Rule 130
Maria Noichl (S&D)

Subject: Mandatory, continuous obligation to provide shade for sheep pastures

The CC regulations under the Common Agriculture Policy contain key points for animal husbandry.

Do the CC regulations stipulate that it is mandatory for weather protection to be provided at all times for sheep at pasture?

Is it possible to forego weather protection for a few hours during fixed-term modifications to the pasture in Germany with temperatures of 28 degrees Celsius and with a water supply available without receiving a CC sanction?
