

# Data Network Quality Workgroup

Clair Blacketer

# Data Network Quality WG Purpose

The Data Network Quality WG exists to develop the OHDSI Standardized Data Network and to recommend, enable, and develop best practices related to data quality. The higher quality data in the network, the higher quality evidence we will produce in support of OHDSI's mission.

# Data Quality Network WG

## 2023 Objectives and Key Results

- a. Create an OHDSI data network catalog to encourage network studies across interested partners and promote data quality practices
  - Get at least 20 individual databases to contribute data to the network.
  - Produce data diagnostic results across the contributors to the data network for at least 5 potential studies.
- b. Continued support, maintenance, and development of the DataQualityDashboard package in relation to the Data Network initiative.
  - Add at least 3 new data quality checks.
  - Determine the subset of existing data quality checks that should be included in the DbProfile extract that network contributors will be expected to run.
