

**Question for written answer E-002159/2024
to the Commission**
Rule 144
Mircea-Gheorghe Hava (PPE)

Subject: Funding for local authorities in the Republic of Moldova through the Growth Plan

The European Union took an essential step in supporting the development of the Republic of Moldova by approving an unprecedented financial package worth EUR 1.8 billion. The Growth Plan is part of a broad support project aimed at accelerating the process of Moldova's accession to the EU, strengthening its capacity to implement essential reforms and stimulating the national economy.

This financial aid, provided for 2025-2027, is the most significant economic support awarded by the EU since Moldova became independent. The Growth Plan for Moldova is built on three pillars: improving infrastructure and increasing financial assistance, aiding Moldova's integration into the EU single market, and supporting the implementation of fundamental socio-economic reforms.

1. Could the Commission specify which non-reimbursable funding projects will be directed towards local communities, both urban and rural, in the Republic of Moldova, and for which projects local public administrations will be eligible applicants?
2. What is the estimated launch date of the public consultations for the upcoming funding projects?
3. Which institutions in the Republic of Moldova will be responsible for managing and monitoring the non-reimbursable funding provided by the EU for local administrations through the Growth Plan?
