

### August 1, 2024

The Water and Science Administration has received the applications listed below. A preliminary review has indicated that the listed projects may be subject to the opportunity for a public hearing once the application is substantially complete. Projects may be significantly altered during the review process. The applications and related information are available for inspection and copying. You may also request written notice of any hearing opportunity by having your name placed on the interested persons list for each project in which you are interested. To inspect the file or to have your name placed on the interested persons list, contact the assigned division at the telephone number indicated below no later than Saturday, August 31, 2024.

#### Water Supply Program - (410) 537-3590

<b>County: Baltimore City</b>
BC2024G003/01: Baltimore Gas & Electric Company has applied to appropriate and use an annual average of 21,500 gallons of groundwater per day (gpd) and 88,000 gpd in the month of maximum use to facilitate the construction of a new substation. The water will be withdrawn from 66 well points in the Potomac Group. The project is located at 2105 Gould Street, Baltimore City, Maryland.
BC2024G004/02: Baltimore Gas & Electric Company has applied to appropriate and use an annual average of 22,250 gallons of groundwater per day (gpd) and a daily average of 67,700 gpd during the month of maximum use. Water will be withdrawn from the Quaternary System sediments to lower the water table and facilitate the repair of a leaking gas pipe. The project is located at 901 South Carey Street, Baltimore City, Maryland.
<b>County: Carroll</b>
CL1992G049/04: Town of New Windsor has applied to increase an existing appropriation from annual average of 53,000 gallons of groundwater per day (gpd) to an annual average of 196,000 gpd and from 80,000 gpd to 282,000 gpd during the month of maximum use. Water will be withdrawn from three wells in the Sams Creek Phylite Formation and used for a municipal water supply for the Town of New Windsor. The project is located 0.1 mile southeast of Lambert Avenue, 150 feet past 404 Hillside Drive and on the south side of Kaylan Court, New Windsor, Carroll County, Maryland.
CL2024G003/01: Town of New Windsor has applied to appropriate and use an annual average of 196,000 gallons of groundwater per day (gpd) and an average of 282,000 gpd in the month of maximum use. Water will be withdrawn from two wells in the Sams Creek Phylite Formation and used for a municipal water supply for the Town of New Windsor. The project is located at 1000 Green Valley Road, New Windsor, Carroll County, Maryland.
<b>County: Frederick</b>
FR2024S002/01: Lochland AG & Turf LLC has applied to appropriate and use an annual average of 139,500 gallons of surface water per day (gpd) and a daily maximum of 576,000 gallons. The water will be withdrawn from Israel Creek and used for sod irrigation. The project is located at 8901 Crum Road, Walkersville, Frederick County, Maryland
<b>County: Queen Annes</b>
QA2024G003/01: John A. Moritz has applied to appropriate and use an annual average of 97,100 gallons of groundwater per day (gpd) and a daily average of 590,800 gpd during the month of maximum use. Water will be withdrawn from two wells in the Aquia aquifer for crop irrigation. The project is located at the southwest corner of High Bridge Road and Sudlersville Cemetery Road, Millington, Queen Anne's County, Maryland.
<b>County: Somerset</b>
SO2024G001/01: Somerset County Solid Waste Department has applied to appropriate and use an annual average of 420,000 gallons of groundwater per day (gpd) and a daily average of 750,000 gallons during the month of maximum use. Water will be withdrawn from a borrow pit in the unconfined Pocomoke aquifer to lower the water level in the aquifer to facilitate the extraction of material from the mine. The project is located at 29952 Revells Neck Road, Westover, Somerset County, Maryland.
