

Amendment 6

Peter Liese, Norbert Lins
on behalf of the PPE Group

Motion for a resolution**B9-0424/2021****Committee on the Environment, Public Health and Food Safety**

The Commission delegated regulation of 26 May 2021 supplementing Regulation (EU) 2019/6 of the European Parliament and of the Council by establishing the criteria for the designation of antimicrobials to be reserved for the treatment of certain infections in humans

Motion for a resolution**Paragraph 7***Motion for a resolution*

7. ***Considers that such*** a derogation should ***only*** apply to ***the*** treatment of individual animals ***with a clinically diagnosed serious, life-threatening disease*** which, ***if inappropriately*** treated, ***would lead to significant morbidity or significant mortality, and for which no alternative treatment, alternative farm management strategies or improved animal husbandry techniques to prevent, treat or control the disease are available, and should only apply subject to an antibiotic susceptibility test being required prior to treatment;***

Amendment

7. ***Considers that*** a derogation should apply to ***an individual*** treatment of individual animals ***after an individual diagnostic, including the performance of an antibiogram*** which leads to the result ***that no less potent antimicrobial is available; considers further that if several animals in the same setting are affected all of them may be treated but only under the condition mentioned above; stresses that the use of antimicrobials under these conditions should be notified to the competent national authorities and that Member States should collect and assess this data to allow for further recommendation and guidance on how to reduce the use of antimicrobials;***

Amendment 7

Peter Liese, Norbert Lins
on behalf of the PPE Group

Motion for a resolution

B9-0424//2021

Committee on the Environment, Public Health and Food Safety

The Commission delegated regulation of 26 May 2021 supplementing Regulation (EU) 2019/6 of the European Parliament and of the Council by establishing the criteria for the designation of antimicrobials to be reserved for the treatment of certain infections in humans

Motion for a resolution

Paragraph 7 a (new)

Motion for a resolution

Amendment

7a. Stresses that comprehensive monitoring of antibiotics in farming, developed in cooperation with veterinarians, has led to extensive documenting of the use of antibiotics and further improved their application; regrets the fact that no comparable system yet exists in relation to human medicine; therefore, if sufficient progress on the prudent use of antibiotics in human medicine has not been achieved at Member State level in the next two years, requests that the Commission present a legislative proposal for the use of antibiotics in human medicine on the same legal basis as for veterinary medicine and calls on the Commission to propose a legal framework in the form of an instrument incentivising the development of new antibiotics;
