

**Question for written answer E-004827/2014/rev.1
to the Commission**
Rule 117
Roberta Metsola (PPE)

Subject: Fiscal Compact implementation

The Fiscal Compact requires the EU Member States to enact, within one year of the date the treaty enters into force for them, a domestic 'implementation law' establishing an automatic correction mechanism based on the results of monthly surveillance, which should be carried out by an independent fiscal advisory council, so as to guarantee that their national budget is balanced or in surplus in accordance with the definition set out in the Compact.

Does the Commission have information on the measures taken by all the EU Member States to transpose the measures of the Fiscal Compact into its domestic law?
