

**Question for written answer E-002833/2023
to the Commission**

Rule 138

Pascal Arimont (PPE)

Subject: Harmonisation of conditions for stem cell donation in Europe

In its answer to Written Question E-001205/2020, the Commission stated that it was currently reflecting on the most suitable follow-up actions to deal with the shortcomings relating to stem cell donation that were identified in the question. The Commission announced that 'this process will also take into account the points raised by the Honourable Member'.

In the meantime, the Commission proposal for a regulation on standards of quality and safety for substances of human origin intended for human application and repealing Directives 2002/98/EC and 2004/23/EC has been submitted.

How does the proposal specifically address the issues and calls for action set out in Written Question E-001205/2020 (setting a common age limit for registration for stem cell donation and a guaranteed option of registering for stem cell donation in another EU Member State)?
