A8-0270/2017

Proposal for a regulation

Annex I – part II – PFC1(C) a (new)

Text proposed by the Commission

Amendment

PFC1(C) a: Low carbon fertiliser

- 1. A CE marked fertilising product shall be termed low carbon fertiliser if it contains more than 1 % organic carbon (C_{org}) and up to 15 % organic carbon (C_{org}).***
- 2. Carbon present in calcium cyanamide and in urea and its condensation and association products will not be included in organic carbon for the purpose of that definition.***
- 3. The specifications of solid/liquid, straight/compound, macronutrient/micronutrient fertilisers of PFC1(C) shall apply for the purpose of this category with the exemption of the specifications on minimum solubility levels for phosphorus, total declarable nitrogen content and total declarable phosphorus content.***
- 4. Products sold as low carbon fertilisers shall comply with contaminant levels as specified in Annex I defined for organic or organo-mineral fertilisers in any case where PFC1(C) does not contain any limit values for those contaminants.***

Justification

Low carbon fertilisers should not have to meet criteria which are designed based on the specific properties of traditional mineral fertilisers. The amendments adds therefore to paragraph 3 of AM 170 of the IMCO report that “specifications on minimum solubility levels for phosphorus, total declarable nitrogen content and total declarable phosphorus content” should not be applicable to low carbon fertilisers.

Proposal for a regulation

Article 42 – paragraph 1 a (new)

Text proposed by the Commission

Amendment

1a. The Commission shall be empowered to adopt delegated acts in accordance with Article 43 to extend the date of entry into force of the 20mg/kg limit referred to in Annex I – part II – PFC1(B) – paragraph 3 – point a - paragraph 2 and Annex I - part II – PFC1(C)I - paragraph 2 - point a - paragraph 2, if, based on a thorough impact assessment, it has evidence to consider that the introduction of a stricter limit would seriously jeopardise the supply of fertilising products to the Union.
