Proposal for a regulation

Article 27 – paragraph 4 – subparagraph 2 a (new)

Text proposed by the Commission

Amendment

In the absence of implementing acts establishing detailed calculation rules and methodology regarding the targets set out in Article 26 being adopted by 31 December 2025, the targets set out in Article 26 shall be suspended until the Commission adopts those implementing acts. Those targets shall apply 5 years from the date of adoption of those implementing acts.

Or. en

Justification

The year between the determination of the calculation method and the first target date (2030) is insufficient to allow companies to plan ahead and gain the necessary insight into where and how to direct investments in reusable solutions. The regulation should include a clause that provides sufficient time to comply with adopted secondary legislation and achieve the targets. Given the significant amount of secondary legislation, the regulation should provide at least five years between the adoption of the implementing act and the deadline for achieving the goals.
