Republic of Cyprus

1. COUNTRY HIGHLIGHTS

Respondents in Cyprus are now more likely to say that climate change is a “very serious” problem than in 2013 (76%, +5 points since 2013), while just over one in ten identify climate change as the most serious problem facing the world (11%).

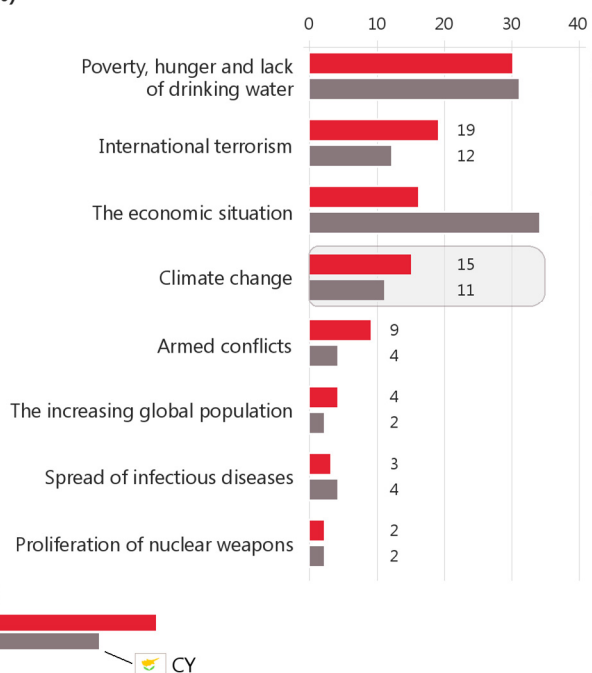

They are less likely than in 2013 to say that they have taken personal action to fight climate change in the past six months (48%, -6 points). However, when presented with a list of specific measures, a much higher level of action is actually revealed (92%). This includes:

- Trying to reduce and regularly separate waste (78%, +22 percentage points since 2013)
- Buying locally produced food whenever possible (48%, +27 percentage points since 2013)
- Trying to cut down consumption of disposable items (37%, +22 percentage points since 2013)

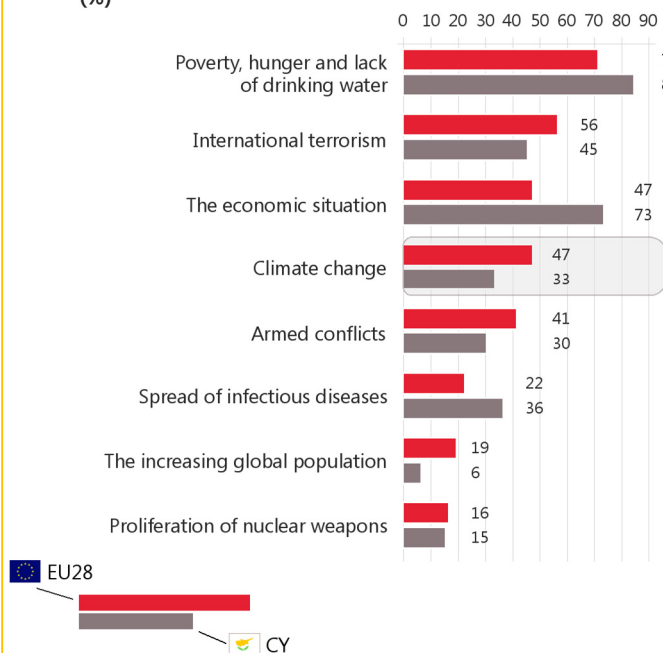

Some 81% “totally agree” that fighting climate change will only be effective if all countries of the world act together, the highest score in the EU. A large majority think it is “very important” for the national government to set targets to increase the use of renewable energy (83%, well above the EU average of 52%) and provide support for improving energy efficiency by 2030 (82%, compared to the EU average of 52%).

2. EUROPEAN PERCEPTIONS OF CLIMATE CHANGE 1/2

QA1a Which of the following do you consider to be the single most serious problem facing the world as a whole? (%)

QA1T Which of the following do you consider to be the single most serious problem facing the world as a whole? Which others do you consider to be serious problems? (MAX. 4 ANSWERS) (%)

3. EUROPEAN PERCEPTIONS OF CLIMATE CHANGE 2/2

QA2 And how serious a problem do you think climate change is at this moment? Please use a scale from 1 to 10, with '1' meaning it is "not at all a serious problem" and '10' meaning it is "an extremely serious problem".

(%)

- Total 'Not a serious problem' (1-4)
- Total 'A fairly serious problem' (5-6)
- Total 'A very serious problem' (7-10)
- Don't know
