

**Question for written answer E-003491/2020
to the Commission**

Rule 138

Roberta Metsola (PPE)

Subject: Exports of recyclable or reusable materials

In light of the Circular Economy Action Plan's objectives to halve municipal waste by 2030 and promote waste reduction, along with the backdrop of low oil prices which make recycling less economically viable, what measures can Member States expect regarding the shipment of reusable or recyclable materials and other waste between Member States? Will these measures take account of the insularity faced by some Member States?
