8. Authoriser approval controls

For Company Authoriser – Can authoriser approve own transactions?

(select one only)

NO – DUAL CONTROL
 Authoriser can create a transaction BUT cannot approve the same transaction which must be approved by another Authoriser.
 (This is the default option if this section is left blank. Where the Applicant has only one user, Single Control will apply)

YES – SINGLE CONTROL
 Authoriser can create AND approve the same transaction
 (The Applicant's account(s) may be more susceptible to account fraud as compared to Dual Control, where another person can verify and confirm the transaction)

Sequential Approval:

(select one only)

NO – Does not require the authorisation process to be performed sequentially. E.g. A or B in any order.

YES – Requires the authorisation process to be performed sequentially.

Note: 1. Authoriser Group refers to authorisation level of the respective Company Authoriser (Please reference to selection in Section 5)
 2. If Sequential Approval is selected above, it is required to indicate sequence of Authoriser Group approval (e.g. 1A > 1B denotes that the transaction needs to be approved by one Group A Authoriser followed by one Group B Authoriser) in Section 9.
