Tajikistan ^C	2331	2176	←	2509	2700						

A: Countries that must achieve a minimum of 2,300 cal. **B:** Countries that must grow 1% per year. **C:** Countries that starting off with less than 2,300 cal. can reach 2,700 cal.

D: Countries that starting off with more than 2,300 cal. can reach 2,700 cal. **E:** Countries that starting off with more than 2,700 cal. can reach 3,000 cal.

F: Countries that starting off with more than 2,950 cal. can reach 3,200 cal.

In the case of countries for which a SEA under 2,700 cal. is predicted for year 2010, the commitment should aim at rising in 20% (1% per year) between 1990-92 and 2010, in a higher proportion if needed to meet a minimum.
