Powodzenia!

I. Read the story about Daniel. Are the statements true (T) or false (F) ? (6p.)

Daniel Tammet says he was born on a blue day, 31st January 1979. He knows it was blue because Wednesdays are always blue, like the number nine or the sound of people who **quarrel**.

As a child, Daniel was diagnosed as autistic. He couldn't make friends. He was too different from the other children. Aged eight, he was able to calculate $82 \times 82 \times 82 \times 82$ in his head, but he couldn't **tie** his own shoe laces, or ride a bicycle.

The thing that makes Daniel special is that he has an **incredible** ability with numbers. He imagines them as shapes and colours ('289 is an ugly number', he says) and is able to do extremely difficult mathematical calculations. On the TV programme that made him famous in the UK, he managed to **recite** 22,514 numbers from pi perfectly. If you tell Daniel your birth date, he can tell you what day of the week you were born on, and what day of the week it will be on your 65th birthday.

Daniel counts everything. He eats exactly forty-five grams of porridge for **breakfast** each morning and he brushes his teeth for exactly two minutes. He doesn't like walking on the beach near his home because there are too many pebbles (*little stones*) to **count**. Daniel's other great love, besides numbers (which he calls 'his friends'), is learning languages. He speaks ten, and he managed to learn Icelandic in a week for a TV programme in Iceland. He is now a bestselling author, his books including *Born on a Blue Day*, *Embracing the Wide Sky* and *Thinking in Numbers*.
