# Simple Setup with Echo Device

Check "LINK TO YOUR ALEXA" at Checkout.

STEP 1

- Make sure to first set up your Echo device.

STEP 2

- Power on your Tapo light bulb and get close to echo. Go to Step 3 if your Echo or Alexa app notifies "First light found."
- Otherwise, refer to the reverse side for troubleshooting guide.

STEP 3

- Once you've completed setup, you can use your Tapo light bulb with Alexa. Just say "Alexa, set first light to blue."

Alexa!

Troubleshooting Guide

Follow the steps below to manually set up your Tapo light bulb and enable Alexa voice control.

1 **Manual Bulb Setup via The Tapo App**

Open the Tapo app and tap the + icon to start the manual setup process.

2 **Linking Tapo to Alexa**

On your Tapo app, go to **Me** > **Third-Party Services**, select **Amazon Alexa**, and follow the app guidance to complete the connection.
