

Copilot for Microsoft 365

“Under the hood”

Real assets Microsoft Corporate used for its own Copilot for Microsoft 365 deployment and adoption

Microsoft Customer Zero

About this guide

This guide is meant to help an organizations define and execute broad deployment of Copilot for Microsoft 365 by leveraging actual resources from Microsoft's own deployment to Microsoft employees! (a.k.a. Customer Zero)

Within this guide

1. Our approach, objectives, and method
 2. Deployment and rollout approaches to consider
 3. Supporting readiness, including:
 - Communication assets
 - Sample Viva Engage promotions
 - Guidance for Copilot landing site
 - Digital signage
-

Objectives

What we're trying to do here

Drive excitement and user engagement

Our communications will build excitement and confidence in employees' ability to use new Copilot/AI technology. We'll offer them specific scenarios to try and help them understand the "rules of the road" for appropriate use.

Raise awareness and educate

We have an opportunity to help employees learn critical AI skills, learn about Copilot capabilities heading their way (and when!), and inform them about the elements of AI and other Copilot experiences they can start using today.

Encourage feedback

As employees experiment and interact with Copilot technology, our communications should highlight the importance of feedback and provide clear instruction around the feedback channel(s) available.

Contributes to OKR x hours or more saved across x% of Copilot users

Here's how we'll do it

The methodology

The vibe

It's an exciting time across the technology space as generative AI is poised to increase worker productivity, drive enterprise efficiencies, and reduce costs.

As employees embrace this new tech and experience immediate benefits, their interest and enthusiasm creates a groundswell of adoption.

Capitalize on this energy with language and imagery in your communications and promo campaigns that expands employees' excitement and enthusiasm.

Offer resources and strike a tone that helps people build their confidence and proficiency.

The strategy

The communications strategy will have two main components:

- **Communications will emphasize educational and skill-building opportunities.** Leverage tried-and-true channels and experiment with new avenues to bring everyone along on the journey.
- **Content, resources, and other materials for deployment and comms leads** to amplify across their channels as Copilot lands within their orgs.

The message

Copilot is a broad term for a set of AI-powered experiences infused throughout Microsoft technologies and services, including Microsoft 365 and Viva apps.

It's an exciting technology poised to revolutionize our work, but it's also not perfect and requires your prompting, review, and fact-checking/finalization.

Supporting data

Leverage these data driven points as evidence of value:

- By 2027, GenAI digital assistants will be the UI for 25% of interactions with enterprise software. We need to ensure employees have the skills and confidence to adopt. ([IDC](#))
- 70% of Copilot users said they were **more productive**, and 68% said it **improved the quality** of their work. ([Work Trend Index](#))
- 77% of users said once they used Copilot, they **didn't want to give it up**. ([Work Trend Index](#))

Here's who is involved

The players

Corp comms

Partner with your Corp Comms team on the rollout of Copilot for Microsoft 365 across internal organizations.

Share best practices and learnings to ensure others can successfully apply them into their own work habits.

Internal comms & change management leads

Create a community of adoption leads across each organization to share best practices, content and resources as each org rolls out to their own employees.

Package up a Copilot for Microsoft 365 Comms Toolkit for leads to leverage in amplifying messaging and help drive adoption.

End users / employees

Provide value for licensed users so they will enjoy the benefits of Copilot for Microsoft 365

Rollout approach

Consider how you want to rollout Copilot to your employees

Pilot

Pilot with an identified cohort of early adopters or subset of an organization to understand any key considerations before deploying broadly.

Phased (Org-by-org) rollout

Set a start and end date; identify which orgs to start with that will be more receptive to new technology and more likely to help promote it to colleagues.

Collaborate with deployment and comms leads + promo campaign.

All company rollout

Build and launch a series of promo campaigns to highlight use cases, best practices, and specific scenarios to continue driving adoption.

Collaborate with technology champions across the company.

Building a Copilot community and a Copilot Community of Champions **Coming soon**

Set up and manage a community of champions for your copilot effort and scale your enablement approaches throughout the organization.

Sustaining momentum

Regardless of approach, it'll be important to reinforce messaging. Integrate with all-up Copilot storytelling efforts that tell a cohesive and compelling narrative around capabilities and benefits of technology available. Share individual success stories to keep the momentum going.

Assets to leverage

Recommended communications

▲	Pilot
■	All Company rollout
●	Phased rollout (Org-by-Org)

Communications

▲ ■ ●	“Get ready” communication	<p>“Get ready for Copilot for Microsoft 365”</p> <p>Generates awareness and excitement! – available for publishing via ready-to-send Viva Amplify campaign</p> <p>Includes links to SharePoint page, readiness assets, Viva Engage community</p>
▲ ■ ●	“Welcome” communication	<p>“Welcome to Copilot for Microsoft 365”</p> <p>Welcome email to newly licensed employees – available for publishing via ready-to-send Viva Amplify campaign</p> <p>Shares summary of a new ways of working with Copilot in Microsoft 365 apps, with specific prompts to try.</p>
▲ ■ ●	Series of app-specific communications	<p>“Get to know Copilot for...[Teams, Word, PowerPoint, Outlook, Excel]” – available for publishing via ready-to-send Viva Amplify campaign</p> <p>Follow-up communications with specific app highlights, use cases, prompt guidance and tips</p>
▲ ■ ●	Viva Engage community posts	Timed Viva Engage posts by sponsors (see sample collateral) including hashtag campaigns
■ ●	Copilot blogs & marketing campaigns	Additional sample campaigns/blogs to encourage engagement and adoption of Copilot experiences <i>Publish location based upon company preference (company home page, employee landing site, “IT support” site, etc.)</i>
▲ ●	Reactive messaging	Reactive messaging to respond to company deployment approach (sent as needed)

Supporting Assets (regardless of approach)

Employee landing page (SharePoint)	General employee Copilot landing page (SharePoint site) including links to high-level product info, license timeline, foundational readiness assets, support information, FAQs, etc. <i>(see publicly available resources)</i>
Viva Engage community	Viva Engage Copilot community to collaborate, ask questions, and have conversations on Copilot. <i>(Based upon deployment approach, community can be open to all employees OR only those that have Copilot)</i>
Viva Learning courses	Collateral available through Viva Learning to help users understand how to interact via Copilot
Company blog (optional)	If your company utilizes a blog or other news outlet for employees, posting about Copilot can be advantageous here.
Supporting readiness materials	GIFs, Short Videos, Stock Pictures, Icons, Digital Signage, and other collateral to support messaging <i>*Some of this is coming soon*</i>

Publicly available resources

The following are additional available resources that can be leveraged within a Copilot landing page based upon preference.

Resources by role

Click each role to find resources to deploy, use, and scale Copilot for you, your team, and your organization. Have a question? Join our [Copilot for Microsoft 365 community](#) to meet others on the Copilot journey.

Adoption Manager

Driving adoption of Microsoft Copilot is both unique and just like the adoption of any technology. It is a human-centric action, an ongoing user and stakeholder engagement process. We have modified the standard Microsoft 365 Adoption Framework for this project and included it below and in the full adoption kit. This is a starting point and can be customized to fit your organization's methods for sharing new service with your team.

Additionally, utilize Microsoft 365 technology to drive the adoption by using our Center of Excellence (CoE) best practices to build your own community of practice for training, questions, support, and information improves the velocity of delivering user satisfaction.

Note: if you have Microsoft Viva, download our [Microsoft Viva for AI Transformation](#) guide to help drive and accelerate your journey to becoming an AI-powered organization.

- Watch Coffee in the Cloud >
- Copilot playlist on YouTube >
- Microsoft Learn: Get started with Copilot for Microsoft 365 >

Build your prompt skills

Prompts are how you ask Microsoft 365 Copilot to do something for you — like creating, summarizing, editing, or transforming. Think about prompting like having a conversation, using plain but clear language and providing context like you would with an assistant.

If you have a Copilot license, check out the [Copilot Lab](#) for more inspiration.

Handout: Ingredients of a prompt >

Handout: Prompt do's and don'ts >

Copilot for you

Writing prompts is how you ask Copilot to do things on your behalf. Our Copilot Lab experience will help you to find your Power Prompts — those phrases you share with Copilot that accelerate your productivity, freeing you from day to day tasks like summarizing meetings and helping you to prepare for your next important meeting.

Try these featured prompts

Remember to include specifics like a person's name or a topic:

- What's new?** What's the latest from person, organized by emails, chats, and files?
- Catch up on messages** Summarize Teams messages from this week about topic.
- Summarize emails** Provide a detailed summary of my recent emails about topic.
- Share meeting notes** Draft an email with notes and action from meeting.
- What did they say?** What did person say about topic.
- Where was I mentioned?** Summarize emails where I was mentioned recently. Make it details, highlighting the sender and categorizing by topic.

Get started with Copilot for Microsoft 365 3000 XP

2 hr • Learning Path • 3 Modules

Beginner Administrator Business Owner Business User Microsoft 365 Microsoft Copilot

In this course, delve into how Copilot for Microsoft 365 can streamline communication and power up your content creation. This learning path, crafted to be both practical and enlightening, spans three key modules. These modules will walk you through the basics of Copilot for Microsoft 365, showcase its versatility across various Microsoft 365 applications, and offer advice on maximizing its potential. Designed with all professionals in mind, this beginner-friendly course requires no previous AI expertise.

Modules in this learning path

- Introduction to Copilot for Microsoft 365** 1000 XP
29 min • Module • 7 Units
This module explores the intricacies of Copilot for Microsoft 365, offering insights into its functionality and Microsoft's dedication to implementing AI responsibly and ethically.
- Explore the possibilities with Copilot for Microsoft 365** 1000 XP
44 min • Module • 9 Units
This module explores the practical usage of Copilot for Microsoft 365 across Microsoft 365 applications, demonstrating how to streamline workflow and increase productivity.
- Optimize and extend Copilot for Microsoft 365** 1000 XP
47 min • Module • 9 Units
This module explores comprehensive best practices for Copilot for Microsoft 365 and key extension methods, ensuring you harness the full potential and versatility of Copilot's functionality.
