Chair's Report

I am pleased to present the 2021 Annual Report of the Western Australian Local Government Grants Commission.

The Grants Commission is a statutory body established under the *Local Government Grants Act 1978*. Its principal function is to make recommendations to the Minister for Local Government regarding the allocation of Commonwealth financial assistance grants to WA's 137 local governments.

Over the past 12 months, the Commission visited 32 local governments and I would like to thank them all for their willingness to engage in public hearings regarding the grant methodology, which determines the amount of funding allocated to each individual local government. I would also like to express my gratitude for the understanding and flexibility shown by local governments when public hearings were required to be rescheduled at short notice during February and April when the Perth and Peel region went into a lockdown due to COVID-19. We appreciate local governments cooperation during these times.

The Commission welcomed the open discussions and willingness of local governments to host the Commission over the last year. A key component of the hearings is to allow the Commission an opportunity to provide a detailed explanation on the grant methodology and the funding allocations for each local government. The Commission also benefits from building a stronger understanding of individual local government's issues, strengths and weaknesses at a local and regional level through discussions held at the hearings. These discussions help shape the grant methodology each year.

While in the current climate, many meetings are shifting to a virtual format, I strongly believe there are significant benefits in having the opportunity to meet local governments in their own environment. In the past 12 months, the Commission has used the regional visiting program to undertake informal inspections, by visiting outlying towns to understand the type of facilities supported in these areas to inform its population dispersion cost adjustor.

The Commission began a full review of the Financial Assistance Grants methodology in 2020-21 and will continue this review into the 2021-22 year. This review entails reviewing the cost adjustors, and the expenditure and revenue standards. I am grateful for the significant feedback received from local governments through a voluntary survey and the annual information return. This information will be put to good use to inform the reviews with a number of data sources provided by local governments already being examined. If any local governments have additional feedback they are strongly encouraged to provide this to the staff.

The Commission approved and submitted its Financial Assistance Grant recommendations to the State and Commonwealth Ministers at the end of July 2021. These were approved with local governments receiving their first quarter payments on 17 August 2021.

I would like to thank all the Commissioners for their continued dedication to their roles over the past 12 months. Sadly, with the end of this reporting period we will be losing a significant amount of experience with the departures of Cr Ian West and Cr Deb Hamblin. Both contributed strongly to numerous reviews and discussions we partake in each year as part of allocating funds to local governments. The local government experience, dedication and professionalism both brought to their roles on the Commission will be missed. I would also like to recognise the departure of Cr Moira Girando as well, who as a deputy I did not have the opportunity to work with, but appreciate her willingness to be part of the Commission for the last three years.

Finally, I would like to acknowledge the staff support of the Commission, so we are able to operate in an efficient and effective manner. To Shannon Wood, Chloe Papasergio, Chris Berry, and others who have assisted during the past year, we appreciate the commitment and professionalism you continue to demonstrate.

If you have any questions regarding the Commission, I encourage you to contact the staff at any time.

A handwritten signature in black ink, appearing to read 'F. Riebeling', written over a horizontal line.

The Hon Fred Riebeling AM JP
Chairman
WA Local Government Grants Commission

Membership of the Commission

For the period 1 September 2020 to 31 August 2021 the members of the Western Australian Local Government Grants Commission were:

Members

Name	Position	Term
Hon Fred Riebeling	Chair	1 August 2019 to 31 August 2022
Mr Luke Stevens	Deputy Chair	5 May 2020 to 31 August 2024
Cr Deb Hamblin	Metropolitan Member	24 April 2018 to 31 August 2021
Dr Wendy Giles	Country Urban Member	1 August 2019 to 31 August 2022
Cr Ian West	Country Rural Member	24 April 2018 to 31 August 2021

Deputy Members

Name	Position	Term
Ms Darrelle Merritt	Deputy to the Deputy Chair	5 May 2020 to 31 August 2023
VACANT	Deputy Metropolitan Member	VACANT
Cr Deborah Botica	Deputy Country Urban Member	1 August 2019 to 31 August 2022
Cr Moira Girando	Deputy Country Rural Member	24 April 2018 to 31 August 2021

Commission Officers

Officers of the Department of Local Government, Sport and Cultural Industries provide administrative, secretarial and research support to the Commission. During 2020-21, officers of the Executive Support Branch who assisted the Commission were:

- Mr Shannon Wood – Manager Local Government Executive Support
- Ms Chloe Papasergio – Senior Strategy and Research Officer
- Ms Natalie Berriman – Strategy and Research Officer (November to May)
- Dr Chris Berry – Roads Consultant

The Commission also acknowledges Ms Julie Craig for her contributions to the Commission at different times through the year.

Vale Clive Shepherd PSM

The Commission notes with sadness the passing of Clive Shepherd on 3 July 2021 at the age of 90. Clive was well known and respected across the local government sector.

After retiring from a long career with the Main Roads department, Clive joined the Local Government Grants Commission as a part-time roads consultant in about 1990-1991, when the Commission was given responsibility for allocating Federal road grants.

Clive was instrumental in developing and maintaining the Asset Preservation Model for allocating the road grant component.

He retired from this role only in 2017 and it is estimated that approximately \$2.1 billion of federal road grants was allocated by this model during that time.

The Asset Preservation Model is Clive's perpetual legacy to local government and road funding.

The Commission members and staff would like to express their condolences to the Shepherd family on their loss.

Member Profiles (as at 31 August 2021)

The Hon Fred Riebeling – Chairperson

Fred served in the State Government from 1992 to 2008 as a member of the Western Australian Legislative Assembly. He has been a Councillor at the City of Mandurah and was the Commissioner at the Town of Port Hedland until October 2020. Fred has also spent time living and serving in the Northern parts of the State.

Mr Luke Stevens – Deputy Chairperson

Luke was appointed to the Grants Commission in 2019. Luke currently works with the Department of Local Government, Sport and Cultural Industries as Legal Counsel. Luke was formerly a member of the Royal Australian Air Force and an employee of WA Police.

Cr Deb Hamblin – Metropolitan Member

Deb is the Deputy Mayor at the City of Rockingham. She has more than 13 years' experience in local government. Deb has also spent many years in the information and research sector, having worked for 38 years with Murdoch University.

Dr Wendy Giles – Country Urban Member

Wendy comes from an academic background, with a Masters of Educational Management and a Doctorate of Science Education. Her extensive background in education has resulted in a wide variety of experiences in diverse contexts ranging from primary school to university, from cities to remote communities and from a teacher to an academic leader. Wendy was initially a Councillor at the City of Bunbury from 2013 to 2017 and re-joined council in 2019.

Cr Ian West – Country Rural Member

Ian has served 28 years in local government and has been a part of several State Committees as well as being a WALGA State Council member for seven years. While currently a councillor at the Shire of Irwin, Ian has previously been a councillor at the Shire of Perenjori, where he is a freeman. Due to his breadth of experience, Ian has a good knowledge of regional and remote communities.

Deputy Member Profiles

Ms Darrelle Merritt – Deputy to the Deputy Chairperson

Darrelle was appointed to the Grants Commission on 20 May 2020. Darrelle has worked within the Department of Local Government since 2006, giving her a wealth of experience and understanding of the challenges local governments face. She is currently the acting Director of the Department's Strategic Initiatives branch. Darrelle has a Graduate Certificate in Public Sector Management and a Bachelor of Agribusiness – Marketing with Honours.

VACANT – Deputy Metropolitan Member

Cr Deborah Botica – Deputy Country Urban Member

Deborah is a councillor with the City of Kalgoorlie-Boulder. She has worked in health care in a range of different roles including as a nurse, carer and counsellor. Deborah now works in the travel industry.

Cr Moira Girando – Deputy Country Rural Member

Moira is the President at the Shire of Coorow and has been on Council since 1997. She has previously sat on the WALGA State Council.

Membership changes for 2021-22

The terms of Metropolitan member, Country Rural member and Deputy Country Rural member concluded on 31 August 2021. The Deputy Metropolitan member position was previously vacated in March 2020.

The following appointments to the Commission were gazetted on 31 August 2021 to fill the positions:

- Mr Colin Cameron – Metropolitan Member
- Cr David Goode – Deputy Metropolitan Member
- Ms Melinda Prinsloo – Country Rural Member
- Cr Chris Mitchell – Deputy Country Rural Member

The terms of the new members will commence on 1 September 2021.

Financial Assistance Grants

Financial Assistance Grants: 2021-22 Grant Allocations

The Commonwealth legislation, *Local Government (Financial Assistance) Act 1995* (Cth), provides for an annual adjustment to the national funding pool for the Financial Assistance Grants (FA Grants) general purpose component and is calculated by indexing the previous year's funding pool by Consumer Price Index (CPI) and population growth. The annual increase to the national funding pool for local road grants is calculated by indexing the previous year's funding pool by CPI. The legislation also provides for the Treasurer to vary this adjustment if there are considered to be special circumstances.

In 2021-22, Western Australia received a 4.58 per cent increase to its general purpose grant and a 3.80 per cent increase to the local roads allocation.

The Western Australian share of Commonwealth funding for 2021-22 is \$316,015,338 being 11.89 per cent of the national allocation of \$2,657,146,151. WA's share consisted of \$191,144,931 for the general purpose component and \$124,870,407 for the local roads component.

Figure 1. National Distribution of Financial Assistance Grants 2021-22

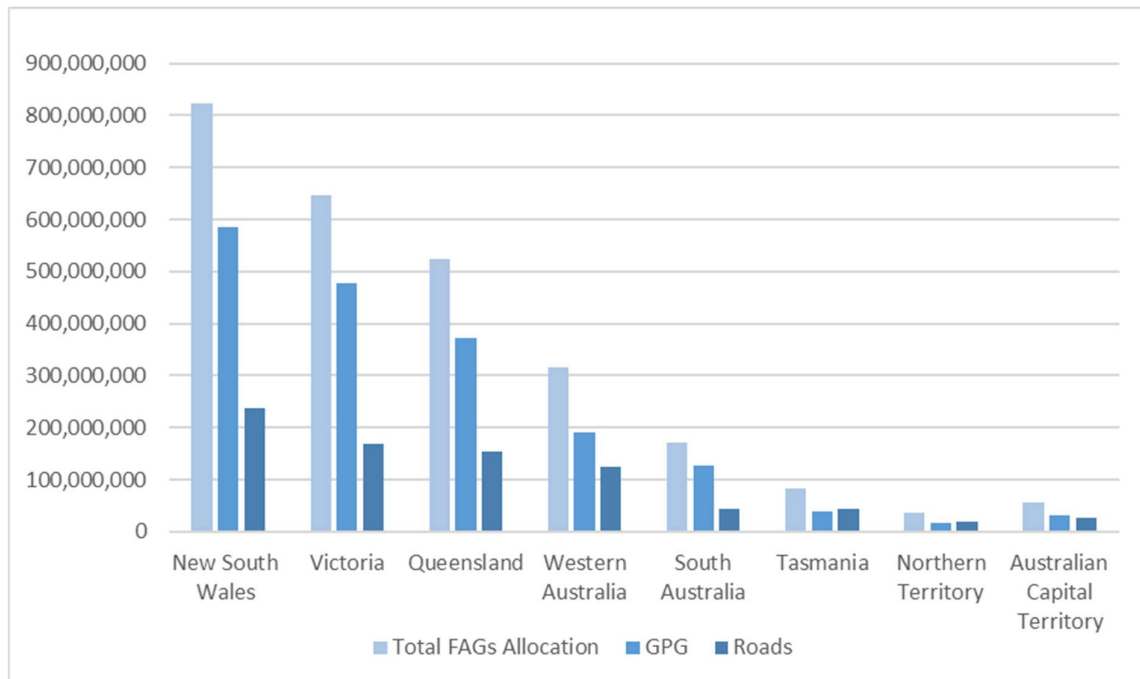

Table 1: 2021-22 General Purpose and Road Funding by State

State	General Purpose %	Roads %
New South Wales	31.78%	29.01%
Victoria	25.99%	20.62%
Queensland	20.21%	18.74%
Western Australia	10.39%	15.29%
South Australia	6.89%	5.50%
Tasmania	2.11%	5.30%
Northern Territory	0.96%	2.34%
Australian Capital Territory	1.68%	3.21%
Total:	100.00%	100.00%*

*Please note that due to rounding, the total figure does not exactly equal 100%.

The final allocation of \$316,015,338 (after adjustments for 2020-21) is \$739,702 more than the notional grant allocation that the Commission was advised of in the Federal Budget in May 2021. The difference between the notional figures provided in May and the final grant figures in July, is a reflection of an increase in Consumer Price Index (CPI) and in WA population when calculating the grant pool.

Figure 2. Commonwealth Funding Allocated to Western Australia 2010-11 to 2021-22

The final amount of FA Grants to be distributed for 2021-22 is \$4,506,076 million higher, at \$320,521,414, to reflect a positive adjustment to the 2020-21 State allocation. This is a result of the Commonwealth rectifying an underpayment of grants made to the State in 2020-21 due to adjustments to the estimated State population and inflation used in the previous year's grant calculation. This year's adjustment consists of an additional \$2,675,656 for general purpose grants and \$1,830,420 for local roads.

The Grants Commission calculates the "Equalisation Need" for general purpose grant funding for all local governments, based on calculations of the revenue-collecting capacity of each local government, and magnitude of expenditure each local government would be required to incur to deliver a consistent general standard of services across the State.

The total general purpose grant funding received by the State is commonly less than the total equalisation need calculated by the Commission. For 2021-22, the total statewide general purpose grant funding was approximately 56 per cent of the calculated statewide Equalisation Need.

In 2021-22, the general purpose grant funding received by the State allowed for 56 per cent of calculated grant need to be paid to local governments. If a local government was receiving greater than this, they received a reduction in their grant. Reductions are phased to provide some level of stability in grant funding. If a local government was receiving less than 56 per cent, the grant increase provided was as much as the available funding pool would allow.

As part of the process of transitioning all local governments to 56 per cent of calculated grant need, for the 2021-22 grant determinations, the Commission ensured that no local government would receive less than 50 per cent of their calculated grant need.

Size of general purpose grant change	Number of local governments
10% decrease (LGs transitioning to minimum grant)	3
7.5% decrease (LGs receiving more than 80% of their grant need)	2
2.5% decrease (LGs receiving less than 80% of their grant need by more than the scaleback amount of 56%)	30
Increases (all LGs below 56% have received an increase)	71
TOTAL	106*

*This table does not include the 31 minimum grant local governments. Minimum grant local governments are deemed to be self-sufficient and do not need the financial assistance grant funding when compared to other WA local governments.

Local governments that were deemed to be a minimum grant local government, had their grant calculated on a per capita basis in accordance with the minimum grant principle under the *Local Government (Financial Assistance) Act 1995* (Cth). Further detail on these calculations is provided later.

Advance Payment of 2021-22 Financial Assistance Grants

The Commonwealth Government advised in May 2021 that it would make an advance payment of the 2021-22 FA Grants in the 2020-21 financial year. Advance payments totalling \$157,637,818 (includes \$95,317,536 for general purpose, and \$62,320,282 in local roads) which is equivalent to approximately half the projected total Western Australian FA Grant funding pool, were made to local governments on 8 June 2021.

Methodology used for 2021-22

Each year the Commission implements updated data as provided by local governments as well as undertaking reviews of the revenue standards, expenditure standards and cost adjustors.

These reviews are informed by research and through discussions held on the visiting programs. A copy of the calculations and methodology used can be found on the Commission’s website.

In 2021-22, the Commission determined the following cost adjustors to be of the greatest importance to local government.

Figure 3. Cost adjustor allocation for Financial Assistance Grants 2021-22

Below is a summary of the 12 cost adjustors applied to the general purpose grants:

Cost adjustor	No. of LGs receiving allowance	Largest cost adjustor recipient	Largest cost adjustor assessment (\$)	Total cost adjustor (\$)	Average cost adjustor (\$)
Location	106	Greater Geraldton	2,313,308	77,424,036	730,415
Socio-economic disadvantage	79	Gosnells*	2,403,573	45,164,022	571,696
Growth	39	Wanneroo*	3,477,942	19,356,009	496,308
Population dispersion	48	East Pilbara	1,613,427	30,736,785	640,350
Climate	87	Greater Geraldton	1,507,453	21,809,800	250,687
Aboriginality	87	Derby-West Kimberley	1,234,735	20,001,209	229,899
Regional centres	18	Perth*	1,327,447	9,678,005	537,667
Fire mitigation	92	Swan*	2,588,449	18,699,124	203,251
Off-road drainage	126	Swan*	686,885	8,697,431	69,027
Medical facilities	59	Various	85,000	2,680,867	45,438
Cyclone	11	Karratha	276,527	1,935,601	175,964
Special needs	2	Murchison	80,000	150,000	75,000

* Minimum grant local government

Refinements and Review of the Methodology for 2021-22

The Commission calculates the allocation of the general purpose grants each year in accordance with the Commonwealth National Principles.

For 2021-22, 88 per cent of expenditure calculations were distributed using a per capita or per property allocation with the remaining 12 per cent allocated by the cost adjustors, to recognise costs which are out of a local governments control.

There were no major refinements to the methodology for 2021-22, however there were a number of smaller changes made to update the indicator data and formulas in some cost adjustors.

Cost adjustors

Each year the Commission updates the indicator data used in the cost adjustors. This ensures that the calculations are accurate and equitable for the state. This year there were changes to the indicator data for certain cost adjustors, resulting in updated state averages, and small differences to local government allocations. However, the Commission made no changes to the cost adjustors calculation method for the 2021-22 grant year.

Aboriginality Data

Aboriginality data from 2018 was implemented for the 2021-22 grant calculations. The previous data used for the Aboriginality cost adjustor dated back to 2016. The use of the updated data did not lead to significant changes in overall allocations, with a small number of local governments receiving slight increases or decreases in their State share. It did however, result in new averages for the calculation. Last year's average was 550 Aboriginal people per local government or a population with more than 2.88% Aboriginal. After the input of the new data, the new average is 733 Aboriginal people per local government area or more than 3.77% of their local government population.

Growth Data

The Commission updated the historical growth data range from 2015 to 2019 to 2016 to 2020, future growth data remains at the range of 2021-2026. The updated historical data means that a range of local governments that previously received an allocation for Growth, would not be eligible based on the new criteria within the calculation.

Revenue Standards

Revenue standard formulas

Revenue standards are a mathematical formulae used to assess the revenue earning capacity of each local government.

The Commission calculates the following revenue standards:

- Residential/Commercial/Industrial Rates
- Agricultural Rates
- Pastoral Rates
- Mining Rates
- Investment Income

The majority of revenue standards use regression analysis as the basis to inform the decision. Regression analysis is a tool for analysing relationships between variables.

Residential Commercial and Industrial: Using regression analysis, the Commission determined that a weighting of 40 per cent on the number of assessments and 60 per cent on property valuations is the preferred outcome as it demonstrates a stronger relationship between local government rating inputs and rates raised.

Agricultural: The Agricultural standard was reviewed, and it was determined that the current weightings of 26 per cent on number of assessments, 39 per cent on property valuations and 35 per cent on area provided the most effective outcome.

Pastoral: A regression based formula has been applied as it provided a far improved outcome. Weightings of 22 per cent on the number of assessments, 49 per cent on property valuations and 29 per cent on area have been used.

Mining: The Commission reviewed the Mining Revenue standard and found that an update to the regression analysis formula of five per cent on area, 74 per cent on valuations and 21 per cent on assessments provided an improved correlation and outcome.

Investment Revenue: Investment Revenue continues to be calculated using population data as its basis. This is due to there being a loose relationship between investment revenue and local government indicators. The State was advised by the Commonwealth Grants Commission that when there is a weak relationship, population is the fairest method of distribution.

Reviews proposed for 2021-22

The Grants Commission commenced a review of all components of the methodology in 2020-21 and due to the length and complexity of the review, it will continue into 2021-22. The last major review was completed in time for the 2012-13 grant calculations.

While annually, individual components are considered, a more in-depth review was undertaken in response to local government submissions, to consider the cost adjustors and concepts.

The Commission will continue the review of the revenue standards, expenditure standards and all 12 cost adjustors over the next year.

The Commission welcomes feedback from local governments at any time either through a formal submission or comments on the methodology to grants.commission@dlgsc.wa.gov.au.

Minimum Grant Local Governments

In 2021-22, 31 local governments (of the 137 total in WA) received the minimum grant entitlement which equated to \$21.53 per capita. This was an increase from 2020-21 when local governments received \$20.92 per capita.

Collectively, the local governments receiving the minimum grant accounted for \$45.3m (23.7 per cent) of the total general purpose funding pool while comprising 79.1 per cent of the State's population.

2021-22 Minimum Grant Local Governments

- Armadale
- Bassendean
- Bayswater
- Belmont
- Bunbury
- Busselton
- Cambridge
- Canning

- Mosman Park
- Nedlands
- Peppermint Grove
- Perth
- Rockingham
- South Perth
- Stirling
- Subiaco
- Swan
- Victoria Park
- Vincent
- Wanneroo

Amalgamation Policy

The Commission has a policy whereby, for a five-year period, it will provide any amalgamating local governments the higher of the amalgamating local governments' individual general purpose grants, combined and pegged at pre-amalgamation levels, or the new equalisation of the new entity. Currently there are no WA local governments operating within the amalgamation maintenance period.

Grants Determination Process

The Commission maintains its administrative processes to provide for timely notification of grants to local governments. The Western Australian Minister for Local Government approved the Commission's final allocation of Financial Assistance Grants (FA Grants) on 30 July 2021. The Commonwealth Minister for Local Government approved the final grant allocations on 5 August 2020.

Publication of Grant Calculations

The Schedule of Payments contains all the information relating to each local government's FA Grants, including general purpose grants, road grants and special project grants where applicable. The Balanced Budget details the calculation of each local government's general purpose grant. Both documents are made available to local governments on the department's web page.

Public and Special Hearings

In accordance with the Commonwealth *Local Government (Financial Assistance) Act 1995* (Cth), the Commission undertakes public hearings with local governments. The hearings consist of a formal presentation about the operations of the Commission. At the hearing, local governments are given the opportunity to present submissions to the Commission on their individual grant determination and any issues relevant to the grant determination process.

The hearings facilitate discussion between councillors, staff, members of the public and the Commission. Due to the large number of local governments in WA, the Commission aims to hold public hearings with each one at least once every five years.

Through these hearings, the Commission can gain a greater understanding of the issues affecting local governments and their capacity to provide services and facilities to their communities.

The Commission tries to ensure that all local governments and other interested parties have the opportunity to understand the grant determination process and to present their views or suggestions on any aspect of the process.

In 2020-21, the Commission conducted public hearings at the following 32 local governments:

Table 2: Public Hearings in 2020-21

Region	Local Governments
Eastern Wheatbelt	Dowerin, Wyalkatchem, Mukinbudin, Mount Marshall, Wongan-Ballidu and Goomalling.
Near Eastern Wheatbelt	Cunderdin, Tammin, Quairading, Beverley, Brookton, Pingelly, and Cuballing.
Southwest	Manjimup, Nannup, Capel, Augusta Margaret River, Bunbury, Dardanup and Donnybrook- Balingup.
Mid West 2	Three Springs, Mingenew, Yalgoo, Perenjori and Dalwallinu
Mid South West	Busselton, Bridgetown-Greenbushes, Boyup Brook, Kojonup, Narrogin, Wickepin and Williams

In addition to the public hearings, local governments can request a special hearing with the Commission, at any time. This provides any local government with an opportunity to present a submission on the grant determination process to address issues of an urgent nature.

Issues raised at public hearings

As part of the hearings, the Commission provides an opportunity for local governments to raise methodology related issues as well as more general concerns that go beyond the scope of the Commission, to offer guidance and to raise awareness of issues affecting other local governments.

Over the past 12 months, local governments raised the following concerns and matters of interest with the Commission during public hearings:

General local government issues

Telecommunication Issues

A number of local governments within the Wheatbelt region (particularly Mount Marshall) commented on the ongoing telecommunications issues within their district. For example, if power is lost in the town of Beacon, there would be no power for at least the following three days before the issue is resolved. These power outages include loss of mobile phone reception and household landlines which means in an emergency the community is unable to call Police or Ambulance services.

This is an issue for the community's safety and wellbeing and also has an effect on the appeal of living in the region. Some local governments own generators for when power outages occur, however they are costly to use and the option to install solar power is not financially viable for some of these smaller local governments.

Housing

A common theme expressed by local governments within the mid-west and mid-southwest region was housing availability. Housing in isolated communities is an issue for these regional local governments, as there is interest from people wanting to live in the region, but the local governments lack the capacity to obtain financing to undertake housing developments.

Shires such as Boyup Brook, Kojonup, and Dalwallinu all noted that while there is currently demand from people wanting to live in their local government regions, there is no housing available. There is little interest from investors to develop land, making it difficult to attract new residents to encourage population growth within their districts. For local governments, this issue will continue to impact on the future population growth in regional areas as well as potentially, on the financial viability of local governments.

Population decline – education

In several local governments, a lack of high school options within a region is resulting in population decline, as many families with children are leaving after they have finished primary school. This can cause families to separate, with fathers remaining on farms or in other businesses in town, and with mothers moving to city areas (or larger regional areas with high schools) to be with their children while they attend school.

This has led regional families to begin to invest in homes in metropolitan areas rather than in regional areas as “drive in and drive out” workforces are becoming too difficult for families to manage.

Aged care and health services

The ageing demographic in regional communities and the services needed to provide aged care is a major concern and cost for local governments. Many local governments struggle to attract adequate health services (including allied health services like Silver Chain), housing and care for the elderly or disabled. Many long-term residents have a desire to retire in the community they have always belonged to and also to stay near family. However, due to the lack of appropriate services in many local governments, they may be forced to move to other areas that have the relevant services available.

A number of local governments have funded their own services and facilities which is of significant cost to the local government. The challenge is exacerbated in districts that are attractive to retirees (such as coastal towns) that can have a disproportionate number of older community members, but lack the health facilities to support them.

Local government road issues

Roads

Many regional local governments throughout the State have raised an ongoing concern about the damage caused by heavy haulage vehicles such as those associated with mining, lime sands and agriculture on local roads and the resulting cost of road maintenance.

Local governments that were recently visited by the Commission noted that many roads were built for local traffic but are commonly used by road trains and other heavy vehicles moving through their districts. This matter has been raised by several local governments, particularly in the mid-west region, and the issues are primarily about the damage to roads and the subsequent costs of maintaining and improving the roads and road reserves. Often the damage is caused by vehicles passing through the district, which does not even allow the local government to charge rates to the company's responsible to maintain the roads. Areas with small rate bases are particularly vulnerable.

Shire of Upper Gascoyne submission on the Asset Preservation Model

The Shire of Upper Gascoyne presented a detailed submission on the Asset Preservation Model (APM), requesting the Commission to make a number of changes. These included reallocating the Shire to a different cost region, provision of a disability factor to recognise material haulage distances of greater than 30km, changing the frequency of regraveling and reforming unsealed roads. It also called for a broader review of the APM.

The Commission met with representatives of the Shire and considered their submission, in light of the recent APM cost review and other relevant information. The Commission resolved to note the Shire of Upper Gascoyne submission and for the matters raised to be kept under review by the Commission as more information becomes available.

The Shire of Upper Gascoyne promoted a further review of the Asset Preservation Model through the Western Australian Local Government Association. Commission staff worked with WALGA staff in preparing material for consideration by all local governments. As a result of a WALGA resolution, further work will be done by the Commission staff to make more and clearer information about the APM available to local governments.

Submissions

Each year, local governments are given the opportunity to highlight disadvantages they face in the provision of local government services through submissions to the Commission. In the last 12 months, the Commission received only one submission - from the Shire of Irwin.

The Commission sent a voluntary survey to all 137 local governments on 10 November 2020 requesting feedback on the cost adjustors and the general purpose grant methodology. 70 responses were received, with all comments and feedback included as part of the cost adjustor reviews. The feedback has allowed the Commission to investigate new data sources, learn more about issues within the WA local government sector and to allow for the methodology modelling to be conducted on how to more equitably calculate the cost adjustors.

Grants to Indian Ocean Territories

The Commission provides advice to the Indian Ocean Territories Administration on the level of FA Grants to be provided to the Shire of Christmas Island and the Shire of Cocos (Keeling) Islands. The funding for both shires is assessed separately to the allocation of FA Grants for Western Australia's 137 mainland local governments. Grant funding is allocated directly by the Commonwealth and does not come out of the State funding pool.

The Commission mostly assesses the funding requirements of these two shires in accordance with the same methodology applied to mainland Western Australian local governments. Some specific cost adjustors are applied to recognise the unique situation of the Indian Ocean Territories. The local road funding grant is assessed in accordance with the Asset Preservation Model.

Table 3: Financial Assistance Grants for Indian Ocean Territories 2021-22

General Purpose Grants

Local Government	2020-21 Final GP Grant (\$)	2021-22 Final GP Grant (\$)	% Change
Christmas Island	5,617,142	5,888,353	4.82%
Cocos (Keeling) Islands	4,052,880	4,353,466	7.41%

Local Road Grants

Local Government	2020-21 Final Road Grant (\$)	2021-22 Final Road Grant (\$)	% Change
Christmas Island	513,844	572,312	11.37%
Cocos (Keeling) Islands	155,676	178,088	14.39%

Local Road Funding

The Commission calculates the road grant allocations using the Asset Preservation Model (APM) which has been in place since 1992. The Asset Preservation Model recognises the maintenance costs based on existing road assets of each local government and regional differences in the cost of maintenance.

Local road inventory data is a critical input to the APM and local governments are encouraged to maintain comprehensive and up to date inventory data.

For 2021-22, Western Australia received \$124,870,407 of the total national local road funding pool of \$816,672,379 representing 15.29 per cent of the national total.

Ninety-three per cent of the Commonwealth funds for road grants are distributed to local governments in Western Australia according to the APM.

Under the current methodology, seven per cent of the funds are allocated for special projects; one-third of this is for roads servicing Aboriginal communities and two-thirds is for bridges. Main Roads Western Australia contributes one third of the cost of projects funded under this program.

The amounts involved for 2021-22 are:

Roads Servicing Aboriginal Communities	\$ 2,908,280
Bridges	\$ 5,816,560
Distributed according to the APM	\$ 116,145,567
Total:	\$124,870,407

Distribution of the Asset Preservation Model component

In 2021-22, \$116,145,567 will be distributed in accordance with road preservation needs determined by the Commission's APM. The model assesses the average annual costs of maintaining each local government's road network and has the facility to equalise road standards through the application of minimum standards. These standards help local governments that have not been able to develop their road systems to the same level as other more established local governments.

Special Projects: Roads Servicing Aboriginal Communities

In 2021-22, the Special Projects funds for Aboriginal access roads are:

Special Project funds from Commission	\$2,908,280
State funds from Main Roads Western Australia	\$1,454,140
Total	\$4,362,420

The Aboriginal Access Roads Committee advises the Commission on procedures for determining the allocations of Commonwealth road funds for roads servicing remote Aboriginal communities and recommends the allocations that are made each year.

Membership of the committee is made up of representatives from each of the following organisations:

- Western Australian Local Government Grants Commission (Chairperson)
- Western Australian Local Government Association
- Main Roads Western Australia
- Department of Planning, Lands and Heritage
- Department of the Prime Minister and Cabinet
- Department of Local Government, Sport and Cultural Industries.

The committee has established funding criteria based on factors including the number of Aboriginal people serviced by a road, the distance of a community from a sealed road, the condition of the road, the proportion of traffic servicing Aboriginal communities and the availability of alternative access. These criteria have provided a rational method of assessing priorities in developing a five-year program.

Special project funds have been allocated for improvements to Aboriginal access roads over many years, and it is pleasing to see continuing improvements in road standards.

Table 4: Aboriginal Access Roads Grants

Local Government	Road	2021-22 Allocations (\$)
Derby West Kimberley	Camballin	173,333
	Cherrabun	73,333
	Fossil Downs	42,000

Wiluna	Wiluna North	42,948
Wyndham East Kimberley	Gibb River Kalumburu	380,000
TOTAL		2,908,280

Special Projects: Bridges

The Commission's policy for allocating funds for bridges recognises that there are many local government bridges that are in poor condition and that the maintenance and preservation of these bridges must be given a high priority.

The special project funds for bridges are only allocated to preservation projects, recognising that some of these projects may include some upgrading and that preservation includes replacement when the existing bridge has reached the end of its economic life.

Main Roads Western Australia (MRWA) contributes one third of the cost of all projects funded under the special projects program.

In 2021-22, the funds for the preservation of bridges are:

Special Project funds from Commission	\$5,816,560
State funds from Main Roads Western Australia	\$2,908,280
Total	\$8,724,840

The Bridge Committee advises the Commission on priorities for allocating funds for bridges. Membership of the Committee is made up of representatives from the following organisations:

- Western Australian Local Government Grants Commission (Chair)
- Western Australian Local Government Association
- Main Roads Western Australia
- Department of Local Government, Sport and Cultural Industries.

The committee regularly receives recommendations from MRWA on funding priorities for bridges. MRWA inspects and evaluates the condition of local government bridges and has the expertise to assess priorities and make recommendations on remedial measures.

MRWA advises the Commission's Bridge Committee on bridge project priorities. Pictured to the right is a bridge in the City of Busselton which required restorative work after a fire.

Implementation of updated Road Costs Used in the Asset Preservation Model (APM)

In 2020-21, the Commission applied updated road costs in its determination of road asset preservation need, following a review of the costs used in the APM with input from local governments. Accurate road costs underpin the reliability of the APM, which is used for allocating Commonwealth Financial Assistance road grants and State Direct grants. The Commonwealth has also used the Commission's APM assessments as a basis for allocating a component of Roads to Recovery funding and the Local Roads and Community Infrastructure Program.

The review of road costs was more fully reported in the 2019-20 Annual Report.

Local Roads and Community Infrastructure Program 2020

On 22 May 2020 the Australian Government announced a new \$500 million Local Roads and Community Infrastructure Program (LRCI Program), with the Department of Infrastructure's website reporting that:

"Funding allocations for the LRCI Program have been calculated in a similar way to how the Roads to Recovery Program and the road component of the Financial Assistance Grants works. This formula takes into consideration road length and population and is based on recommendations of Local Government Grants Commissions."

The intrastate allocations mirror the allocations of FA Grants and R2R in each state. This means the allocations to WA local governments were based on the asset preservation need determined by the WA LGGC.

Additional funding under the LRCI Program ('Phase 2') was announced in the budget of 6 October 2020. The formula for the Phase 2 Allocations was based on the existing formula with an additional component that saw two thirds of the allocation based on council population size.

The Australian Government committed to Phase 3 of the LRCI Program, with an additional \$1 billion announced in the May 2021-22 budget, is based on the same formula as phase 1.

Schedule of General Purpose Grants

Local government	2020-21 Final General Purpose Grant (\$)	2021-22 Final General Purpose Grant (\$)	Percentage change	2021-22 Adjustment for underpayment (\$)	General Purpose Advance paid in June 2021	Remaining Cash payment 2021-22 (\$)
