A9-0319/2023

Proposal for a regulation
Recital 90 c (new)

Text proposed by the Commission

Amendment

(90c) The aim of this legislation should be to limit the use of products that are of no use whatsoever, as well as to effectively reduce the production and use of disposable and useless products, going against a logic in which the ‘consumer pays’ principle is applied, and which legitimises continued production and consumption as long as someone pays.

A9-0319/2023

Proposal for a regulation
Recital 90 d (new)

Text proposed by the Commission

Amendment

(90d) Policies are needed that promote innovation in production, along with a normative as opposed to a market approach. Policies are needed that promote a decrease in production and consumption, that promote a more sustainable production, limited to the strictly necessary, producing degradable or more easily recyclable products. It is necessary to promote active collection of single-use materials and of other products that affect the environment.

A9-0319/2023

Proposal for a regulation
Recital 110 a (new)

Text proposed by the Commission

Amendment

(110a) The proposed objectives, targets and timetables should be proportionate and balanced, and take the actual context and reality in each Member State as a starting point. The necessary derogations must be in place to ensure that states have the requisite flexibility and that the objectives, targets and timetables are suitable, thus tailoring the means of implementation to each Member State's actual capacity and resources.

Proposal for a regulation
Recital 110 b (new)

Text proposed by the Commission

Amendment

(110b) With a view to increasing the amount of packaging collected, sorted and recycled, sufficient public-domain infrastructure needs to be developed and set up, which means marshalling the necessary ambitious economic resources from EU funds, with increased funding for Member States whose starting point is below the EU27 average.
