issuance of a Certificate, the CA SHALL obtain from the Applicant a certificate request in a form prescribed by the CA and that complies with these Requirements. One certificate request MAY suffice for multiple Certificates to be issued to the same Applicant, subject to the aging and updating requirement in [Section 4.2.1](#), provided that each Certificate is supported by a valid, current certificate request signed by the appropriate Applicant Representative on behalf of the Applicant. The certificate request MAY be made, submitted and/or signed electronically.

The certificate request MUST contain a request from, or on behalf of, the Applicant for the issuance of a Certificate, and a certification by, or on behalf of, the Applicant that all of the information contained therein is correct.

4.2. Certificate application processing

4.2.1. Performing Identification and Authentication Functions

The certificate request MAY include all factual information about the Applicant to be included in the Certificate, and such additional information as is necessary for the CA to obtain from the Applicant in order to comply with these Requirements and the CA's Certificate Policy and/or Certification Practice Statement. In cases where the certificate request does not contain all the necessary information about the Applicant, the CA SHALL obtain the remaining information from the Applicant or, having obtained it from a reliable, independent, third-party data source, confirm it with the Applicant. The CA SHALL establish and follow a documented procedure for verifying all data requested for inclusion in the Certificate by the Applicant.

Applicant information MUST include, but not be limited to, at least one Fully-Qualified Domain Name to be included in the Certificate's SubjectAltName extension.

[Section 6.3.2](#) limits the validity period of Subscriber Certificates. The CA MAY use the documents and data provided in [Section 3.2](#) to verify certificate information, or may reuse previous validations themselves, provided that the CA obtained the data or document from a source specified under or completed the validation itself no more than 398 days prior to issuing the Certificate. An authorization letter from the owner of record of the Registered Mark or Government Mark (as described in [Section 3.2.17.1.2](#) and [Section 3.2.17.2.2](#)) may be reused for up to 1,858 days.

In no case may a prior validation be reused if any data or document used in the prior validation was obtained more than the maximum time permitted for reuse of the data or document prior to issuing the Certificate.

As an exception to the validation reuse period of 398 days defined above, face-to-face validation is not required more than once for any Subscriber Organization (or Parent, Subsidiary, or Affiliate) so long as the CA has maintained continuous contact with one or more Subscriber representatives and maintains a system for authorization by the Subscriber of new Subscriber representatives (or representatives of a Parent, Subsidiary, or Affiliate). "Continuous contact" means the CA has one or more direct contacts with a Subscriber representative during the validity period of any MC issued to the Subscriber or within 90 days of the expiration of the last of the Subscriber's MC to expire.

After the change to any validation method specified in the Mark Certificate Requirements, a CA may continue to reuse validation data or documents collected prior to the change, or the validation itself, for the period stated in this section unless otherwise specifically provided in these

Requirements.

4.2.2. Approval or Rejection of Certificate Applications

CAs SHALL NOT issue certificates containing Internal Names (see [Section 7.1.4.2.1](#)).

4.2.3. Time to Process Certificate Applications

No stipulation.

4.3. Certificate issuance

4.3.1. CA Actions during Certificate Issuance

Certificate issuance by the Root CA SHALL require an individual authorized by the CA (i.e. the CA system operator, system officer, or PKI administrator) to deliberately issue a direct command in order for the Root CA to perform a certificate signing operation.

Before issuance of a Mark Certificate, the CA SHALL log the Mark Certificate pre-certificate (including all the data included in the Subject field of the certificate plus the Mark Representation) to one or more public CT logs. The list of CT logs that are acceptable for the fulfillment of this requirement is found in [Appendix F](#).

4.3.2. Notification of Certificate Issuance

No stipulation.

4.4. Certificate acceptance

4.4.1. Conduct constituting certificate acceptance

No stipulation.

4.4.2. Publication of the certificate by the CA

No stipulation.

4.4.3. Notification of certificate issuance by the CA to other entities

No stipulation.

4.5. Key pair and certificate usage

4.5.1. Subscriber private key and certificate usage

The Subscriber private key does not need to be protected, and may be discarded.

4.5.2. Relying party public key and certificate usage

No stipulation.

4.6. Certificate renewal

4.6.1. Circumstance for certificate renewal

No stipulation.

4.6.2. Who may request renewal

No stipulation.

4.6.3. Processing certificate renewal requests

No stipulation.

4.6.4. Notification of new certificate issuance to subscriber

No stipulation.

4.6.5. Conduct constituting acceptance of a renewal certificate

No stipulation.

4.6.6. Publication of the renewal certificate by the CA

No stipulation.

4.6.7. Notification of certificate issuance by the CA to other entities

No stipulation.

4.7. Certificate re-key

4.7.1. Circumstance for certificate re-key

No stipulation.

4.7.2. Who may request certification of a new public key

No stipulation.

4.7.3. Processing certificate re-keying requests

No stipulation.

4.7.4. Notification of new certificate issuance to subscriber

No stipulation.

4.7.5. Conduct constituting acceptance of a re-keyed certificate

No stipulation.

4.7.6. Publication of the re-keyed certificate by the CA

No stipulation.

4.7.7. Notification of certificate issuance by the CA to other entities

No stipulation.

4.8. Certificate modification

4.8.1. Circumstance for certificate modification

No stipulation.

4.8.2. Who may request certificate modification

No stipulation.

4.8.3. Processing certificate modification requests

The CA may rely on a previously verified certificate request to issue a replacement certificate, so long as the certificate being referenced was not revoked due to fraud or other illegal conduct, if:

1. The expiration date of the replacement certificate is the same as the expiration date of the MC that is being replaced, and
2. The Subject Information of the Certificate is the same as the Subject in the MC that is being replaced.

4.8.4. Notification of new certificate issuance to subscriber

No stipulation.

4.8.5. Conduct constituting acceptance of modified certificate

No stipulation.

4.8.6. Publication of the modified certificate by the CA

No stipulation.

4.8.7. Notification of certificate issuance by the CA to other entities

No stipulation.

4.9. Certificate revocation and suspension

4.9.1. Circumstances for Revocation

4.9.1.1. Reasons for Revoking a Subscriber Certificate

The CA SHALL revoke a Certificate within 24 hours if one or more of the following occurs:

1. The Subscriber requests in writing that the CA revoke the Certificate;
2. The Subscriber notifies the CA that the original certificate request was not authorized and does not retroactively grant authorization; or
3. The CA obtains evidence that the validation of domain authorization or control for any Fully-Qualified Domain Name in the Certificate should not be relied upon.

The CA SHOULD revoke a certificate within 24 hours and MUST revoke a Certificate within 5 days if one or more of the following occurs:

1. The Certificate no longer complies with the requirements of [Section 6.1.5](#) and [Section 6.1.6](#);
2. The CA obtains evidence that the Certificate was misused;
3. The CA is made aware that a Subscriber has violated one or more of its material obligations under the Subscriber Agreement or Terms of Use;
4. The CA is made aware of any circumstance indicating that use of a Fully-Qualified Domain in the Certificate is no longer legally permitted (e.g. a court or arbitrator has revoked a Domain Name Registrant's right to use the Domain Name, a relevant licensing or services agreement between the Domain Name Registrant and the Applicant has terminated, or the Domain Name Registrant has failed to renew the Domain Name);
5. The CA is made aware of a material change in the information contained in the Certificate;
6. The CA is made aware that the Certificate was not issued in accordance with these Requirements or the CA's Certificate Policy or Certification Practice Statement;
7. The CA determines or is made aware that any of the information appearing in the Certificate is inaccurate;
8. The CA's right to issue Certificates under these Requirements expires or is revoked or terminated, unless the CA has made arrangements to continue maintaining the CRL/OCSP Repository;
9. Revocation is required by the CA's Certificate Policy and/or Certification Practice Statement.
10. The CA receives a Court Order of Infringement, confirms the authenticity of the Court Order of Infringement, and provides 3 business days' notice to the Subscriber that the MC will be revoked.

4.9.1.2. Reasons for Revoking a Subordinate CA Certificate

The Issuing CA SHALL revoke a Subordinate CA Certificate within seven (7) days if one or more of the following occurs:

1. The Subordinate CA requests revocation in writing;
2. The Subordinate CA notifies the Issuing CA that the original certificate request was not authorized and does not retroactively grant authorization;
3. The Issuing CA obtains evidence that the Subordinate CA's Private Key corresponding to the Public Key in the Certificate suffered a Key Compromise or no longer complies with the requirements of [Section 6.1.5](#) and [Section 6.1.6](#);
4. The Issuing CA obtains evidence that the Certificate was misused;
5. The Issuing CA is made aware that the Certificate was not issued in accordance with or that Subordinate CA has not complied with this document or the applicable Certificate Policy or Certification Practice Statement;
6. The Issuing CA determines that any of the information appearing in the Certificate is inaccurate or misleading;
7. The Issuing CA or Subordinate CA ceases operations for any reason and has not made arrangements for another CA to provide revocation support for the Certificate;
8. The Issuing CA's or Subordinate CA's right to issue Certificates under these Requirements expires or is revoked or terminated, unless the Issuing CA has made arrangements to continue maintaining the CRL/OCSP Repository; or
9. Revocation is required by the Issuing CA's Certificate Policy and/or Certification Practice Statement.

4.9.2. Who Can Request Revocation

The Subscriber, RA, or Issuing CA can initiate revocation. Additionally, Subscribers, Relying Parties, Application Software Suppliers, Conflicting Trademark Owners, and other third parties may submit Certificate Problem Reports informing the issuing CA of reasonable cause to revoke the certificate.

4.9.3. Procedure for Revocation Request

The CA SHALL provide a process for Subscribers to request revocation of their own Certificates. The process MUST be described in the CA's Certificate Policy or Certification Practice Statement. The CA SHALL maintain a continuous 24x7 ability to accept and respond to revocation requests and Certificate Problem Reports.

The CA SHALL provide Subscribers, Relying Parties, Application Software Suppliers, Conflicting Trademark Owners, and other third parties with clear instructions for reporting suspected Private Key Compromise, Certificate misuse, or other types of fraud, compromise, misuse, inappropriate conduct, trademark infringement, or any other matter related to Certificates. The CA SHALL publicly disclose the instructions through a readily accessible online means and in section 1.5.2 of their CPS.

4.9.4. Revocation Request Grace Period

No stipulation.

4.9.5. Time within which CA Must Process the Revocation Request

Within 24 hours after receiving a Certificate Problem Report, the CA SHALL investigate the facts and circumstances related to a Certificate Problem Report and provide a preliminary report on its findings to both the Subscriber and the entity who filed the Certificate Problem Report.

Within a commercially reasonable period of time sufficient to allow the CA to confirm all relevant facts and communicate with all relevant parties, the CA SHALL investigate the facts and circumstances related to a Court Order of Infringement submitted by a Conflicting Trademark Owner and thereafter provide appropriate notice and take appropriate action.

4.9.6. Revocation Checking Requirement for Relying Parties

No stipulation.

NOTE

Following certificate issuance, a certificate may be revoked for reasons stated in [Section 4.9.1](#). Therefore, relying parties should check the revocation status of all certificates that contain a CDP or OCSP pointer.

4.9.7. CRL Issuance Frequency

For the status of Subscriber Certificates:

If the CA publishes a CRL, then the CA SHALL update and reissue CRLs at least once every seven days, and the value of the nextUpdate field MUST NOT be more than ten days beyond the value of the thisUpdate field.

For the status of Subordinate CA Certificates:

The CA SHALL update and reissue CRLs at least:

1. once every twelve months and
 - a. within 24 hours after revoking a Subordinate CA Certificate, and the value of the nextUpdate field MUST NOT be more than twelve months beyond the value of the thisUpdate field.

4.9.8. Maximum Latency for CRLs

No stipulation.

4.9.9. On-line Revocation/Status Checking Availability

OCSP responses MUST conform to RFC6960 and/or RFC5019. OCSP responses MUST either:

1. Be signed by the CA that issued the Certificates whose revocation status is being checked, or
2. Be signed by an OCSP Responder whose Certificate is signed by the CA that issued the Certificate

whose revocation status is being checked.

In the latter case, the OCSF signing Certificate MUST contain an extension of type `id-pkix-ocsp-nocheck`, as defined by RFC6960.

4.9.10. On-line Revocation Checking Requirements

OCSF responders operated by the CA SHALL support the HTTP GET method, as described in RFC 6960 and/or RFC 5019.

For the status of Subscriber Certificates which include an Authority Information Access extension with a `id-ad-ocsp` accessMethod (“AIA OCSF pointer”):

- The CA SHALL update information provided via an Online Certificate Status Protocol at least every four days. OCSF responses from this service MUST have a maximum expiration time of ten days.

CAs MAY decline to provide definitive responses for the status of Subscriber Certificates which do not include an Authority Information Access extension with a `id-ad-ocsp` accessMethod (“AIA OCSF pointer”).

For the status of Subordinate CA Certificates:

- The CA SHALL update information provided via an Online Certificate Status Protocol:
 - at least every twelve months; and
 - within 24 hours after revoking a Subordinate CA Certificate.

If the OCSF responder receives a request for the status of a certificate serial number that is "unused", then the responder MUST NOT respond with a "good" status.

The OCSF responder MAY provide definitive responses about "reserved" certificate serial numbers, as if there was a corresponding Certificate that matches the Precertificate [RFC6962].

A certificate serial number within an OCSF request is one of the following three options:

1. "assigned" if a Certificate with that serial number has been issued by the Issuing CA, using any current or previous key associated with that CA subject; or
2. "reserved" if a Precertificate [RFC6962] with that serial number has been issued by (a) the Issuing CA; or (b) a Precertificate Signing Certificate [RFC6962] associated with the Issuing CA; or
3. "unused" if neither of the previous conditions are met.

4.9.11. Other Forms of Revocation Advertisements Available

No stipulation.

4.9.12. Special Requirements Related to Key Compromise

See [Section 4.9.1](#).

4.9.13. Circumstances for Suspension

The Repository MUST NOT include entries that indicate that a Certificate is suspended.

4.9.14. Who Can Request Suspension

Not applicable.

4.9.15. Procedure for Suspension Request

Not applicable.

4.9.16. Limits on Suspension Period

Not applicable.

4.10. Certificate status services

4.10.1. Operational Characteristics

Revocation entries on a CRL or OCSP Response MUST NOT be removed until after the Expiry Date of the revoked Certificate.

4.10.2. Service Availability

The CA SHALL operate and maintain its CRL and OCSP capability with resources sufficient to provide a response time of ten seconds or less under normal operating conditions.

The CA SHALL maintain an online 24x7 Repository that application software can use to automatically check the current status of all unexpired Certificates issued by the CA.

The CA SHALL maintain a continuous 24x7 ability to respond internally to a high-priority Certificate Problem Report, and where appropriate, forward such a complaint to law enforcement authorities, and/or revoke a Certificate that is the subject of such a complaint.

4.10.3. Optional Features

No stipulation.

4.11. End of subscription

No stipulation.

4.12. Key escrow and recovery

4.12.1. Key escrow and recovery policy and practices

Not applicable.

4.12.2. Session key encapsulation and recovery policy and practices

Not applicable.

5. MANAGEMENT, OPERATIONAL, and Physical CONTROLS

The CA/Browser Forum's Network and Certificate System Security Requirements are incorporated by reference as if fully set forth herein.

The CA SHALL develop, implement, and maintain a comprehensive security program designed to:

1. Protect the confidentiality, integrity, and availability of Certificate Data and Certificate Management Processes;
2. Protect against anticipated threats or hazards to the confidentiality, integrity, and availability of the Certificate Data and Certificate Management Processes;
3. Protect against unauthorized or unlawful access, use, disclosure, alteration, or destruction of any Certificate Data or Certificate Management Processes;
4. Protect against accidental loss or destruction of, or damage to, any Certificate Data or Certificate Management Processes; and
5. Comply with all other security requirements applicable to the CA by law.

The Certificate Management Process MUST include:

1. physical security and environmental controls;
2. system integrity controls, including configuration management, integrity maintenance of trusted code, and malware detection/prevention;
3. network security and firewall management, including port restrictions and IP address filtering;
4. user management, separate trusted-role assignments, education, awareness, and training; and
5. logical access controls, activity logging, and inactivity time-outs to provide individual accountability.

The CA's security program MUST include an annual Risk Assessment that:

1. Identifies foreseeable internal and external threats that could result in unauthorized access, disclosure, misuse, alteration, or destruction of any Certificate Data or Certificate Management Processes;
2. Assesses the likelihood and potential damage of these threats, taking into consideration the sensitivity of the Certificate Data and Certificate Management Processes; and
3. Assesses the sufficiency of the policies, procedures, information systems, technology, and other arrangements that the CA has in place to counter such threats.

Based on the Risk Assessment, the CA SHALL develop, implement, and maintain a security plan consisting of security procedures, measures, and products designed to achieve the objectives set

forth above and to manage and control the risks identified during the Risk Assessment, commensurate with the sensitivity of the Certificate Data and Certificate Management Processes. The security plan MUST include administrative, organizational, technical, and physical safeguards appropriate to the sensitivity of the Certificate Data and Certificate Management Processes. The security plan MUST also take into account then-available technology and the cost of implementing the specific measures, and SHALL implement a reasonable level of security appropriate to the harm that might result from a breach of security and the nature of the data to be protected.

5.1. Physical security Controls

5.1.1. Site location and construction

No stipulation.

5.1.2. Physical access

No stipulation.

5.1.3. Power and air conditioning

No stipulation.

5.1.4. Water exposures

No stipulation.

5.1.5. Fire prevention and protection

No stipulation.

5.1.6. Media storage

No stipulation.

5.1.7. Waste disposal

No stipulation.

5.1.8. Off-site backup

No stipulation.

5.2. Procedural controls

5.2.1. Trusted Roles

No stipulation.

5.2.2. Number of Individuals Required per Task

The CA Private Key SHALL be backed up, stored, and recovered only by personnel in trusted roles using, at least, dual control in a physically secured environment.

5.2.3. Identification and Authentication for Trusted Roles

No stipulation.

5.2.4. Roles Requiring Separation of Duties

No stipulation.

5.3. Personnel controls

5.3.1. Qualifications, Experience, and Clearance Requirements

Prior to the engagement of any person in the Certificate Management Process, whether as an employee, agent, or an independent contractor of the CA, the CA SHALL verify the identity and trustworthiness of such person.

5.3.2. Background Check Procedures

No stipulation.

5.3.3. Training Requirements and Procedures

The CA SHALL provide all personnel performing information verification duties with skills-training that covers basic Public Key Infrastructure knowledge, authentication and vetting policies and procedures (including the CA's Certificate Policy and/or Certification Practice Statement), common threats to the information verification process (including phishing and other social engineering tactics), and these Requirements.

The CA SHALL maintain records of such training and ensure that personnel entrusted with Validation Specialist duties maintain a skill level that enables them to perform such duties satisfactorily.

The CA SHALL document that each Validation Specialist possesses the skills required by a task before allowing the Validation Specialist to perform that task.

The CA SHALL require all Validation Specialists to pass an examination provided by the CA on the information verification requirements outlined in these Requirements.

5.3.4. Retraining Frequency and Requirements

All personnel in Trusted Roles SHALL maintain skill levels consistent with the CA's training and performance programs.

5.3.5. Job Rotation Frequency and Sequence

No stipulation.

5.3.6. Sanctions for Unauthorized Actions

No stipulation.

5.3.7. Independent Contractor Controls

The CA SHALL verify that the Delegated Third Party's personnel involved in the issuance of a Certificate meet the training and skills requirements of [Section 5.3.3](#) and the document retention and event logging requirements of [Section 5.4.1](#).

5.3.8. Documentation Supplied to Personnel

No stipulation.

5.4. Audit logging procedures

5.4.1. Types of Events Recorded

The CA and each Delegated Third Party SHALL record details of the actions taken to process a certificate request and to issue a Certificate, including all information generated and documentation received in connection with the certificate request; the time and date; and the personnel involved. The CA SHALL make these records available to its Qualified Practitioner as proof of the CA's compliance with these Requirements.

The CA SHALL record at least the following events:

1. CA certificate and key lifecycle events, including:
 - a. Key generation, backup, storage, recovery, archival, and destruction;
 - b. Certificate requests, renewal, and re-key requests, and revocation;
 - c. Approval and rejection of certificate requests;
 - d. Cryptographic device lifecycle management events;
 - e. Generation of Certificate Revocation Lists and OCSP entries;
 - f. Introduction of new Certificate Profiles and retirement of existing Certificate Profiles.
2. Subscriber Certificate lifecycle management events, including:
 - a. Certificate requests, renewal, and re-key requests, and revocation;
 - b. All verification activities stipulated in these Requirements and the CA's Certification Practice Statement;
 - c. Approval and rejection of certificate requests;
 - d. Issuance of Certificates; and
 - e. Generation of Certificate Revocation Lists and OCSP entries.

3. Security events, including:
 - a. Successful and unsuccessful PKI system access attempts;
 - b. PKI and security system actions performed;
 - c. Security profile changes;
 - d. Installation, update and removal of software on a Certificate System;
 - e. System crashes, hardware failures, and other anomalies;
 - f. Firewall and router activities; and
 - g. Entries to and exits from the CA facility.

Log entries MUST include the following elements:

1. Date and time of entry;
2. Identity of the person making the journal entry; and
3. Description of the entry.

5.4.2. Frequency for Processing and Archiving Audit Logs

No stipulation.

5.4.3. Retention Period for Audit Logs

The CA SHALL retain, for at least two years:

1. CA certificate and key lifecycle management event records (as set forth in [Section 5.4.1 \(1\)](#)) after the later occurrence of:
 - a. the destruction of the CA Private Key; or
 - b. the revocation or expiration of the final CA Certificate in that set of Certificates that have an X.509v3 basicConstraints extension with the cA field set to true and which share a common Public Key corresponding to the CA Private Key;
 - c. Subscriber Certificate lifecycle management event records (as set forth in [Section 5.4.1 \(2\)](#)) after the revocation or expiration of the Subscriber Certificate.
2. Any security event records (as set forth in [Section 5.4.1 \(3\)](#)) after the event occurred.

5.4.4. Protection of Audit Log

No stipulation.

5.4.5. Audit Log Backup Procedures

No stipulation.

5.4.6. Audit Log Accumulation System (internal vs. external)

No stipulation.

5.4.7. Notification to Event-Causing Subject

No stipulation.

5.4.8. Vulnerability Assessments

Additionally, the CA's security program MUST include an annual Risk Assessment that:

1. Identifies foreseeable internal and external threats that could result in unauthorized access, disclosure, misuse, alteration, or destruction of any Certificate Data or Certificate Management Processes;
2. Assesses the likelihood and potential damage of these threats, taking into consideration the sensitivity of the Certificate Data and Certificate Management Processes; and
3. Assesses the sufficiency of the policies, procedures, information systems, technology, and other arrangements that the CA has in place to counter such threats.

5.5. Records archival

5.5.1. Types of Records Archived

No stipulation.

5.5.2. Retention Period for Archive

The CA SHALL retain all documentation relating to certificate requests and the verification thereof, and all Certificates and revocation thereof, for at least two years after any Certificate based on that documentation ceases to be valid.

5.5.3. Protection of Archive

No stipulation.

5.5.4. Archive Backup Procedures

No stipulation.

5.5.5. Requirements for Time-stamping of Records

No stipulation.

5.5.6. Archive Collection System (internal or external)

No stipulation.

5.5.7. Procedures to Obtain and Verify Archive Information

No stipulation.

5.6. Key changeover

No stipulation.

5.7. Compromise and disaster recovery

5.7.1. Incident and Compromise Handling Procedures

CA organizations SHALL have an Incident Response Plan and a Disaster Recovery Plan.

The CA SHALL document a business continuity and disaster recovery procedures designed to notify and reasonably protect Application Software Suppliers, Subscribers, and Relying Parties in the event of a disaster, security compromise, or business failure. The CA is not required to publicly disclose its business continuity plans but SHALL make its business continuity plan and security plans available to the CA's auditors upon request. The CA SHALL annually test, review, and update these procedures.

The business continuity plan MUST include:

1. The conditions for activating the plan,
2. Emergency procedures,
3. Fallback procedures,
4. Resumption procedures,
5. A maintenance schedule for the plan;
6. Awareness and education requirements;
7. The responsibilities of the individuals;
8. Recovery time objective (RTO);
9. Regular testing of contingency plans.
10. The CA's plan to maintain or restore the CA's business operations in a timely manner following interruption to or failure of critical business processes
11. A requirement to store critical cryptographic materials (i.e., secure cryptographic device and activation materials) at an alternate location;
12. What constitutes an acceptable system outage and recovery time
13. How frequently backup copies of essential business information and software are taken;
14. The distance of recovery facilities to the CA's main site; and
15. Procedures for securing its facility to the extent possible during the period of time following a disaster and prior to restoring a secure environment either at the original or a remote site.

5.7.2. Recovery Procedures if Computing Resources, Software, and/or Data Are Corrupted

No stipulation.

5.7.3. Recovery Procedures After Key Compromise

No stipulation.

5.7.4. Business Continuity Capabilities after a Disaster

No stipulation.

5.8. CA or RA termination

No stipulation.

6. TECHNICAL SECURITY CONTROLS

6.1. Key pair generation and installation

6.1.1. Key Pair Generation

6.1.1.1. CA Key Pair Generation

For Root CA Key Pairs that are either (i) used as Root CA Key Pairs or (ii) Key Pairs generated for a subordinate CA that is not the operator of the Root CA or an Affiliate of the Root CA, the CA SHALL:

1. prepare and follow a Key Generation Script,
2. have a Qualified Practitioner witness the Root CA Key Pair generation process or record a video of the entire Root CA Key Pair generation process, and
3. have a Qualified Practitioner issue a report opining that the CA followed its key ceremony during its Key and Certificate generation process and the controls used to ensure the integrity and confidentiality of the Key Pair.

For other CA Key Pairs that are for the operator of the Root CA or an Affiliate of the Root CA, the CA SHOULD:

1. prepare and follow a Key Generation Script and
2. have a Qualified Practitioner witness the Root CA Key Pair generation process or record a video of the entire Root CA Key Pair generation process.

In all cases, the CA SHALL:

1. generate the keys in a physically secured environment as described in the CA's Certificate Policy and/or Certification Practice Statement;
2. generate the CA keys using personnel in trusted roles under the principles of multiple person control and split knowledge;
3. generate the CA keys within cryptographic modules meeting the applicable technical and business requirements as disclosed in the CA's Certificate Policy and/or Certification Practice Statement;

4. log its CA key generation activities; and
5. maintain effective controls to provide reasonable assurance that the Private Key was generated and protected in conformance with the procedures described in its Certificate Policy and/or Certification Practice Statement and (if applicable) its Key Generation Script.

6.1.1.2. RA Key Pair Generation

No stipulation.

6.1.1.3. Subscriber Key Pair Generation

No stipulation.

6.1.2. Private Key Delivery to Subscriber

No stipulation.

6.1.3. Public Key Delivery to Certificate Issuer

No stipulation.

6.1.4. CA Public Key Delivery to Relying Parties

No stipulation.

6.1.5. Algorithm type and key sizes

Certificates MUST meet the following requirements for algorithm type and key size.

6.1.5.1. Root CA Certificates

- **Digest algorithm:** SHA-256, SHA-384 or SHA-512
- **Minimum RSA modulus size (bits):** 2048
- **ECC curve:** NIST P-256, P-384, or P-521

6.1.5.2. Subordinate CA Certificates

- **Digest algorithm:** SHA-256, SHA-384 or SHA-512
- **Minimum RSA modulus size (bits):** 2048
- **ECC curve:** NIST P-256, P-384, or P-521

6.1.5.3. Subscriber Certificates

- **Digest algorithm:** SHA-256, SHA-384 or SHA-512
- **Minimum RSA modulus size (bits):** 2048
- **ECC curve:** NIST P-256, P-384, or P-521

6.1.6. Public Key Parameters Generation and Quality Checking

RSA: The CA SHALL confirm that the value of the public exponent is an odd number equal to 3 or more. Additionally, the public exponent SHOULD be in the range between $2^{16}+1$ and $2^{256}-1$. The modulus SHOULD also have the following characteristics: an odd number, not the power of a prime, and have no factors smaller than 752. [Source: Section 5.3.3, NIST SP 800-89].

ECC: The CA SHOULD confirm the validity of all keys using either the ECC Full Public Key Validation Routine or the ECC Partial Public Key Validation Routine. [Source: Sections 5.6.2.3.2 and 5.6.2.3.3, respectively, of NIST SP 56A: Revision 2].

6.1.7. Key Usage Purposes

Private Keys corresponding to Root Certificates MUST NOT be used to sign Certificates except in the following cases:

1. Self-signed Certificates to represent the Root CA itself;
2. Certificates for Subordinate CAs and Cross Certificates which contain `id-kp-BrandIndicatorforMessageIdentification` (OID: 1.3.6.1.5.5.7.3.31) as the sole `KeyPurposeId` in the `extendedKeyUsage` extension;
3. Certificates for infrastructure purposes (administrative role certificates, internal CA operational device certificates); and
4. Certificates for OCSP Response verification.

Private Keys corresponding to Subordinate CA or Cross Certificates MUST NOT sign Certificates unless the Certificate to be signed contains one of the following OIDs as the sole `KeyPurposeId` in the `extendedKeyUsage` extension:

1. `id-kp-BrandIndicatorforMessageIdentification` (OID: 1.3.6.1.5.5.7.3.31); or
2. `id-kp-OCSPSigning` (OID: 1.3.6.1.5.5.7.3.9)

6.2. Private Key Protection and Cryptographic Module Engineering Controls

The CA SHALL implement physical and logical safeguards to prevent unauthorized certificate issuance. Protection of the CA Private Key outside the validated system or device specified above MUST consist of physical security, encryption, or a combination of both, implemented in a manner that prevents disclosure of the CA Private Key. The CA SHALL encrypt its Private Key with an algorithm and key-length that, according to the state of the art, are capable of withstanding cryptanalytic attacks for the residual life of the encrypted key or key part.

6.2.1. Cryptographic Module Standards and Controls

No stipulation.

6.2.2. Private Key (n out of m) Multi-person Control

No stipulation.

6.2.3. Private Key Escrow

No stipulation.

6.2.4. Private Key Backup

See [Section 5.2.2](#).

6.2.5. Private Key Archival

Parties other than the Subordinate CA SHALL NOT archive the Subordinate CA Private Keys without authorization by the Subordinate CA.

6.2.6. Private Key Transfer into or from a Cryptographic Module

If the Issuing CA generated the Private Key on behalf of the Subordinate CA, then the Issuing CA SHALL encrypt the Private Key for transport to the Subordinate CA. If the Issuing CA becomes aware that a Subordinate CA's Private Key has been communicated to an unauthorized person or an organization not affiliated with the Subordinate CA, then the Issuing CA SHALL revoke all certificates that include the Public Key corresponding to the communicated Private Key.

6.2.7. Private Key Storage on Cryptographic Module

The CA SHALL protect its Private Key in a system or device that has been validated as meeting at least FIPS 140 level 3 or an appropriate Common Criteria Protection Profile or Security Target, EAL 4 (or higher), which includes requirements to protect the Private Key and other assets against known threats.

6.2.8. Activating Private Keys

No stipulation.

6.2.9. Deactivating Private Keys

No stipulation.

6.2.10. Destroying Private Keys

No stipulation.

6.2.11. Cryptographic Module Capabilities

No stipulation.

6.3. Other aspects of key pair management

6.3.1. Public Key Archival

No stipulation.

6.3.2. Certificate Operational Periods and Key Pair Usage Periods

The maximum validity period **MUST NOT** exceed 398 days. If an Applicant is a licensee of a Registered Mark or Word Mark rather than the Registrant, the expiration date of the certificate **SHALL** have an expiration date that is no later than the final expiration date of the license held by the Applicant to use the Registered Mark or Word Mark, which **SHALL** be confirmed by the CA during the verification process.

6.4. Activation data

6.4.1. Activation data generation and installation

No stipulation.

6.4.2. Activation data protection

No stipulation.

6.4.3. Other aspects of activation data

No stipulation.

6.5. Computer security controls

6.5.1. Specific Computer Security Technical Requirements

The CA **SHALL** enforce multi-factor authentication for all accounts capable of directly causing certificate issuance.

6.5.2. Computer Security Rating

No stipulation.

6.6. Life cycle technical controls

6.6.1. System development controls

No stipulation.

6.6.2. Security management controls

No stipulation.

6.6.3. Life cycle security controls

No stipulation.

6.7. Network security controls

No stipulation.

6.8. Time-stamping

No stipulation.

7. CERTIFICATE, CRL, AND OCSP PROFILES

7.1. Certificate profile

Mark Certificates SHALL comply with the Mark Certificate profile requirements set out in this section.

CAs SHALL only issue Mark Certificates from a dedicated sub-CA that contains the EKU specified in [Section 7.1.2.2](#) (f).

The CA SHALL also meet the technical requirements set forth in [Section 2.2](#), [Section 6.1.5](#) and [Section 6.1.6](#).

CAs SHALL generate non-sequential Certificate serial numbers greater than zero (0) containing at least 64 bits of output from a CSPRNG.

7.1.1. Version Number(s)

Certificates MUST be of type X.509 v3.

7.1.2. Certificate Content and Extensions; Application of RFC 5280

This section specifies the additional requirements for Certificate content and extensions for Certificates.

7.1.2.1. Root CA Certificate

a. **basicConstraints**

This extension MUST appear as a critical extension. The `cA` field MUST be set true. The `pathLenConstraint` field SHOULD NOT be present.

b. **keyUsage**

This extension **MUST** be present and **MUST** be marked critical. Bit positions for `keyCertSign` and `cRLSign` **MUST** be set. If the Root CA Private Key is used for signing OCSP responses, then the `digitalSignature` bit **MUST** be set.

c. **certificatePolicies**

This extension **SHOULD NOT** be present.

d. **extendedKeyUsage**

This extension **MUST NOT** be present.

7.1.2.2. Subordinate CA Certificate

a. **certificatePolicies**

This extension **MUST** be present and **SHOULD NOT** be marked critical.

The CA **MUST** include Certificate Policy OIDs in Subordinate CA Certificates, as specified from one of the following two options:

b. Both of the following OIDs, as specified:

a. The first certificate policies value contains an identifier that names the CA's Certification Practice Statement (CPS) applicable to the Mark Certificate, together with a URL for the web page where the Certification Practice Statement can be publicly reviewed. The CA CPS identifier is the Policy Identifier of the certificate policies extension. The CA CPS URL is appended as a CPS pointer qualifier.

b. The second certificate policies value contains a Mark Certificate General Policy Identifier (1.3.6.1.4.1.53087.1.1) which indicates adherence to and compliance with these MC Requirements and the MC Terms. This identifier is assigned to the Policy Identifier of the certificate policies extension.

c. anyPolicy (2.5.29.32.0). The anyPolicy Policy OID **MUST NOT** be included if the Subordinate CA is not controlled by the Root CA.

d. **cRLDistributionPoints**

This extension **MUST** be present and **MUST NOT** be marked critical. It **MUST** contain the HTTP URL of the CA's CRL service.

e. **authorityInformationAccess**

This extension **SHOULD** be present and **MUST NOT** be marked critical. It **SHOULD** contain the HTTP URL of the Issuing CA's certificate (`accessMethod` = 1.3.6.1.5.5.7.48.2). It **MAY** contain the HTTP URL of the Issuing CA's OCSP responder (`accessMethod` = 1.3.6.1.5.5.7.48.1).

f. **basicConstraints**

This extension **MUST** be present and **MUST** be marked critical. The `cA` field **MUST** be set true.

The pathLenConstraint field MAY be present.

g. **keyUsage**

This extension MUST be present and MUST be marked critical. Bit positions for keyCertSign and cRLSign MUST be set. If the Subordinate CA Private Key is used for signing OCSP responses, then the digitalSignature bit MUST be set.

h. **extkeyUsage**

The Extended Key Usage extension [RFC5280] MUST be present and MUST contain id-kp-BrandIndicatorforMessageIdentification (OID: 1.3.6.1.5.5.7.3.31) as specified in Section 7 of the IETF Internet-Draft at <https://tools.ietf.org/html/draft-chuang-bimi-certificate-00>. This indicates the application of the Mark Certificate Profile. Other KeyPurposeIds MUST NOT be included. This extension SHOULD be marked non-critical.

7.1.2.3. Subscriber Certificate

a. **certificatePolicies**

This extension MUST be present and SHOULD NOT be marked critical.

certificatePolicies:policyIdentifier (Required)

Each Mark Certificate issued by the CA to a Subscriber SHALL be identified by the presence of the following Mark Certificate OIDs in the certificate's certificatePolicies extension that:

1. indicate which CA policy statement relates to that Certificate,
2. assert the CA's adherence to and compliance with these MC Requirements and assert the requirement of adherence to and compliance with the MC Terms as a condition of issuance of the Mark Certificate.

The first certificate policies value contains an identifier that names the CA's Certification Practice Statement (CPS) applicable to the Mark Certificate, together with a URL for the web page where the Certification Practice Statement can be publicly reviewed. The CA CPS identifier is the Policy Identifier of the certificate policies extension. The CA CPS URL is appended as a CPS pointer qualifier.

The second certificate policies value contains a Mark Certificate General Policy Identifier (1.3.6.1.4.1.53087.1.1) which indicates adherence to and compliance with these MC Requirements and the MC Terms. This identifier is assigned to thePolicy Identifier of the certificate policies extension.

b. **cRLDistributionPoints**

This extension MUST be present. It MUST NOT be marked critical, and it MUST contain the HTTP URL of the CA's CRL service.

c. **authorityInformationAccess**

This extension SHOULD be present. It MUST NOT be marked critical, and it SHOULD contain the

HTTP URL of the Issuing CA's certificate (accessMethod = 1.3.6.1.5.5.7.48.2).. It MAY contain the HTTP URL of the Issuing CA's OCSP responder (accessMethod = 1.3.6.1.5.5.7.48.1).

d. **basicConstraints**

This extension is optional. If present, the cA field MUST NOT be true.

e. **keyUsage**

This extension is optional. If present, bit positions for keyCertSign and cRLSign MUST NOT be set.

f. **extKeyUsage (required)**

The Extended Key Usage extension [RFC5280] MUST contain id-kp-BrandIndicatorforMessageIdentification (OID: 1.3.6.1.5.5.7.3.31) as specified in Section 7 of the IETF Internet-Draft at <https://tools.ietf.org/html/draft-chuang-bimi-certificate-00>. This indicates the application of the Mark Certificate Profile. Other KeyPurposeIds MUST NOT be included. This is REQUIRED, and the extension SHOULD be marked non-critical.

g. **signedCertificateTimestampList (OID: 1.3.6.1.4.1.11129.2.4.2)**

Mark Certificates pre-certificates MUST be logged to at least one of well-known Certificate Transparency (CT) logs [RFC6962] which then provide Signed Certificate Timestamps (SCT). The SCT must be added to the Certificate Transparency extension as a SignedCertificateTimestampList encoded as an octet string [RFC6962 section 3.3]. The AuthIndicators Working Group maintains a list of acceptable CT logs, and the current list is attached as [Appendix F](#). This extension is REQUIRED, and SHOULD NOT be marked critical.

h. **logotype extension (OID: 1.3.6.1.5.5.7.1.12)**

The extension MUST:

1. contain subjectLogo with a LogotypeData element [RFC3709] containing the Mark Representation asserted by the Subject of the Mark Certificate and verified by the CA.
2. embed the image element in "data:" URL as defined in RFC6170 section 4.

The Mark Representation MUST:

1. be embedded a secured SVG image [RFC6170]
2. use the SVG Tiny PS profile to secure the SVG
3. be compressed
4. follow other requirements set forth in [RFC6170 section 5.2]

The Mark Representation MUST NOT contain `<script>` tags. Additionally the AuthIndicators Working Group has published a SVG Tiny PS Guidelines document as well as a RNC tool to help validate the SVG. The MC SVG is also required to follow those specifications. The logotype extension is REQUIRED, and SHOULD be marked non-critical. The CA SHALL verify that the Applicant provided Mark Representation meets this secure profile.

i. Pilot identifier extension (OID: 1.3.6.1.4.1.53087.4.1)

The Pilot identifier extension denotes that the Certificate contains elements (fields or extensions) that are of an experimental nature.

If the subject:markType field contains “Prior Use Mark” or “Modified Registered Mark”, then this extension MUST be present and the value MUST contain a UTF8String with the value “Mark Certificate”. Otherwise, this extension MUST NOT be present.

If present, this extension SHALL be marked critical.

7.1.2.4. All Certificates

All other fields and extensions MUST be set in accordance with RFC 5280. The CA SHALL NOT issue a Certificate that contains a keyUsage flag, extendedKeyUsage value, Certificate extension, or other data not specified in [Section 7.1.2.1](#), [Section 7.1.2.2](#), or [Section 7.1.2.3](#) unless the CA is aware of a reason for including the data in the Certificate.

CAs SHALL NOT issue a Certificate with:

1. Extensions that do not apply in the context of the public Internet (such as an extendedKeyUsage value for a service that is only valid in the context of a privately managed network), unless:
 - a. such value falls within an OID arc for which the Applicant demonstrates ownership, or ..the Applicant can otherwise demonstrate the right to assert the data in a public context; or
2. semantics that, if included, will mislead a Relying Party about the certificate information verified by the CA (such as including extendedKeyUsage value for a smart card, where the CA is not able to verify that the corresponding Private Key is confined to such hardware due to remote issuance).

7.1.2.5. Application of RFC 5280

For purposes of clarification, a Precertificate, as described in RFC 6962 - Certificate Transparency, SHALL not be considered to be a “certificate” subject to the requirements of RFC 5280 - Internet X.509 Public Key Infrastructure Certificate and Certificate Revocation List (CRL) Profile under these Requirements.

7.1.3. Algorithm Object Identifiers

CAs MUST issue Certificates using only those algorithm identifiers listed in [Section 6.1.5](#).

7.1.4. Name Forms

7.1.4.1. Issuer Information

The content of the Certificate Issuer Distinguished Name field MUST match the Subject DN of the Issuing CA to support Name chaining as specified in RFC 5280, section 4.1.2.4.

7.1.4.2. Subject Information - Subscriber Certificates

By issuing the Certificate, the CA represents that it followed the procedure set forth in its Certificate Policy and/or Certification Practice Statement to verify that, as of the Certificate's issuance date, all of the Subject Information was accurate. CAs SHALL NOT include a Domain Name in a Subject attribute except as specified in [Section 3.2.14](#).

Subject attributes MUST NOT contain only metadata such as ',', '-', and ' ' (i.e. space) characters, and/or any other indication that the value is absent, incomplete, or not applicable.

7.1.4.2.1. Subject Alternative Name Extension

Required

Contents: This extension MUST contain at least one entry. Each entry MUST be a dNSName containing the Fully-Qualified Domain Name. The CA MUST confirm that the Applicant controls the Fully-Qualified Domain Name or has been granted the right to use it by the Domain Name Registrant, as appropriate.

CAs SHALL NOT issue certificates with a subjectAlternativeName extension containing an Internal Name.

Entries in the dNSName MUST be in the "preferred name syntax", as specified in RFC 5280, and thus MUST NOT contain underscore characters ("_").

7.1.4.2.2. Subject Distinguished Name Fields

- a. **Certificate field:** subject:commonName (OID 2.5.4.3)

Required/Optional: Deprecated (Discouraged, but not prohibited) **Contents:**

The contents MUST either be the same as the Subject Organization Name defined in [Section 7.1.4.2.2 \(b\)](#), or the Word Mark field defined in [Section 7.1.4.2.2 \(p\)](#).

- b. **Certificate field:** subject:organizationName (OID 2.5.4.10)

Required

Contents:

This field MUST contain the Subject's full legal organization name as listed in the official records of the Incorporating or Registration Agency in the Subject's Jurisdiction of Incorporation or Registration or as otherwise verified by the CA as provided herein. A CA MAY abbreviate the organization prefixes or suffixes in the organization name, e.g., if the official record shows "Company Name Incorporated" the CA MAY include "Company Name, Inc."

When abbreviating a Subject's full legal name as allowed by this subsection, the CA MUST use abbreviations that are not misleading in the Jurisdiction of Incorporation or Registration.

In addition, an assumed name or DBA name used by the Subject MAY be included at the beginning of this field, provided that it is followed by the full legal organization name in parenthesis.

If the combination of names or the organization name by itself exceeds 64 characters, the CA MAY abbreviate parts of the organization name, and/or omit non-material words in the organization name in such a way that the text in this field does not exceed the 64-character limit; provided that the CA checks this field in accordance with [Section 3.2.2](#) and a Relying Party will not be misled into thinking that they are dealing with a different organization. In cases where this is not possible, the CA MUST NOT issue the Mark Certificate.

- c. **Certificate field:** subject:streetAddress (OID: 2.5.4.9)

Optional

Contents: The subject:streetAddress field MUST contain the Subject's street address information as verified under [Section 3.2.2](#).

- d. **Certificate field:** subject:localityName (OID: 2.5.4.7)

Required if the subject:stateOrProvinceName field is absent.

Optional if the subject:stateOrProvinceName field is present.

Contents: If present, the subject:localityName field MUST contain the Subject's locality information as verified under [Section 3.2.2](#). If the subject:countryName field specifies the ISO 3166-1 user-assigned code of XX in accordance with [Section 7.1.4.2.2](#) (g), the localityName field MAY contain the Subject's locality and/or state or province information as verified under [Section 3.2.2](#).

- e. **Certificate field:** subject:stateOrProvinceName (OID: 2.5.4.8)

Required if the subject:localityName field is absent.

Optional if the subject:localityName field is present.

Contents: If present, the subject:stateOrProvinceName field MUST contain the Subject's state or province information as verified under [Section 3.2.2](#). If the subject:countryName field specifies the ISO 3166-1 user-assigned code of XX in accordance with [Section 7.1.4.2.2](#) (g), the subject:stateOrProvinceName field MAY contain the full name of the Subject's country information as verified under [Section 3.2.2](#).

- f. **Certificate field:** subject:postalCode (OID: 2.5.4.17)

Optional

Contents: The subject:postalCode field MUST contain the Subject's zip or postal information as verified under [Section 3.2.2](#).

- g. **Certificate field:** subject:countryName (OID: 2.5.4.6)

Required

Contents: The subject:countryName MUST contain the two-letter ISO 3166-1 country code associated with the location of the Subject verified under [Section 3.2.2](#). If a Country is not represented by an official ISO 3166-1 country code, the CA MAY specify the ISO 3166-1 user-

assigned code of XX indicating that an official ISO 3166-1 alpha-2 code has not been assigned.

- h. **Certificate field:** subject:organizationalUnitName (OID: 2.5.4.11)

Optional

The Organizational Unit Name field specifies an organizational unit. It identifies an organizational unit with which the certificate is affiliated. The designated organizational unit is understood to be part of an organization designated by an organizationName field. The value for Organizational Unit Name is a string chosen by the organization of which it is part (e.g., OU = "Technology Division"). See ISO/IEC 9594-6:2014 (E) Rec. ITU-T X.520 (10/2012).

- i. **Certificate field:** subject:businessCategory (OID: 2.5.4.15)

Required

Contents: This field MUST contain one of the following strings: **Private Organization**, **Government Entity**, **Business Entity**, or **Non-Commercial Entity** depending upon whether the Subject qualifies under the terms of [Section 3.2.2](#) 1, 2, 3, or 4 of these Requirements, respectively.

- j. **Certificate fields:**

Locality (if required):

subject:jurisdictionLocalityName (OID: 1.3.6.1.4.1.311.60.2.1.1)

State or province (if required):

subject:jurisdictionStateOrProvinceName (OID: 1.3.6.1.4.1.311.60.2.1.2)

Country:

subject:jurisdictionCountryName (OID: 1.3.6.1.4.1.311.60.2.1.3)

Required

Contents: These fields MUST NOT contain information that is not relevant to the level of the Incorporating Agency or Registration Agency. For example, the Jurisdiction of Incorporation for an Incorporating Agency or Jurisdiction of Registration for a Registration Agency that operates at the country level MUST include the country information but MUST NOT include the state or province or locality information. Similarly, the jurisdiction for the applicable Incorporating Agency or Registration Agency at the state or province level MUST include both country and state or province information, but MUST NOT include locality information. And, the jurisdiction for the applicable Incorporating Agency or Registration Agency at the locality level MUST include the country and state or province information, where the state or province regulates the registration of the entities at the locality level, as well as the locality information. Country information MUST be specified using the applicable ISO country code. State or province or locality information (where applicable) for the Subject's Jurisdiction of Incorporation or Registration MUST be specified using the full name of the applicable jurisdiction.

- k. **Certificate field:** subject:serialNumber (OID: 2.5.4.5)

Required

Contents: For Private Organizations, this field MUST contain the Registration (or similar) Number assigned to the Subject by the Incorporating or Registration Agency in its Jurisdiction of Incorporation or Registration, as appropriate. If the Jurisdiction of Incorporation or Registration does not provide a Registration Number, then the date of Incorporation or Registration SHALL be entered into this field in any one of the common date formats.

For Government Entities that do not have a Registration Number or readily verifiable date of creation, the CA SHALL enter appropriate language to indicate that the Subject is a Government Entity.

For Business Entities, the Registration Number that was received by the Business Entity upon government registration SHALL be entered in this field. For those Business Entities that register with an Incorporating Agency or Registration Agency in a jurisdiction that does not issue numbers pursuant to government registration, the date of the registration SHALL be entered into this field in any one of the common date formats.

- l. **Certificate field:** subject:legalEntityIdentifier (OID: 1.3.6.1.4.1.53087.1.5)

Optional

Contents: Contains a 20-character alphanumeric LEI string from a valid registration. The validation process is as follows:

1. This information SHALL be validated by matching the organization name and registration number found in the Global LEI Index against the Subject Organization Name Field (see Mark Certificate Requirements (b)) and Subject Serial Number Field (see [Section 7.1.4.2.2 \(k\)](#)) within the context of the subject's jurisdiction as specified in [Section 7.1.4.2.2 \(j\)](#)) The address information from Mark validation SHALL be compared to the Headquarters Address information in the LEI record in order to detect potential matching errors or errors in the registration information. If the addresses do not match, the CA will attempt to validate the address found in the LEI record as a confirmed office location for the Subscriber, if possible.
2. The CA SHALL verify that the ValidationSources field of the associated LEI record contains the designation FULLY_CORROBORATED before including an LEI in a MC.

- m. **Certificate field:** subject:trademarkCountryOrRegionName (OID: 1.3.6.1.4.1.53087.1.3)

Required if the subject:markType field contains one of the following values: “Registered Mark” or “Modified Registered Mark”; **Prohibited** otherwise

Contents: If the subject:markType field contains “Registered Mark” or “Modified Registered Mark”, then this field MUST contain the country or region of the Trademark Office that registered the Registered Mark as an WIPO ST.3 two letter country and intergovernmental/regional agency code (see list at <http://www.wipo.int/export/sites/www/standards/en/pdf/03-03-01.pdf>).

- n. **Certificate field:** subject:trademarkOfficeName (OID: 1.3.6.1.4.1.53087.1.2)

Required if the subject:markType field contains one of the following values: “Registered Mark” or “Modified Registered Mark” and the applicable country/region has more than one national/regional intellectual property agency where trademarks can be registered; **Optional** if the subject:markType otherwise contains one of the following values: “Registered Mark” or “Modified Registered Mark”; **Prohibited** if the subject:markType does not contain one of the following values: “Registered Mark” or “Modified Registered Mark”

Contents: This string value identifies the Trademark Office by inserting the Trademark Office name listed in the “Office” column in the WIPO directory of country and regional intellectual property agencies at <https://www.wipo.int/directory/en/urls.jsp> for the Trademark Office that registered the Registered Mark included in the Verified Mark Certificate or is processing the application of the Mark included in the Mark Certificate.

- o. **Certificate field:** subject:trademarkIdentifier (OID: 1.3.6.1.4.1.53087.1.4)

Required if the subject:markType field contains one of the following values: “Registered Mark” or “Modified Registered Mark”; **Prohibited** otherwise

Contents: This string value contains the identifier assigned by the Trademark Office to identify the Registered Mark or Registered Mark application.

- p. **Certificate field:** subject:wordMark (OID: 1.3.6.1.4.1.53087.1.6)

Optional

Contents: Contains a Word Mark or the word(s) included in a Combined Mark.

- q. **Certificate field:** subject:organizationIdentifier (OID: 2.5.4.97)

Optional

Contents: If present, this field **MUST** contain a Registration Reference for a Legal Entity assigned in accordance to the identified Registration Scheme.

The organizationIdentifier **MUST** be encoded as a PrintableString or UTF8String.

The Registration Scheme **MUST** be identified using the using the following structure in the presented order:

- 3 character Registration Scheme identifier;
- 2 character ISO 3166 country code for the nation in which the Registration Scheme is operated, or if the scheme is operated globally ISO 3166 code "XG" SHALL be used;
- For the NTR Registration Scheme identifier, if required under [Appendix J](#), a 2 character ISO 3166-2 identifier for the subdivision (state or province) of the nation in which the Registration Scheme is operated, preceded by plus "+" (0x2B (ASCII), U+002B (UTF-8));
- a hyphen-minus "-" (0x2D (ASCII), U+002D (UTF-8));
- Registration Reference allocated in accordance with the identified Registration Scheme

Note: Registration References **MAY** contain hyphens, but Registration Schemes, ISO 3166

country codes, and ISO 3166-2 identifiers do not. Therefore if more than one hyphen appears in the structure, the leftmost hyphen is a separator, and the remaining hyphens are part of the Registration Reference.

As in [Section 7.1.4.2.2 \(j\)](#), the specified location information MUST match the scope of the registration being referenced.

Examples:

- NTRGB-12345678 (NTR scheme, Great Britain, Unique Identifier at Country level is 12345678)
- NTRUS+CA-12345678 (NTR Scheme, United States - California, Unique identifier at State level is 12345678)
- VATDE-123456789 (VAT Scheme, Germany, Unique Identifier at Country Level is 12345678)
- PSDBE-NBB-1234.567.890 (PSD Scheme, Belgium, NCA's identifier is NBB, Subject Unique Identifier assigned by the NCA is 1234.567.890)

Registration Schemes listed in [Appendix J](#) are currently recognized as valid under these guidelines.

The CA SHALL:

1. confirm that the organization represented by the Registration Reference is the same as the organization named in the organizationName field as specified in [Section 7.1.4.2.2 \(b\)](#) within the context of the subject's jurisdiction as specified in [Section 7.1.4.2.2 \(j\)](#);
2. further verify the Registration Reference matches other information verified in accordance with [Section 3.2](#);
3. take appropriate measures to disambiguate between different organizations as described in [Appendix J](#) for each Registration Scheme;
4. apply the validation rules relevant to the Registration Scheme as in [Appendix J](#).

r. **Certificate field:** *subject:markType* (OID: 1.3.6.1.4.1.53087.1.13)

Required

Contents: This field MUST contain one of the following values corresponding to the sub-section in [Section 3.2.17](#) or [Section 3.2.16](#) that the CA employed to validate the Mark included in the Certificate:

Section number of Mark validation method	subject:markType value
Section 3.2.17.1	Registered Mark
Section 3.2.17.2	Government Mark
Section 3.2.16.1	Prior Use Mark
Section 3.2.16.2	Modified Registered Mark

s. **Certificate fields:**

Locality (if required):

subject:statuteLocalityName (OID: 1.3.6.1.4.1.53087.3.4)

State or province (if required):

subject:statuteStateOrProvinceName (OID: 1.3.6.1.4.1.53087.3.3)

Country:

subject:statuteCountryName (OID: 1.3.6.1.4.1.53087.3.2)

Required if the subject:markType field contains "Government Mark"; **Prohibited** otherwise

Contents: Certificates MUST NOT contain these fields unless they are relevant to the level of the Government Entity or Non-Commercial Entity (International Organization) that established the Government Mark through statute, regulation, treaty, or government action.

For example, the jurisdiction for a Government Entity or Non-Commercial Entity (International Organization) that operates at the country level MUST include the *statuteCountry* field but MUST NOT include the *statuteStateOrProvince* and *statuteLocality* fields.

Similarly, the jurisdiction for the applicable Government Entity or Non-Commercial Entity (International Organization) at the state or province level MUST include both *statuteCountry* and *statuteStateOrProvince* fields but MUST NOT include the *statuteLocality* field. And, the jurisdiction for the applicable Government Entity or Non-Commercial Entity (International Organization) at the locality level MUST include the *statuteCountry* and *statuteStateOrProvince* fields, where the state or province regulates the registration of the entities at the locality level, as well as the *statuteLocality* field.

statuteCountry field values MUST be specified using the applicable ISO country code.

statuteStateOrProvince and *statuteLocality* field values (where applicable) MUST be specified using the full name of the applicable jurisdiction.

t. **Certificate field:** subject:statuteCitation (OID: 1.3.6.1.4.1.53087.3.5)

Required if the subject:markType field contains "Government Mark"; **Prohibited** otherwise

Contents: If the Certificates contains a Mark verified in accordance with [Section 3.2.17.2](#), then this field MUST include the official statute, regulation, treaty, or government action by which the Government Mark was granted or claimed, as confirmed by the CA. The field may contain common abbreviations, and SHOULD conform, if possible, to applicable legal guidelines in the jurisdiction for how such official statutes, regulations, or government actions are normally cited (e.g., "The Bluebook: A Uniform System of Citation" or other similar standard system of citation.)

In addition, the CA MAY include brief explanatory text to assist Relying Parties in locating the official statute, regulation, treaty, or government action by which the Government Mark was granted or claimed.

u. **Certificate field:** subject:statuteURL (OID: 1.3.6.1.4.1.53087.3.6)

Optional if the subject:markType field contains "Government Mark"; **Prohibited** otherwise

Contents: If present, this field **MUST** contain a HTTP/HTTPS URL where the official statute, regulation, treaty, or government action by which the Government Mark was granted or claimed can be found.

v. **Certificate field:** subject:priorUseMarkSourceURL (OID: 1.3.6.1.4.1.53087.5.1)

If the subject:markType field contains "Prior Use Mark":

- **Optional** if the Common Mark Certificate is issued before April 15, 2025
- **Required** if the Common Mark Certificate is issued on or after April 15, 2025

If the subject:markType field does not contain "Prior Use Mark", then this field is **Prohibited**.

Contents: This field **MUST** contain the URL where the Mark Representation included in the Mark Certificate was located by the CA during the verification process.

w. **Other Subject Attributes**

Other attributes **MAY** be present within the subject field. If present, other attributes **MUST** contain information that has been verified by the CA.

7.1.4.3. Subject Information - Root Certificates and Subordinate CA Certificates

By issuing a Subordinate CA Certificate, the CA represents that it followed the procedure set forth in its Certificate Policy and/or Certification Practice Statement to verify that, as of the Certificate's issuance date, all of the Subject Information was accurate.

7.1.4.3.1. Subject Distinguished Name Fields

a. **Certificate field:** subject:commonName (OID 2.5.4.3)

Required

Contents: This field **MUST** be present and the contents **SHOULD** be an identifier for the certificate such that the certificate's Name is unique across all certificates issued by the issuing certificate.

b. **Certificate field:** subject:organizationName (OID 2.5.4.10)

Required

Contents: This field **MUST** be present and the contents **MUST** contain either the Subject CA's name as verified under [Section 3.2](#). The CA may include information in this field that differs slightly from the verified name, such as common variations or abbreviations, provided that the CA documents the difference and any abbreviations used are locally accepted abbreviations; e.g., if the official record shows "Company Name Incorporated", the CA **MAY** use "Company

Name Inc.” or “Company Name”.

c. **Certificate field:** subject:countryName (OID: 2.5.4.6)

Required

Contents: This field MUST contain the two-letter ISO 3166-1 country code for the country in which the CA’s place of business is located.

7.1.5. Name Constraints

CAs MUST NOT include the nameConstraints extension in Certificates.

7.1.6. Certificate Policy Object Identifier

7.1.6.1. Root CA Certificates

As specified in [Section 7.1.2.1](#) (c).

7.1.6.2. Subordinate CA Certificates

As specified in [Section 7.1.2.2](#) (a).

7.1.6.3. Subscriber Certificates

As specified in [Section 7.1.2.3](#) (a).

7.1.7. Usage of Policy Constraints Extension

No stipulation.

7.1.8. Policy Qualifiers Syntax and Semantics

No stipulation.

7.1.9. Processing Semantics for the Critical Certificate Policies Extension

No stipulation.

7.2. CRL profile

7.2.1. Version number(s)

No stipulation.

7.2.2. CRL and CRL entry extensions

No stipulation.

7.3. OCSP profile

7.3.1. Version number(s)

No stipulation.

7.3.2. OCSP extensions

No stipulation.

8. COMPLIANCE AUDIT AND OTHER ASSESSMENTS

The CA SHALL at all times:

1. Issue Certificates and operate its PKI in accordance with all law applicable to its business and the Certificates it issues in every jurisdiction in which it operates;
2. Comply with these Requirements;
3. Comply with the audit requirements set forth in this section; and
4. Be licensed as a CA in each jurisdiction where it operates, if licensing is required by the law of such jurisdiction for the issuance of Certificates.

8.1. Frequency or circumstances of assessment

The period during which the CA issues Certificates SHALL be divided into an unbroken sequence of audit periods. An audit period MUST NOT exceed one year in duration.

8.2. Identity/qualifications of assessor

The CA's audit SHALL be performed by a Qualified Practitioner. A Qualified Practitioner means a natural person, Legal Entity, or group of natural persons or Legal Entities that collectively possess the following qualifications and skills:

1. Independence from the subject of the audit;
2. The ability to conduct an audit that addresses the criteria specified in an Eligible Audit Scheme (see [Section 8.4](#);
3. Employs individuals who have proficiency in examining Public Key Infrastructure technology, information security tools and techniques, information technology and security auditing, and the third-party attestation function;
4. Qualified Practitioner enrolled in the WebTrust program;
5. Bound by law, government regulation, or professional code of ethics; and
6. Maintains Professional Liability/Errors & Omissions insurance with policy limits of at least one million US dollars in coverage.

8.3. Assessor’s relationship to assessed entity

No stipulation.

8.4. Topics covered by assessment

The CA SHALL undergo an audit in accordance with one of the following schemes:

1. Until such time as the audit scheme is renamed and reissued as shown in subsection 2, “WebTrust for CAs v 2.0 or newer” AND “WebTrust Principles and Criteria for Certification Authorities - Verified Mark Certificates”
2. WebTrust for CAs v 2.0 or newer” AND “WebTrust Principles and Criteria for Certification Authorities - Mark Certificates”

The audit scheme MUST incorporate periodic monitoring and/or accountability procedures to ensure that its audits continue to be conducted in accordance with the requirements of the scheme.

The audit MUST be conducted by a Qualified Practitioner, as specified in [Section 8.2](#).

8.5. Actions taken as a result of deficiency

No stipulation.

8.6. Communication of results

The Audit Report SHALL state explicitly that it covers the relevant systems and processes used in the issuance of all Certificates that assert the MC policy identifier OID (1.3.6.1.4.1.53087.1.1). The CA SHALL make the Audit Report publicly available. The CA is not required to make publicly available any general audit findings that do not impact the overall audit opinion. The CA SHOULD make its Audit Report publicly available no later than three months after the end of the audit period. In the event of a delay greater than three months, and if so requested by an Application Software Supplier, the CA SHALL provide an explanatory letter signed by the Qualified Practitioner.

8.7. Self-Audits

During the period in which the CA issues Certificates, the CA SHALL monitor adherence to its Certificate Policy, Certification Practice Statement and these Requirements and strictly control its service quality by performing self audits on at least a quarterly basis against a randomly selected sample of the greater of one certificate or at least three percent of the Certificates issued by it during the period commencing immediately after the previous self-audit sample was taken.

9. OTHER BUSINESS AND LEGAL MATTERS

9.1. Fees

9.1.1. Certificate issuance or renewal fees

No stipulation.

9.1.2. Certificate access fees

No stipulation.

9.1.3. Revocation or status information access fees

No stipulation.

9.1.4. Fees for other services

No stipulation.

9.1.5. Refund policy

No stipulation.

9.2. Financial responsibility

9.2.1. Insurance coverage

No stipulation.

9.2.2. Other assets

No stipulation.

9.2.3. Insurance or warranty coverage for end-entities

No stipulation.

9.3. Confidentiality of business information

9.3.1. Scope of confidential information

No stipulation.

9.3.2. Information not within the scope of confidential information

No stipulation.

9.3.3. Responsibility to protect confidential information

No stipulation.

9.4. Privacy of personal information

9.4.1. Privacy plan

No stipulation.

9.4.2. Information treated as private

No stipulation.

9.4.3. Information not deemed private

No stipulation.

9.4.4. Responsibility to protect private information

No stipulation.

9.4.5. Notice and consent to use private information

No stipulation.

9.4.6. Disclosure pursuant to judicial or administrative process

No stipulation.

9.4.7. Other information disclosure circumstances

No stipulation.

9.5. Intellectual property rights

No stipulation.

9.6. Representations and warranties

9.6.1. CA Representations and Warranties

By issuing a Certificate, the CA makes the certificate warranties listed herein to the following Certificate Beneficiaries:

1. The Subscriber that is a party to the Subscriber Agreement or Terms of Use for the Certificate;
2. All Application Software Suppliers with whom the Root CA has entered into a contract for

inclusion of its Root Certificate in software distributed by such Application Software Supplier;
and

3. All Relying Parties who reasonably rely on a Valid Certificate.

The CA represents and warrants to the Certificate Beneficiaries that, during the period when the Certificate is valid, the CA has complied with these Requirements and its Certificate Policy and/or Certification Practice Statement in issuing and managing the Certificate.

The Certificate Warranties specifically include, but are not limited to, the following:

1. Right to Use Domain Name

That, at the time of issuance, the CA:

1. implemented a procedure for verifying that the Applicant either had the right to use, or had control of, the Domain Name(s) listed in the Certificate's subject field and subjectAltName extension (or was delegated such right or control by someone who had such right to use or control);
2. followed the procedure when issuing the Certificate; and
3. accurately described the procedure in the CA's Certificate Policy and/or Certification Practice Statement.

2. Authorization for Certificate

That, at the time of issuance, the CA:

1. implemented a procedure for verifying that the Subject authorized the issuance of the Certificate and that the Applicant Representative is authorized to request the Certificate on behalf of the Subject;
2. followed the procedure when issuing the Certificate; and
3. accurately described the procedure in the CA's Certificate Policy and/or Certification Practice Statement;

3. Accuracy of Information

That, at the time of issuance, the CA:

1. implemented a procedure for verifying the accuracy of all of the information contained in the Certificate;
2. followed the procedure when issuing the Certificate; and
3. accurately described the procedure in the CA's Certificate Policy and/or Certification Practice Statement;

4. Identity of Applicant

That, if the Certificate contains Subject Identity Information, the CA:

1. implemented a procedure to verify the identity of the Applicant in accordance with [Section](#)

3.2;

2. followed the procedure when issuing the Certificate; and
3. accurately described the procedure in the CA's Certificate Policy and/or Certification Practice Statement;

5. Subscriber Agreement

That, if the CA and Subscriber are not Affiliated, the Subscriber and CA are parties to a legally valid and enforceable Subscriber Agreement that satisfies these Requirements, or, if the CA and Subscriber are the same entity or are Affiliated, the Applicant Representative acknowledged the Terms of Use;

6. Status:

That the CA maintains a 24 x 7 publicly-accessible Repository with current information regarding the status (valid or revoked) of all unexpired Certificates; and

7. Revocation

That the CA will revoke the Certificate for any of the reasons specified in these Requirements.

The Root CA SHALL be responsible for the performance and warranties of the Subordinate CA, for the Subordinate CA's compliance with these Requirements, and for all liabilities and indemnification obligations of the Subordinate CA under these Requirements, as if the Root CA were the Subordinate CA issuing the Certificates.

9.6.2. RA Representations and Warranties

No stipulation.

9.6.3. Subscriber Representations and Warranties

The CA SHALL require, as part of the Subscriber Agreement or Terms of Use, that the Applicant make the commitments and warranties in this section for the benefit of the CA and the Certificate Beneficiaries.

Prior to the issuance of a Certificate, the CA SHALL obtain, for the express benefit of the CA and the Certificate Beneficiaries, either:

1. The Applicant's agreement to the Subscriber Agreement with the CA, or
2. The Applicant's acknowledgement of the Terms of Use.

The CA SHALL implement a process to ensure that each Subscriber Agreement or Terms of Use is legally enforceable against the Applicant. In either case, the Agreement MUST apply to the Certificate to be issued pursuant to the certificate request. The CA MAY use an electronic or "click-through" Agreement provided that the CA has determined that such agreements are legally enforceable. A separate Agreement MAY be used for each certificate request, or a single Agreement MAY be used to cover multiple future certificate requests and the resulting Certificates, so long as each Certificate that the CA issues to the Applicant is clearly covered by that Subscriber Agreement

or Terms of Use.

The Subscriber Agreement or Terms of Use MUST contain provisions imposing on the Applicant itself (or made by the Applicant on behalf of its principal or agent under a subcontractor or hosting service relationship) the following obligations and warranties:

1. Accuracy of Information

An obligation and warranty to provide accurate and complete information at all times to the CA, both in the certificate request and as otherwise requested by the CA in connection with the issuance of the Certificate(s) to be supplied by the CA;

2. Acceptance of Certificate

An obligation and warranty that the Subscriber will review and verify the Certificate contents for accuracy;

3. Use of Certificate

An obligation and warranty to install the Certificate only on servers that are accessible at the subjectAltName(s) listed in the Certificate, and to use the Certificate solely in compliance with all applicable laws and solely in accordance with the Subscriber Agreement or Terms of Use;

4. Reporting and Revocation

An obligation and warranty to promptly request revocation of the Certificate, and cease using it, if any information in the Certificate is or becomes incorrect or inaccurate.

5. Responsiveness

An obligation to respond to the CA's instructions concerning Certificate misuse within a specified time period.

6. Acknowledgment and Acceptance

An acknowledgment and acceptance that the CA is entitled to revoke the certificate immediately if the Applicant were to violate the terms of the Subscriber Agreement or Terms of Use or if the CA discovers that the Certificate is being used to enable criminal activities such as phishing attacks, fraud, or the distribution of malware.

9.6.4. Relying Party Representations and Warranties

No stipulation.

9.6.5. Representations and Warranties of Other Participants

No stipulation.

9.7. Disclaimers of warranties

No stipulation.

9.8. Limitations of liability

If the CA has issued and managed the Certificate in compliance with these Requirements and its Certificate Policy and/or Certification Practice Statement, the CA MAY limit liability to the Certificate Beneficiaries or any other third parties for any losses suffered as a result of use or reliance on such Certificate beyond those specified in the CA's Certificate Policy and/or Certification Practice Statement, pursuant to the minimum liability requirement below. If the CA has not issued or managed the Certificate in compliance with these Requirements and its Certificate Policy and/or Certification Practice Statement, the CA MAY seek to limit its liability to the Subscriber and to Relying Parties, regardless of the cause of action or legal theory involved, for any and all claims, losses or damages suffered as a result of the use or reliance on such Certificate by any appropriate means that the CA desires. If the CA chooses to limit its liability for Certificates that are not issued or managed in compliance with these Requirements or its Certificate Policy and/or Certification Practice Statement, then the CA SHALL include the limitations on liability in the CA's Certificate Policy and/or Certification Practice Statement, pursuant to the minimum liability requirement below.

The CA MAY NOT limit its liability to Subscribers or Relying Parties for legally recognized and provable claims to a monetary amount less than two thousand US dollars per Subscriber or Relying Party per Mark Certificate.

9.9. Indemnities

9.9.1. Indemnification by CAs

No stipulation.

9.9.2. Indemnification by Subscribers

No stipulation.

9.9.3. Indemnification by Relying Parties

No stipulation.

9.10. Term and termination

9.10.1. Term

No stipulation.

9.10.2. Termination

No stipulation.

9.10.3. Effect of termination and survival

No stipulation.

9.11. Individual notices and communications with participants

No stipulation.

9.12. Amendments

9.12.1. Procedure for amendment

No stipulation.

9.12.2. Notification mechanism and period

No stipulation.

9.12.3. Circumstances under which OID must be changed

No stipulation.

9.13. Dispute resolution provisions

No stipulation.

9.14. Governing law

No stipulation.

9.15. Compliance with applicable law

No stipulation.

9.16. Miscellaneous provisions

9.16.1. Entire Agreement

No stipulation.

9.16.2. Assignment

No stipulation.

9.16.3. Severability

In the event of a conflict between these Requirements and a law, regulation or government order (hereinafter 'Law') of any jurisdiction in which a CA operates or issues certificates, a CA MAY modify any conflicting requirement to the minimum extent necessary to make the requirement valid and legal in the jurisdiction. This applies only to operations or certificate issuances that are subject to that Law. In such event, the CA SHALL immediately (and prior to issuing a certificate under the modified requirement) include in Section 9.16.3 of the CA's CPS a detailed reference to the Law requiring a modification of these Requirements under this section, and the specific modification to these Requirements implemented by the CA.

The CA MUST also (prior to issuing a certificate under the modified requirement) notify the AuthIndicators Working Group of the relevant information newly added to its CPS by sending a message to the AuthIndicators Working Group and receiving confirmation that it has been received, so that the AuthIndicators Working Group may consider possible revisions to these Requirements accordingly.

Any modification to CA practice enabled under this section MUST be discontinued if and when the Law no longer applies, or these Requirements are modified to make it possible to comply with both them and the Law simultaneously. An appropriate change in practice, modification to the CA's CPS and a notice to the AuthIndicators Working Group, as outlined above, MUST be made within 90 days.

9.16.4. Enforcement (attorneys' fees and waiver of rights)

No stipulation.

9.16.5. Force Majeure

No stipulation.

9.17. Other provisions

No stipulation.

Appendix A: DNS Contact Properties

These methods allow domain owners to publish contact information in DNS for the purpose of validating domain control.

A.1. CAA Methods

A.1.1. CAA `contactemail` Property

SYNTAX: `contactemail <utf8emailaddress>`

The CAA `contactemail` property takes an email address as its parameter. The entire parameter value MUST be a valid email address as defined in section 3.4 of RFC 5322 and extended by [Section 3.2](#) of RFC 6532, with no additional padding or structure, or it cannot be used.

The following is an example where the holder of the domain specified the contact property using an email address.

```
$ORIGIN example.com.  
  
CAA 0 contactemail "domainowner@example.com"
```

The `contactemail` property MAY be critical, if the domain owner does not want CAs who do not understand it to issue certificates for the domain.

A.1.2. CAA `contactphone` Property

SYNTAX: `contactphone <rfc3966 Global Number>`

The CAA `contactphone` property takes a phone number as its parameter. The entire parameter value MUST be a valid Global Number as defined in RFC 3966 section 5.1.4, or it cannot be used. Global Numbers MUST have a preceding + and a country code and MAY contain visual separators.

The following is an example where the holder of the domain specified the contact property using a phone number.

```
$ORIGIN example.com.  
  
CAA 0 contactphone "+1 (555) 123-4567"
```

The `contactphone` property MAY be critical if the domain owner does not want CAs who do not understand it to issue certificates for the domain.

A.2. DNS TXT Methods

A.2.1. DNS TXT Record Email Contact

The DNS TXT record MUST be placed on the `_validation-contactemail` subdomain of the domain being validated. The entire RDATA value of this TXT record MUST be a valid email address as defined in section 3.4 of RFC 5322 and extended by [Section 3.2](#) of RFC 6532, with no additional padding or structure, or it cannot be used.

A.2.2. DNS TXT Record Phone Contact

The DNS TXT record MUST be placed on the `_validation-contactphone` subdomain of the domain being validated. The entire RDATA value of this TXT record MUST be a valid Global Number as defined in RFC 3966 section 5.1.4, or it cannot be used.

Appendix B: Mapping of Combined, Design, and Word Mark Terminology to Terminology of Authorized Trademark Offices

This table is included as an example of how to map the standards and terminology of the Mark Certificates Requirements to the standards and terminology of sample countries. CAs should generally follow these mapping examples for trademarks issued by other countries.

Country/Region	Combined Mark	Design Mark	Word Mark
United States (US) [1: https://tmep.uspto.gov/RDMS/TMEP/current#/current/TMEP-800d1e2068.html http://www.lo101.com/mdc.html]	Marks comprising words plus a design are coded as Mark Drawing Code 3 - Design Plus Words, Letters, and/or Numbers Marks comprising stylized letters and/or numerals with no design feature are coded as Mark Drawing Code 5	Special Form Drawings. Marks comprising only a design are coded as Mark Drawing Code 2 - Design Only	Standard Character Drawings - Marks comprising words, letters, numbers, or any combination thereof without claim to any particular font style, size, or color are coded as Mark Drawing Code 4 -Standard Character Mark . [Prior to November 2, 2003, typed drawings (see TMEP §807.03(i)) these were coded as Mark Drawing Code 1]
Canada [2: https://trademark.witmart.com/canada/registration]	Composite Mark	Design Mark	Standard Character Trademark

Country/Region	Combined Mark	Design Mark	Word Mark
<p>European Union (EM) [3: https://euipo.europa.eu/ohimportal/en/trade-mark-definition]</p>	<p>Type: Figurative mark containing word elements - A figurative mark consisting of a combination of verbal and figurative elements</p>	<p>Type: Figurative mark - It is a trade mark where non-standard characters, stylisation or layout, or a graphic feature or a colour are used, including marks that consist exclusively of figurative elements</p>	<p>Type: Word mark - A word mark consists exclusively of words or letters, numerals, other standard typographic characters or a combination thereof that can be typed</p>
<p>United Kingdom (GB) [4: https://www.trademarkdirect.co.uk/blog/word-marks-logo-marks]</p>	<p>Logo Mark [5: See https://trademarks.ipo.gov.uk/ipo-tmcase/page/Results/1/UK00002192618] for Burger King combined mark registration in the UK. The search drop down field on the site uses the term “design”. The registration does not appear to call out the words in the combined mark, so MVAs must extract the words to insert in the Section 7.1.4.2.2 (p) Word Mark field.] (Image)</p>	<p>Logo Mark (Image)</p>	<p>Word Mark [6: See https://trademarks.ipo.gov.uk/ipo-tmcase/page/Results/1/UK00001351798 for word mark registration for Burger King. The search drop down field on the site uses the term “word”. The registration does not appear to call out the words in the combined mark, so MVAs must extract the words to insert in the Section 7.1.4.2.2 (p) Word Mark field. Note that UK trademark registration for word marks allows “series” of the same word mark to be listed in a single registration (where words are arranged in different configurations - linear, stacked - but always read the same way to a consumer).]</p>

Country/Region	Combined Mark	Design Mark	Word Mark
<p>Germany (DE) [7: English definition from glossary in: https://www.dpma.de/docs/dpma/veroeffentlichungen/broschueren/200129_bromarken_eng_l_nichtbarr.arm.pdf. English/German mapping is by looking at the "550 Markenform" (German version) of: https://register.dpma.de/register/htdocs/prod/en/hilfe/recherchefelder/marken/index.html and using the language translator tool to map to English. See also section "What is the difference between a word mark and a combined word/figurative mark or figurative mark?" in https://www.dpma.de/english/trade_marks/faq/index.html.]</p>	<p>Combined word and figurative mark (Wort-Bildmarke) - Combined word/figurative marks consist of a combination of word elements and graphical elements, or of words in lettering styles.</p>	<p>Figurative Mark (Bildmarke) - are pictures, graphical elements or images (without words or word elements).</p>	<p>Word Mark (Wortmarke) - are trade marks that consist of words, letters, numbers or other characters that are part of the standard set of characters used by the Deutsches Patent und Markenamt (DPMA).</p>

Appendix C: Authorized Trademark Offices for VMCs

This Appendix is intentionally left blank.

Appendix D: MC Terms of Use (“MC Terms”)

All Mark Asserting Entities (MAEs) are required, as a condition of being issued a Mark Certificate, to agree to these MC Terms. Any and all use, display, or reliance on any Mark Certificate (and any

Mark Representation and any other data or information therein) by Consuming Entities, Relying Parties, and any other person, is subject to and conditional upon acceptance of these MC Terms. The OID 1.3.6.1.4.1.53087.1.1 in the Mark Certificate incorporates by reference these MC Terms. If any person does not agree to these MC Terms, such person may not obtain, use, publish, or rely upon any Mark Certificate or on any Mark Representation or any other data or information in a Mark Certificate.

1. Definitions.

Capitalized words will have meanings set out in [Section 1.6](#) of the Mark Certificate Requirements.

2. Limited Right to Reproduce and Display.

The MAE hereby grants, subject to the terms, conditions and restrictions in the MC Requirements and these MC Terms:

1. to the Issuing CA, a limited, non-exclusive, worldwide license to issue a Mark Certificate that contains the MC Marks and to log said certificate in a limited number of CertificateTransparency Logs as required by the MC Requirements; and
2. to Consuming Entities, a limited, non-exclusive, worldwide license to use the MC Marks in conjunction with internal logo recognition systems, and to host, store, reproduce, display, process, and modify as permitted by section 3.1 the MC Marks only in direct visual association with communications, correspondence, or services authored or provided by the MAE from or through one of the same domains included within the Mark Certificate's Subject Alternative Name field; and
3. to certificate transparency log operators if different from the Issuing CA, a limited, non-exclusive, worldwide license to retain a copy of and to reproduce the Mark Certificate to support a durable public record of those issued certificates, and for the purpose of permitting members of the public to audit the verification of Mark Certificates.

No other license is granted to any other party, or for any other use.

3. License Restrictions and Conditions.

Any Consuming Entity that incorporates or intends to incorporate the MC Marks obtained through an issued and published Mark Certificate into its products and services, agrees that its license to do so is subject to and conditional on the following:

1. Quality Control, Same Treatment.

The Consuming Entity may not distort at display time any Mark Representation obtained from a published Mark Certificate, change its colors or background, modify its transparency, or alter it in any way other than to adjust its size or scale, or to crop it in a manner consistent with cropping performed on other Mark Representations displayed in the same context. If a Consuming Entity displays a Word Mark obtained from a published Mark Certificate, it must do so in a neutral manner applied consistently to all Word Marks from all Mark Certificates that are shown in the same visual context. The Consuming Entity may display a Mark included in a Mark Certificate without also displaying a Word Mark included

in the same Mark Certificate, but the Consuming Entity may not display a Word Mark included in a Mark Certificate without also displaying the Mark included in the same Mark Certificate.

2. No Partnership or Relationships implied.

Subject to an express agreement to the contrary between the Consuming Entity and the MAE, neither the MC Marks nor any other content of the Mark Certificate may be used or displayed in any way that reasonably implies any relationship between the Consuming Entity and the MAE, beyond the bare licensor-licensee relationship created by these MC Terms.

3. CRL or OCSP Checks.

Consuming Entities must check the Certificate Revocation Lists maintained by the CA or perform an on-line revocation status check using OCSP to determine whether a Mark Certificate has been revoked no less frequently than every 7 days.

4. Lawful Use

Consuming Entities may only use the Mark Representation in a Mark Certificate in accordance with applicable law.

5. Sufficient Ownership or License.

The MAE warrants that the MC Marks published via a Mark Certificate represent a Registered Mark (and Word Mark, if any) that the MAE owns or for which the MAE has obtained sufficient license to be able to grant the limited license in these MC Terms, and that it will immediately revoke the Mark Certificate if it no longer owns or has a sufficient license to the applicable Registered Mark (or Word Mark, if any). The MAE will defend and will be liable for any intellectual property or other claims against any Consuming Entity, Relying Party or CA that arise from the content of the MAE's application for a Mark Certificate.

6. No obligation to display.

The MAE acknowledges that Consuming Entities are under no obligation to display the MC Marks in connection with content the MAE publishes that is associated with the domains the MAE owns or controls as a Domain Registrant, even if a communication or message is confirmed to be from the MAE and a suitable MC Mark can be obtained and safely displayed from the applicable Mark Certificate. Instead, Consuming Entities may choose to display the MC Marks in accordance with these MC Terms, or not display them, at their option.

7. Termination.

Immediately upon revocation or expiration of the Mark Certificate, the MAE will cease publishing or using the Mark Certificate, and the license granted to Consuming Entities in Section 2.2 above SHALL terminate. The license to a Consuming Entity in Section 2.2 above also terminates automatically and immediately upon breach of any provision of these MC Terms by the Consuming Entity. Consuming Entities must immediately cease any and all use

of the MC Marks upon termination of the applicable license.

8. Updates to MC Requirements and MC Terms.

The MC Requirements and MC Terms may be updated from time to time. All parties agree that the version of the MC Requirements and MC Terms in effect at the time of issuance of a Mark Certificate SHALL apply through the date of expiration or revocation of the Mark Certificate (and, for those provisions that by their nature extend beyond the date of expiration or revocation, until the provisions no longer would apply by their terms). It is the responsibility of each entity who obtains, uses, publishes or relies upon a Mark Certificate to review and familiarize itself from time to time with any updated versions of the MC Requirements and MC Terms.

Appendix E: Optional Rules for Matching Mark Representation Submitted by Subscriber with Registered Mark Verified by CA

These are optional rules approved by the AuthIndicators which CAs MAY use when matching the Mark Representation submitted by the Subscriber with the Registered Mark verified by the CA.

Trademarks registered in the United States

This Appendix is still being drafted.

Appendix F: CT Logs Approved by AuthIndicators Working Group

Appendix G: Additional F2F Verification Procedure

The Contract Signer or Certificate Approver for the Mark Certificate must perform the F2F Verification Procedure for the Applicant according to the process described in *either* Section 1 or Section 2 below, as selected by the CA at its discretion. If the Contract Signer and Certificate Approver roles are fulfilled by different natural persons, then only one of Contract Signer or Certificate Approver must perform the F2F Verification Procedure. In all cases, the natural person performing the F2F Verification Procedure is referred to as the “Designated Individual” in the procedure defined below.

G.1. Notarization process for document signed by Designated Individual

If this F2F Verification Procedure is selected by the CA, the Designated Individual must perform the Notarization procedure for the Applicant as described below.

1. Receive information from the Designated Individual

The CA will ask the Designated Individual to submit the following information: name, email address, and telephone number for use in the Notarization process described in Sections 2 and 3 below.

2. Conduct Notarization Process

The CA will arrange for a Notary to meet with the Designated Individual. The Notary **MUST NOT** be an employee of the Subscriber or a member of any law firm used by the Subscriber. The Notarization process **MAY** be performed by Remote Notarization, provided that it is conducted in accordance with applicable law in the Notary's jurisdiction. The Designated Individual **MUST** be located in a jurisdiction in which the Notary is permitted to Notarize according to applicable law.

The CA will provide the Notary in advance with a Verification Document for the Designated Individual to sign before the Notary and be Notarized. The notary should be instructed to confirm the Designated Individual's face conforms to the photo on the Designated Individual's photo ID, and that the name of the Designated Individual listed on the photo ID conforms to the Designated Individual name on the Verification Document. The Notary must observe the Designated Individual as he or she signs the Verification Document, then Notarize the Verification Document, The Notary should record any required details of the Notarization process in the Notary's notary journal (or equivalent) as normally required in the jurisdiction for a Notarization. Digital signatures may be used if accepted in the jurisdiction.

The Notary must then either:

1. Send a photo or PDF copy of the Notarized Verification Document to the CA according to the CA's instructions and give the original document to the Designated Individual for his or her files or destruction, or
2. send the original signed Verification Document to the CA. The Notary should not retain a copy of the Verification Document or the Designated Individual's photo ID in the Notary's own files unless required to do so by applicable law or regulation in the jurisdiction, in which case the Notary should treat the document and photo ID as PII to be archived and disposed of in a secure manner and in accordance with any applicable law or regulation.

G.2. Web-based F2F session with Designated Individual

If this F2F Verification Procedure is selected by the CA, the CA or its third party agent will perform a web-based recorded or photographed session with the Designated Individual. This form of validation must include the following basic steps:

1. Receive information from the Designated Individual

The CA will ask the Designated Individual to submit the following information: name, email address, and telephone number for use in the web-based F2F process described in Sections 2 and 3 below.

2. Process for web-based F2F session

The web-based F2F session will include the following steps.

1. The CA or agent initiates a live, recorded video conference with Designated Individual. The recording can either be saved by the CA, or appropriate screen shots of the conference can be saved by the CA instead.
2. The Designated Individual recites on the video conference his or her basic information, including name, address, organization, title, telephone number, ID type (passport national ID, driver's license, etc.), and ID number that will be used during the validation session.
3. The CA or agent asks the Designated Individual to present his or her ID document to the camera, close enough to provide a clear picture of the front, back, and any other pages as may be necessary to read and examine the document and capture it on the video and/or screen shots. The CA or agent is not expected to determine whether or not the ID document is genuine, only to record what was presented. The CA agent may reject the ID document at the CA agent's discretion if appropriate (e.g., expired, name mis-match, photo mis-match).
4. The CA or agent asks the Designated Individual to hold ID in front of his or her face, to turn the document around in that position, and to wave his or her other hand in the space between the ID and the Designated Individual's face. The CA must make reasonable accommodations if necessary in case the Designated Individual has a relevant physical disability. The CA or agent may ask additional questions at his or her discretion.
5. The video conference is completed. The CA or agent then approves or fails the ID verification request based on the procedure and securely archives the recording.

The CA may use a competent third party service provider trusted by the CA to perform this recorded or photographed web-based session with Designated Individual so long as the CA obtains and retains the recorded session and/or screen shots in the validation file.

G.3. PII and Privacy Requirements

G.3.1. MC Designated Individual PII & Privacy Processes

The issuance of a MC requires the issuing CA to validate the following information:

- The applying organization's ownership of their business domain
- The applying organization's ownership of the logo to be used
- The Designated Individual's connection to the organization
- The Designated Individual's identity

Due to the novel nature of validating the identity of the Designated Individual through F2F

verification, which is performed either through a meeting with a notary or equivalent or through a web-based F2F session, additional information that is not typically collected for certificate issuance is required. As such, measures to protect the Designated Individual's personally identifiable information must be exercised.

G.3.2. Initial Designated Individual Guidance for Notarization process

1. **Before** an applicant begins the Notarization process, each CA should:
 - Set expectations and prepare the Designated Individual by providing a shortlist of items needed for and a brief explanation of the Notarization process and required personal documents and information:
 - Description of the Notarization process that will be followed and PII details to be collected, including types of government-issued ID that will be accepted.
 - Provide links to the CA's official privacy policies
2. **During** the Notarization process, each CA must ensure:
 - Designated Individual PII is collected via **secure portal or safe file share site**. Such PII also includes information associated with typical account setup such as name, title, phone, and email address of the Designated Individual.

CA PII Retention Transparency Guidance

- Where PII is collected, the CA must include links to or information about the following:
 - Summary of the collection, use, storage, and destruction of information as it applies to the application and process; point to relevant standards
 - Explanation and reasoning for collection of required information by the CA (and, if applicable, by the notary)
 - Context as to the relative normalcy of this (e.g. for standard notarization process, SSL certs or home loans etc.)
 - Include CA's official privacy policies
3. Guidance on PII sent to Notary
 - For the in-person meeting the Designated Individual should provide only the below fields to the CA. The collection of additional, personally identifiable information is not required or recommended.
 - Name
 - Email address
 - Meeting location, date, time
 - Cell phone number (*for the purposes of coordinating the meeting between the Designated Individual and notary*)
 4. Guidance on Designated Individual PII Treatment by Notary
 - The Notary must maintain limited Designated Individual PII, as noted in the required fields of Item 3, including data entries in a Notary Journal that the Notary must retain by law or practice (or similar record that a Latin Notary, lawyer, or solicitor must retain).

- The CA should provide the Designated Individual with information about the in-person meeting and document(s) that will be presented for signature(s).
 - The CA should provide the Designated Individual the lifecycle details of the signed documents or PII retained by the Notary.

Initial Designated Individual Guidance for web-based F2F session process

CAs must follow their own PII and privacy protection requirements for all web-based F2F session process they conduct, and follow all applicable laws.

If a CA uses an external service provider to conduct web-based F2F sessions, the CA must first conduct due diligence about the service provider, and confirm that the service provider has PII and privacy protection requirements for all web-based F2F session process they conduct, and follow all applicable laws.

1. **Before** an applicant begins the web-based F2F session process, each CA should:

- Set expectations and prepare the Designated Individual by providing a shortlist of items needed for and a brief explanation of the web-based F2F session process and required personal documents and information:
 - Description of the web-based F2F session process that will be followed and PII details to be collected, including types of government-issued ID that will be accepted.
- Provide links to the CA's official privacy policies

2. **During** the web-based F2F session process, each CA must ensure:

- Designated Individual PII is collected via **secure portal or safe file share site**. Such PII also includes information associated with typical account setup such as name, title, phone, and email address of the Designated Individual.

CA PII Retention Transparency Guidance

- Where PII is collected, the CA must include links to or information about the following:
 - Summary of the collection, use, storage, and destruction of information as it applies to the application and process; point to relevant standards
 - Explanation and reasoning for collection of required information by the CA (and, if applicable, by the web-based F2F session)
- Include CA's official privacy policies

Appendix H: Country-Specific Interpretative Guidelines (Normative)

NOTE: This appendix provides alternative interpretations of the MC Requirements for countries that have a language, cultural, technical, or legal reason for deviating from a strict interpretation of these Requirements. More specific information for particular countries may be added to this appendix in the future.

H.1. Organization Names

H.1.1. Non-Latin Organization Name

Where a Mark Applicant's organization name is not registered with a QGIS in *Latin* characters and the Applicant's foreign character organization name and registration have been verified with a QGIS in accordance with these Requirements, a CA MAY include a Latin character organization name in the Mark Certificate. In such a case, the CA MUST follow the procedures laid down in this section.

H.1.2. Romanized Names

In order to include a transliteration/Romanization of the registered name, the Romanization MUST be verified by the CA using a system officially recognized by the Government in the Applicant's Jurisdiction of Incorporation.

If the CA can not rely on a transliteration/Romanization of the registered name using a system officially recognized by the Government in the Applicant's Jurisdiction of Incorporation, then it MUST rely on one of the options below, in order of preference:

1. A system recognized by the International Organization for Standardization (ISO);
2. A system recognized by the United Nations; or
3. A Lawyer's Opinion or Accountant's Letter confirming the proper Romanization of the registered name.

H.1.3. Translated Name

In order to include a Latin character name in the Verified Mark certificate that is not a direct Romanization of the registered name (e.g. an English Name) the CA MUST verify that the Latin character name is:

1. Included in the Articles of Incorporation (or equivalent document) filed as part of the organization registration; or
2. Recognized by a QTIS in the Applicant's Jurisdiction of Incorporation as the Applicant's recognized name for tax filings; or
3. Confirmed with a QIIS to be the name associated with the registered organization; or
4. Confirmed by a Verified Legal Opinion or Accountant's Letter to be a translated trading name associated with the registered organization.

H.2. Country-Specific Procedures

H.2.1. Japan

As interpretation of the procedures set out above:

1. Organization Names

- a. The Revised Hepburn method of Romanization, as well as Kunrei-shiki and Nihon-shiki methods described in ISO 3602, are acceptable for Japanese Romanizations.
- b. The CA MAY verify the Romanized transliteration, language translation (e.g. English name), or other recognized Roman-letter substitute of the Applicant's formal legal name with either a QIIS, Verified Legal Opinion, or Verified Accountant Letter.
- c. The CA MAY use the Financial Services Agency to verify a Romanized, translated, or other recognized Roman-letter substitute name. When used, the CA MUST verify that the translated English is recorded in the audited Financial Statements.
- d. When relying on Articles of Incorporation to verify a Romanized, translated, or other recognized Roman-letter substitute name, the Articles of Incorporation MUST be accompanied either: by a document, signed with the original Japanese Corporate Stamp, that proves that the Articles of Incorporation are authentic and current, or by a Verified Legal Opinion or a Verified Accountant Letter. The CA MUST verify the authenticity of the Corporate Stamp.
- e. A Romanized, translated, or other recognized Roman-lettered substitute name confirmed in accordance with this Appendix H-1 stored in the ROBINS database operated by JIPDEC MAY be relied upon by a CA for determining the allowed organization name during any issuance or renewal process of an Mark Certificate without the need to re-perform the above procedures.

2. Accounting Practitioner

In Japan:

- a. Accounting Practitioner includes either a certified public accountant (公認会計士 - Konin-kaikei-shi) or a licensed tax accountant (税理士 - Zei-ri-shi).
- b. The CA MUST verify the professional status of the Accounting Practitioner through direct contact with the relevant local member association that is affiliated with either the Japanese Institute of Certified Public Accountants <http://www.hp.jicpa.or.jp>, the Japan Federation of Certified Tax Accountant's Associations <http://www.nichizeiren.or.jp/>, or any other authoritative source recognized by the Japanese Ministry of Finance <http://www.mof.go.jp/> as providing the current registration status of such professionals.

3. Legal Practitioner

In Japan:

- a. Legal Practitioner includes any of the following:
 - i. a licensed lawyer (弁護士 - Ben-go-shi),
 - ii. a judicial scrivener (司法書士 - Shiho-sho-shi lawyer), an administrative solicitor (行政書士 - Gyosei-sho-shi Lawyer), or a notary public (公証人 - Ko-sho-nin).

For purposes of these Requirements, a Japanese Notary Public is considered equivalent to a Latin Notary.

- a. The CA MUST verify the professional status of the Legal Practitioner by direct contact through the relevant local member association that is affiliated with one of the following national associations:

- i. the Japan Federation of Bar Associations <http://www.nichibenren.or.jp/>,
- ii. the Japan Federation of Shiho-Shoshi Lawyer's Associations <http://www.shiho-shoshi.or.jp/>,
- iii. the Japan Federation of Administrative Solicitors <http://www.gyosei.or.jp/>,
- iv. the Japan National Notaries Association <http://www.koshonin.gr.jp/>, or
- v. any other authoritative source recognized by the Japanese Ministry of Justice <http://www.moj.go.jp/> as providing the current registration status of such professionals.

Appendix I: Abstract Syntax Notation One module for EV certificates

The definition of these attributes is identical to those included in EV Certificates and are included in Mark Certificates.

Appendix J: Registration Schemes

The following Registration Schemes are currently recognized as valid under these Requirements:

NTR: The information carried in this field SHALL be the same as held in Subject Serial Number Field as specified in [Section 7.1.4.2.2 \(k\)](#) and the country code used in the Registration Scheme identifier SHALL match that of the subject's jurisdiction as specified in [Section 7.1.4.2.2 \(j\)](#).

Where the Subject Jurisdiction of Incorporation or Registration Field in [Section 7.1.4.2.2 \(j\)](#) includes more than the country code, the additional locality information SHALL be included as specified in [Section 7.1.4.2.2 \(j\)](#).

VAT: Reference allocated by the national tax authorities to a Legal Entity. This information SHALL be validated using information provided by the national tax authority against the organization as identified by the Subject Organization Name Field (see [Section 7.1.4.2.2 \(b\)](#)) and Subject Serial Number Field (see [Section 7.1.4.2.2 \(k\)](#)) within the context of the subject's jurisdiction as specified in [Section 7.1.4.2.2 \(j\)](#).

PSD: Authorization number as specified in ETSI TS 119 495 clause 4.4 allocated to a payment service provider and containing the information as specified in ETSI TS 119 495 clause 5.2.1. This information SHALL be obtained directly from the national competent authority register for payment services or from an information source approved by a government agency, regulatory body, or legislation for this purpose. This information SHALL be validated by being matched directly or indirectly (for example, by matching a globally unique registration number) against the organization as identified by the Subject Organization Name Field (see [Section 7.1.4.2.2 \(b\)](#)) and

Subject Serial Number Field (see [Section 7.1.4.2.2 \(k\)](#)) within the context of the subject's jurisdiction as specified in [Section 7.1.4.2.2 \(j\)](#). The stated address of the organization combined with the organization name SHALL NOT be the only information used to disambiguate the organization.
