

**Question for written answer E-003497/2020  
to the Commission**

Rule 138

**Roberta Metsola** (PPE)

Subject: Construction waste

In the Circular Economy Action Plan, the Commission announced that it will adopt a comprehensive strategy for a sustainable built environment promoting circularity principles for buildings.

1. What is the timeline for this strategy?
2. Does the Commission envisage setting binding targets to reduce construction waste?
3. What measures can the Member States expect in this sector and will the insularity of some Member States be taken into account?
