

# **ZOONOSES MONITORING**

## **Albania**

TRENDS AND SOURCES OF ZOONOSES AND ZOONOTIC AGENTS IN FOODSTUFFS, ANIMALS AND FEEDINGSTUFFS

including information on foodborne outbreaks, antimicrobial resistance in zoonotic and indicator bacteria and some pathogenic microbiological agents

IN 2016

## **PREFACE**

This report is submitted to the European Commission in accordance with Article 9 of Council Directive 2003/99/EC\*. The information has also been forwarded to the European Food Safety Authority (EFSA).

The report contains information on trends and sources of zoonoses and zoonotic agents in Albania during the year 2016.

The information covers the occurrence of these diseases and agents in animals, foodstuffs and in some cases also in feedingstuffs. In addition the report includes data on antimicrobial resistance in some zoonotic agents and indicator bacteria as well as information on epidemiological investigations of foodborne outbreaks. Complementary data on susceptible animal populations in the country is also given. The information given covers both zoonoses that are important for the public health in the whole European Union as well as zoonoses, which are relevant on the basis of the national epidemiological situation.

The report describes the monitoring systems in place and the prevention and control strategies applied in the country. For some zoonoses this monitoring is based on legal requirements laid down by the European Union legislation, while for the other zoonoses national approaches are applied.

The report presents the results of the examinations carried out in the reporting year. A national evaluation of the epidemiological situation, with special reference to trends and sources of zoonotic infections, is given. Whenever possible, the relevance of findings in foodstuffs and animals to zoonoses cases in humans is evaluated.

The information covered by this report is used in the annual European Union Summary Reports on zoonoses and antimicrobial resistance that are published each year by EFSA.

<sup>\*</sup> Directive 2003/ 99/ EC of the European Parliament and of the Council of 12 December 2003 on the monitoring of zoonoses and zoonotic agents, amending Decision 90/ 424/ EEC and repealing Council Directive 92/ 117/ EEC, OJ L 325, 17.11.2003, p. 31

#### 1 INFORMATION ON SPECIFIC ZOONOSES AND ZOONOTIC AGENTS

Zoonoses are diseases or infections, which are naturally transmissible directly or indirectly between animals and humans. Foodstuffs serve often as vehicles of zoonotic infections. Zoonotic agents cover viruses, bacteria, fungi, parasites or other biological entities that are likely to cause zoonoses.

#### 1.1 SALMONELLOSIS

#### 1.1.1 Salmonella in foodstuffs

### 1.1.1.1 Salmonella in food - All foodstuffs - food sample

Monitoring system

#### Sampling strategy

Samples are taken by the Albanian National Food Authority (NFA) based on the National Plan for Risk-Based Inspection and Sampling. This National Plan is prepared annually from NFA and approved from the Minister of Agriculture, Rural Development and Water Administration. Samples are also taken in cases when there is doubt, considering as well the current capacities of NFA laboratories. Sampling, testing method and measures in cases of non-conformity are product blocked and destroyed, according the procedures defined in the national legislation.

#### 1.2 LISTERIOSIS

### 1.2.1 Listeria in foodstuffs

#### 1.2.1.1 Listeria in food - All foodstuffs - food sample

Monitoring system

## Sampling strategy

Samples are taken by the Albanian National Food Authority (NFA) based on the National Plan for Risk-Based Inspection and Sampling. This National Plan is prepared annually from NFA and approved from the Minister of Agriculture, Rural Development and Water Administration. Samples are also taken in cases when there is doubt, considering as well the current capacities of NFA laboratories. Sampling, testing method and measures in cases of non-conformity are product blocked and destroyed, according the procedures defined in the national legislation.

#### **2 FOODBORNE OUTBREAKS**

Foodborne outbreaks are incidences of two or more human cases of the same disease or infection where the cases are linked or are probably linked to the same food source. Situation, in which the observed human cases exceed the expected number of cases and where a same food source is suspected, is also indicative of a foodborne outbreak.

## 2.1 Outbreaks

#### 2.1.1 Foodborne outbreaks

System in place for identification, epidemological investigations and reporting of foodborne outbreaks

In Albania different authorities are dealing with food-borne outbreaks:-The National Food Authority deals with safety of foodstuffs, epidemiological investigation on foodstuffs and animal health issues in case of a food-borne outbreak. -The Refrence Institutes of Public Health and Food Safety and Veterinary analyses all suspected food samples, collects all data on food-borne outbreaks and gives scientific support to Ministry of Health and National Food Authority. Furthermore in 2016, for a better communication was made available to exchange outbreak data and laboratory results in real time between the different authorities dealing with FBO. Data in this report come from the Insitute of Public Health for Food-borne outbreak.

## **ANIMAL POPULATION TABLES**

# **Table Susceptible animal population**

|                         |                         | Рорг      | ulation    |
|-------------------------|-------------------------|-----------|------------|
| Animal species          | Category of animals     | animal    | herd/flock |
| Cattle (bovine animals) | Cattle (bovine animals) | 368,000   | 119,000    |
| Gallus gallus (fowl)    | Gallus gallus (fowl)    | 6,068,000 | 273,200    |
| Goats                   | Goats                   | 1,116,000 | 43,590     |
| Pigs                    | Pigs                    | 118,600   | 39,700     |
| Sheep                   | Sheep                   | 2,229,000 | 75,400     |

## **DISEASE STATUS TABLES**

Table Bovine brucellosis in countries and regions that do not receive Community co-financing for eradication programme

6

| Region  | Number of<br>herds with<br>status<br>officially<br>free | Number of infected herds | Total<br>number of<br>herds |
|---------|---|--------------------------|-----------------------------|
| Albania | 0   | 9                        | 119,000                     |

Albania - 2016
