Invitation

Dear Dr. Santos,

I cordially invite you to participate as a panellist at the EuroOCEAN 2014 Conference, for the panel discussion, 'European and global marine ecosystems in transition', taking place on Tuesday 7 October.

EuroOCEAN 2014 will take place in Rome on 7 - 9 October 2014 as an official Italian EU Presidency event. EuroOCEAN conferences are high-level marine science-policy conferences. Through the discussions themselves and through the declarations that they deliver, EuroOCEAN conferences provide a concrete science policy roadmap to guide investment and support in future seas and oceans research in Europe, taking account of EU policies and strategic challenges at the level of Europe's regional seas.

Previous EuroOCEAN conferences have been very influential in delivering major impact on the European marine research agenda. According to Máire Geoghegan-Quinn, EU Commissioner for Research, Innovation and Science,

"EuroOCEAN is considered as a top science conference in Europe which delivers concrete messages to science and policy. These are instrumental in strengthening the knowledge base for Europe and developing common priorities in the area of marine sciences" (June 2013).

Thank you for considering this invitation and I very much look forward to hearing from you. Should you accept the invitation, your registration will be covered and travel and subsistence costs for the conference will be reimbursed after the conference by the organizers. If responding positively, we would appreciate if you include a short biography and picture that we can place on the conference website.

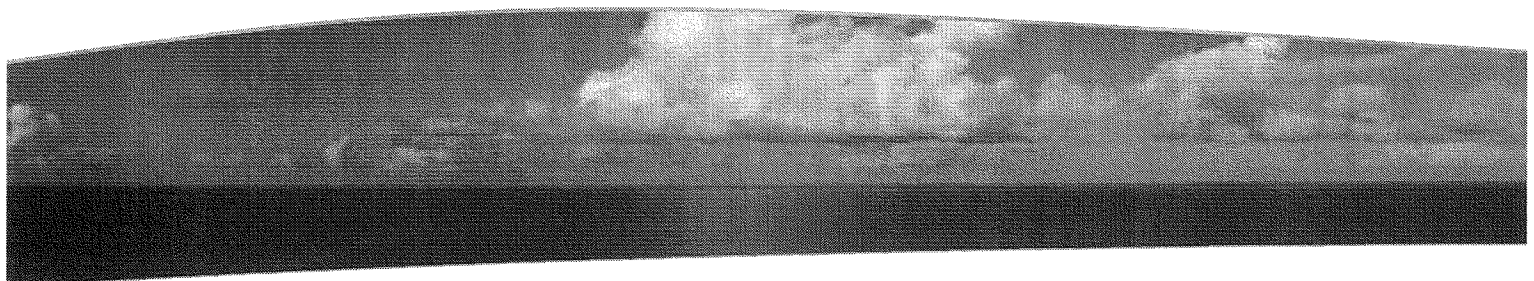

Yours sincerely,

Dr Niall McDonough, on behalf of the EuroOCEAN 2014 Organizing Committee
Executive Scientific Secretary, European Marine Board

Setting a seas and oceans research agenda for Europe

EurOCEAN 2014 will provide a valuable opportunity for interaction and exchange between European marine and maritime research actors, stakeholders, policy makers and programme managers. The conference will identify future research priorities in support of blue growth, human health and wellbeing, and sustainable management of coastal seas and oceans. As a key theme, EurOCEAN 2014 will discuss mechanisms to achieve cross-disciplinary approaches in addressing complex societal challenges.

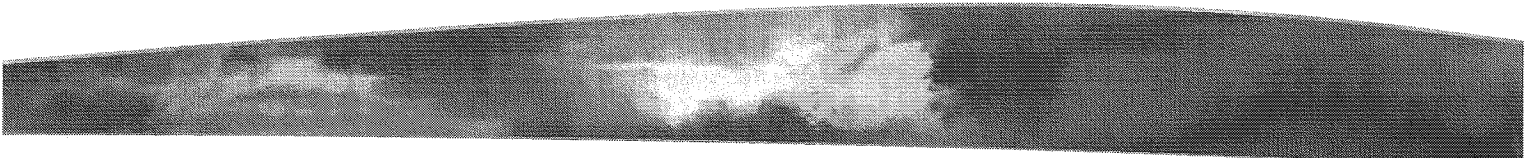

The Rome Declaration - ensure you have a voice

Conference participants will contribute to the finalization of a Rome Declaration, designed to set high-level future strategic directions for seas and oceans science and research capacities in Europe.
