Il Parlamento europeo respinge la proposta della Commissione.

Motivazione

This proposal for a decision did not come in a timely manner; This lateness did not allow the co-legislators to discuss properly the draft, in particular the volume of imports concerned from each listed countries and how the equivalence with those countries was determined, including regarding genetically modified organisms; Moreover, the issue covered by this proposal for a decision is being discussed in parallel in the framework of the draft FRM regulation, and the two drafts do not seem to be in line; We therefore propose to reject this proposal and deal with the imports of "tested" FRM through the future regulation;
