

SureStrike™

Laser Training

LASER AMMO
TRAINING TECHNOLOGIES

Use the patented SureStrike™ Laser Cartridge to train with your own firearm at any location.

SureStrike™ Laser Cartridge is easily inserted into the chamber, and will emit an eye-safe laser pulse, a "shot" of red or IR light, every time the trigger is pulled!

SureStrike™ acts to prevent the accidental loading of a live bullet and with no need to take apart your firearms, and acts as a snap cap to protecting the rifle firing pin.. You benefit from the full range of dry-fire drills while getting immediate feedback on your performance.

Train with your rifle on Laser Ammo LaserPET II electronic target for best in class marksmanship and speed drills.

User Guide

Unload the weapon.

Physically and visually inspect the chamber, bore, and magazine well to ensure that all ammunition has been removed.

Unload ammunition from any magazines that will be used in training.
Store ammunition in an area that is separate from your training area.

Always personally verify that all ammunition has been removed before training.
Do not allow any live ammunition in the training area.

Warning – firearms can cause serious injuries or death.

Unscrew the laser cartridge and insert the battery pack according to the picture (flat side facing up). Reassemble the laser cartridge carefully. Verify the threading is fully closed and that there is no gap.

For a .223/ 5.56 caliber: Attached the barrel adapter to the front of the cartridge. For all other calibers use the 9mm cap without the barrel adapter.

Using the SureStrike™ laser with caliber adapters:

Insert the SureStrike™ cartridge into the bigger opening of the adapter sleeve

Thread tightly the front part of the adapter into the front of the SureStrike™ laser cartridge.

(*) it is recommended to lightly oil the o rings from time to time.

Retract the bolt and engage the bolt stop in the open position. Make sure the bolt is held firmly by the stop.

Do not continue if the bolt is not held firmly or the bolt stop is not in good working order.

While pointing the barrel down, insert the laser cartridge into the firearm by "dropping" it, barrel adapter first, through receiver (breach) opening into the chamber.

Still pointing down, release the bolt stop. Point the weapon at a safe backstop and pull the trigger to verify that the unit is properly installed and functioning.

Disassembly: Retract the bolt and engage the bolt stop in the open position. Insert a cleaning rod, flat side first, into the barrel and push the Laser Cartridge gently out.

Remove battery when laser cartridge is not in use.

Using the SureStrike™ Laser Cartridge not according to the user guide will void the warranty.

No liability is expressed or implied for damage or injury as a result of installation or use of this product. Warranty is limited to the replacement or repair of the original product only.
