**Reminder:** Watch for certification expiry notifications or check your profile to avoid letting your certifications expire.

## Training Institute Highlights

### Updates to the NSE Certification Program

The Fortinet Certified Professional in Public Cloud Security certification will include Google Cloud Security 7.6 Administrator (available as of Q1) as an additional core exam option. Requirements for this certification remain the same.

Fortinet Certified Solution Specialist in Zero Trust Access (FCSS in ZTA) certification will be retired effective June 30th, 2025. As ZTA is now a model that is being implemented through multiple cybersecurity solutions, this knowledge is beneficial to all cybersecurity job roles. The content of this certification will be distributed (where applicable) across the FCSS certifications.

All [self-paced courses](#) now have labs available for purchase by credit card.

### Define, Design, Deploy, and Demo Fortinet Solutions

Our approach to guiding customers through the process of implementing Fortinet Security Fabric solutions is based on the four "Ds" of best practices: Define, Design, Deploy, and Demo. By leveraging these resources, you can build security-driven networks that effectively safeguard against the growing threats of today's borderless networks.
