

Advanced Networking - Specialty

AWS Certified Advanced Networking - Specialty (AN-S) is intended for candidates who perform complex networking tasks and have five years of hands-on experience architecting and implementing network solutions. This certification would benefit professionals such as solutions architects, network architects, network engineers, and devops engineers.

Earning this certification shows:

- Ability to design and develop hybrid and cloud-based networking solutions using AWS
- Knowledge and skills to implement core AWS services according to basic architecture best practices
- Ability to operate and maintain hybrid and cloud-based network architecture for all AWS services
- Ability to use tools to deploy and automate hybrid and cloud-based AWS networking tasks
- Skills to implement secure AWS networks using AWS native networking constructs and services

AWS preparation resources:

- AWS Training for advanced networking
- AWS Exam Readiness Training
- Whitepapers and technical documentation
- Sample questions

Get the official exam guide and sample questions on our website. When you're ready, you can take the exam from home or at a testing center.
