

## BMW ENTERTAINMENT. WAITING MADE FUN.

The Entertainment package brings together video streaming and in-vehicle gaming systems in your BMW equipped with Operating System 8.5 which you may enjoy while your BMW is stationary. The video streaming makes waiting times more enjoyable with content from the worlds of news, sport, movies, children's programs and documentaries. If you're in the mood for some in-vehicle fun, AirConsole turns your infotainment system into a gaming console, using smartphones as controllers to transform your driving breaks into exciting gaming experiences.

To activate your Entertainment package, on eligible vehicles visit the ConnectDrive Store in the vehicle or at My BMW Garage ([mygarage.bmwusa.com](http://mygarage.bmwusa.com)). Once activated your BMW will automatically install the feature, and you can start enjoying video and AirConsole games.

## KEY FEATURES

The advantages of BMW's Entertainment package include:

- Single and multi-player casual games for up to seven people
- The content is continuously being expanded with new games and videos
- Large selection of video streaming services

## FREQUENTLY ASKED QUESTIONS.

### 1. What is included in the Entertainment package?

The Entertainment package brings together two entertainment systems you may enjoy when your vehicle is stationary. The video streaming makes waiting times feel shorter with the content from the worlds of news, sport, movies, children's programs and documentaries. AirConsole gaming uses smartphones as controllers and transforms driving breaks into games experiences.

### 2. How do I know if my vehicle is capable of Entertainment package?

The Entertainment package is available for vehicles equipped with Operating System 8.5, either from the factory or via a Remote Software Upgrade. To learn more about which vehicles are capable of being upgraded from Operating System 8 to Operating System 8.5, visit [faq.bmwusa.com](http://faq.bmwusa.com) and search for Operating System 8.5.

### 3. What is AirConsole? What games are included?

AirConsole is a gaming platform that offers a large, versatile selection of games. The mobile phone acts as a controller, and the game can be shown on your BMW display screen. The connection between the smartphone and the vehicle can be established within seconds by scanning a QR code on the BMW display. Alternatively, the code shown on the BMW display can be entered in the smartphone's browser at [Airconsole.com](http://Airconsole.com). Players can then select one of the available games and start playing immediately. The portfolio is continuously evolving, offering a diverse range of genres—racing, sports, trivia, arcade, and more—with titles such as UNO® Car Party!, AirConsole is included as part of the Entertainment package, which is available for vehicles with BMW Operating System 8.5, or as part of BMW Digital Premium for vehicles with BMW Operating System 9.

### 4. What is Video App and what services are available within the app?

With the Video App, the driver and front passenger are able to view a wide variety of video streaming offerings (powered by Xperi TiVo) on the control display while the car is stationary. This means customers can enjoy a continuously growing selection of video content, such as news, live and on-demand streaming of films and series, for example. The video streaming platform's portfolio will be constantly expanded and rolled out gradually.
