

CONNECTED PAPERS (<https://www.connectedpapers.com/>)

Opis

Connected papers (CP) je AI pripomoček, ki išče podobne članke in jih predstavi vizualno v obliki grafa. Uporaba AI metod v CP olajšuje raziskovalni proces, saj omogoča raziskovalcem globlje razumevanje literature in povezav med članki ter gradnjo znanja o nekem področju, hitro vizualno pregledovanje člankov, prepoznavanje ključnih člankov in avtorjev ter prepoznavanje trendov v razvoju določenega področja raziskav. Raziskovalci lahko prilagajajo vizualni prikaz in raziskujejo povezave med članki, shranjujejo reference, dostopajo do izvlečkov in celo do polnih besedil člankov, če so ta na voljo.

Bazi, iz katerih sistem zajema podatke, sta prosto dostopna biomedicinska baza PubMed in 230 milijonov velika baza znanstvenih člankov iz vseh področij znanosti, ki jo gradi Allen Institute for Artificial Intelligence za svoj AI sistem za iskanje znanstvene literature Semantic Scholar. Ker CP zajema podatke tudi iz baze PubMed, je relevantno orodje za raziskovalce s področja javnega zdravja.

Iskanje člankov

CP omogoča iskanje člankov po ključnih besedah, nato pa moramo izbrati enega od ponujenih člankov.

Sexual activity and satisfaction in older adults from a Brazilian cohort study
 Alejandra Andrea Roman Lay, Y. A. de Oliveira Duarte, L. Duarte, Ana Luiza Vilela Borges
 Aging & Mental Health 2022.
 1 Citations, 39 References

Abstract Objectives: Although the majority of older adults experience sexual satisfaction regardless of their sexual activity, there are few studies that address sexuality in aging, especially in Latin America. The objective of this study was to assess the prevalence of sexual activity and satisfacti... [Show more](#)

S2 TL;DR: Having a partner was the most important positive predictor of sexual activity and sexual satisfaction in all subgroups except Portuguese men, and Portuguese men and Danish women reported being most sexually satisfied.

Vizualni prikaz podobnih člankov v obliki grafa

Za izdelavo vsakega grafa CP analizira približno 50.000 člankov in izbere nekaj deset člankov, ki imajo največjo podobnost glede na začetni članek. Članki so v prostoru predstavljeni v obliki grafa glede na njihovo podobnost; v grafu so lahko blizu eden drugemu tudi članki, ki se medsebojno ne citirajo. Analiza torej ne temelji le na citiranju (kot pri citatnih indeksih WoS in Scopus), dodana je tudi analiza jezikovne podobnosti. CP uporablja AI metode za obdelavo velikih količin podatkov in prepoznavanje jezikovnih vzorcev.

Bolj podobni članki so v grafu (prostor podobnosti) pozicionirani bližje eden drugemu, manj podobni pa dlje; povezave predstavljajo najkrajšo pot od začetnega članka do podobnega članka. Velikost pik je sorazmerna s količino citatov (članki z veliko citatov so označeni z večjimi pikami). Temnejša barva pik označuje sveže članke, svetlejša pa starejše članke. Starejši članki imajo običajno več citatov. Na pike lahko klikamo in graf raziskujemo ter gradimo nove grafe.

Na levi je seznam podobnih člankov, ki si sledijo glede na stopnjo podobnosti. Na desni pa so podatki o označenem članku s povezavami do članka.

ABSTRACT Objectives: the aim of the paper is to provide an overview of the literature published 2005-2015 on sexual satisfaction and body image in older adults. Method: A narrative literature search using the PsycINFO database was conducted. Results: Although women in general seem less satisfied with their bodies than men, particularly in sexual contexts, older women appear to be less vulnerable to body-related dissatisfaction than

Pregledamo lahko še predhodna dela (Prior works) in nadaljnja ali izpeljana dela (Derivative works), pri čemer se uporabljajo podatki o citiranju.

Prior works

Predhodna dela (**Prior works**) so članki, ki jih vsi članki iz grafa citirajo in si sledijo glede na pogostost citiranja. Običajno gre za **pomembna izhodiščna dela za vaše področje**, zato je dobro, da ta dela poznate.

Če v seznamu podobnih člankov na levi označite en članek (obarva se sivo), se vam na sredini tabele z modro obarvajo vsi predhodni članki, ki jih je ta članek citiral.

Prior works
These are papers that were most commonly cited by the papers in the graph.
This usually means that they are **important seminal works** for this field and it could be a good idea to get familiar with them.
Selecting a prior work will highlight all graph papers referencing it, and selecting a graph paper will highlight all referenced prior work.

ABSTRACT Objectives: The aim of the current article was to provide an overview of literature on sexual function and sexual difficulties in older adults. Method: The authors conducted a narrative review of papers published in English between January 2005 and July 2015 based on an extensive search in PsycINFO. Results: The review showed that although common biological changes may adversely affect sexual function in old age, sexual experience seems to be less affected by biological changes.

Če pa označite en predhodni članek, se vam na desni z modro obarvajo vsi članki, ki so citirali ta predhodni članek.

Open in: PDF, HTML, etc.
Open graph + Add origin
BACKGROUND Despite the aging of the population, little is known about the sexual behaviors and sexual function of older people. METHODS We report the prevalence of sexual activity, behaviors, and problems in a national probability sample of 3005 U.S. adults (1550 women and 1455 men) 57 to 85 years of age, and we describe the association of these variables with age and health status. RESULTS The unweighted survey response rate for this

Derivative works

Nadaljnja ali izpeljana dela (**Derivative works**) so članki, ki citirajo številne članke iz grafa. Običajno to pomeni, da so bodisi **pregledni članki iz vašega področja** ali **pa sveži relevantni članki**, ki so jih navdihnili številni članki iz grafa.

Če v seznamu nadaljnjih člankov označite en članek (obarva se sivo), se vam na levi strani z modro obarvajo vsi članki iz grafa, ki jih je ta članek citiral.

The screenshot shows the 'Derivative works' section of the Connected Papers interface. The main title is 'Sexual Activity and Sexual Satisfaction Among Older Adults in Four European Countries'. The 'Derivative works' section explains that these are papers that cited many of the papers in the graph, typically surveys or recent relevant works. It notes that selecting a derived work highlights all graph papers it cites, and vice versa. A table lists the following derivative works:
