Implementation Framework and (ii) copies of any templates recording the views of the Board of Regulators and ACER on the Decision and mFRR Implementation Framework prior to their adoption, and provide the Appellants with the right to make observations on the outcome of such disclosures.

## Pleas in law and main arguments

The contested decision was adopted on 24 January 2020

The Appellant contests the Agency's decision. The Appellant's claims and arguments can be summarised as follows:

1. *First plea:* Infringement by ACER of Article 6(10), Regulation (EU) 2019/942 of the European Parliament and of the Council of 5 June 2019 establishing a European Union Agency for the Cooperation of Energy Regulators ("ACER Regulation") in acting outside of its competence by extending its decision-making powers to revision of aspects of the mFRR proposal on which the national regulatory authorities ("NRAs") were agreed, namely the designation of an entity under Article 12, mFRR Implementation Framework.
2. *Second plea:* Infringement by ACER of Article 5(7), Commission Regulation (EU) 2017/2195 of 23 November 2017 establishing a guideline on electricity balancing ("Electricity Balancing Guidelines") in the same context as under the first plea.
3. *Third plea:* Infringement by ACER of Articles 10 and 20(5), Electricity Balancing Guidelines by exceeding its competence in obliging the TSOs to submit a proposal for amendment of the mFRR Implementation Framework.
4. *Fourth plea:* Infringement by ACER of Article 20, Electricity Balancing Guidelines in its decision to impose a single entity structure on the TSOs, contrary to the terms of that Article.
5. *Fifth plea:* Infringement by ACER of Article 16, Charter of Fundamental Rights of the EU (the "Charter") (freedom to conduct a business) by requiring a single entity for all platform functions despite the TSOs' ability to fulfil the requirements of the Electricity Balancing Guidelines outside of a single entity structure.
6. *Sixth plea:* Infringement by ACER of the principle of proportionality through the imposition of a single entity structure on the TSOs which is not justified by the scope and purpose of the Electricity Balancing Guidelines, and which infringes the right of the TSOs to pursue an economic activity.
