

.quebec

The following additional provisions apply to the domain names that are registered through the various registries.

Registrant acknowledges and agrees that registrations under the .QUEBEC TLD are restricted to those fulfilling the following Nexus requirements.

Nexus with the .QUEBEC community.

To register, renew or accept the transfer of a .QUEBEC domain name you must be an individual or legal entity with a connection to the .QUEBEC community. This connection means that You as the Registrant of the domain name must be able to reasonable demonstrate a link or an interest to the community at the time of registration and throughout the duration of the active registration. The link to the community can be on a linguistic, cultural, tourism, commercial or any other basis that is conducive (and not detrimental) to the benefit of the Quebec community. Registrations under the .QUEBEC TLD are intended to be made by bonfide members of the Quebec community (as described above), and are subject to the further requirement that the Your actions in the .QUEBEC community, as well as Your use for the registered domain name, must be:

- a. Generally accepted as legitimate; and
 - b. Beneficial to the cause and values of the Quebec community; and
 - c. Commensurate with the role and importance of the registered domain name;
- and
- d. In good faith at the time of registration and throughout the duration of the active registration.

Registrants also acknowledge and agree that they may be, from time to time, required to state or reaffirm their intended use of the registered domain name. A false statement of intended use, or a statement demonstrated to be false at a later time is an indication of bad faith and can be the basis for the suspension of the domain name.

Your Community nexus can be evaluated at any time by the Registry. Your domain may be subject to the random post-registration validation of Community nexus, or through a confirmed report from within the community that demonstrates reasonable circumstances to merit evaluation. The Registry Operator will evaluate the Community nexus through a compliance program which will review the legitimacy of Your qualifications based upon the same criteria that form the basis of the TLD as described above. The ongoing compliance program will regularly be adapted to current needs based on experience and audit findings

Community nexus validation, combined with strong rights protection are intended as a means to aid in the reduction of abusive registrations and should ensure a quality .QUEBEC namespace experience.
