

September 1, 2024

The Water and Science Administration has received the applications listed below. A preliminary review has indicated that the listed projects may be subject to the opportunity for a public hearing once the application is substantially complete. Projects may be significantly altered during the review process. The applications and related information are available for inspection and copying. You may also request written notice of any hearing opportunity by having your name placed on the interested persons list for each project in which you are interested. To inspect the file or to have your name placed on the interested persons list, contact the assigned division at the telephone number indicated below no later than Monday, September 30, 2024.

Water Supply Program - (410) 537-3590

County: Anne Arundel

AA2006S023/04: Gibson Island Corporation has applied to increase an existing appropriation from an annual average of 10,000 gallons of surface water per day (gpd) and an average of 40,000 gpd during the month of maximum use to 32,876 gpd and 80,000 gpd, respectively. Water is used for golf course irrigation. Water will be withdrawn from Otter Pond. The project is located at 1627 St Giles Road, Gibson Island, Anne Arundel County, Maryland.

County: Baltimore City

BC2023G001/03: Skanska USA Inc. has applied to increase an existing appropriation from an annual average of 432,000 gallons of water per day (gpd) and an average of 475,000 gpd in the month of maximum use to 864,000 gpd and 950,000 gpd, respectively. The water will be withdrawn from multiple wells in the Potomac Group to facilitate the construction of the tunnel deepening project. The project is located inside the Howard Street Tunnel and between the Howard Street Tunnel East Portal and the North Avenue Bridge, Baltimore City, Maryland

County: Caroline

CO2024G005/01: Wood Family Farms, LLC has applied to appropriate and use an annual average of 119,000 gallons of groundwater per day (gpd) and an average of 725,000 gpd during the month of maximum use for crop irrigation. Water will be withdrawn from four wells in the Columbia aquifer. The project is located at 8980 New Bridge Road, Denton, Caroline County, Maryland.

CO2024G006/01: David William Rogers has applied to appropriate and use an annual average of 48,000 gallons of groundwater per day (gpd) and a maximum monthly use of 295,000 gpd from one well in the Columbia aquifer for crop irrigation. The project is located at 23758 Wilkins Branch Rd, Preston, Caroline County, Maryland.

County: Frederick

FR2024G003/01: Bloomfields, LLC has applied to appropriate and use an annual average of 49,500 gallons of groundwater per day (gpd) and an average of 100,000 gpd in the month of maximum use. The water will be withdrawn from a sump excavated in the Frederick Limestone to facilitate the construction of a sanitary sewer pump station to serve the new Bloomfields subdivision. The project is located at 2500 Mayapple Lane, City of Frederick, Frederick County, Maryland.

County: Kent

KE2023G002/01: John A. Moritz has applied to appropriate and use an annual average of 188,000 gallons of groundwater per day (gpd) and an average of 1,141,000 (gpd) during the month of maximum use for crop irrigation. Water will be withdrawn from two wells in the Aquia aquifer. The project is located 34351 Cypress Road, Millington, Kent County, Maryland.

County: Wicomico

WI1990G004/03: Wilson Lee Farms, LLC has applied to increase an existing appropriation from an annual average of 3,800 gallons of groundwater per day (gpd) and an average of 23,000 gpd in the month of maximum use to an annual average of 40,000 gpd and 240,000 gpd in the maximum month. Water will be withdrawn from one well in the Columbia aquifer and used for crop irrigation. The project is located at 7175 Levin Dashiell Road, Salisbury, Wicomico County, Maryland.

WI2001G016/05: The Village at Tony Tank Creek Homeowners Association, Inc. has applied to increase an existing appropriation from an annual average of 10,000 gallons of groundwater per day (gpd) and an average of 45,000 gpd in the month of maximum use to an annual average of 30,000 gpd and 103,000 gpd in the maximum month. Water is withdrawn from eight wells in the Columbia aquifer and used for lawn irrigation. The project is located on the west side of the intersection of Village Oak Drive and South Division Street, Salisbury, Wicomico County, Maryland.
