

#1 Global Leader in Data Resilience

Veeam Data Platform

Data Resilience to Keep Your Business Running

Challenge

Due to growing complexities across IT environments paired with increasing cyberthreats, compliance requirements, and migration needs, resilience is no longer a buzzword, it's a business imperative.

Your business depends on data. Protect and leverage it to the fullest with Veeam Data Platform, a complete solution that keeps your data secure and in your control. Whether to the cloud or between hypervisors — migrate, manage, and protect your data with confidence.

- Reliable, unmatched data resilience
- Respond and recover faster from ransomware
- Scalable orchestrated recovery tailored to you

A Perfect Storm of IT Complexity and Threats

75% of organizations were hit by a ransomware attack in 2023

40% are seeking data protection for workload migration

85% of organizations can't recover fast enough to meet their needs

Data Resilience Capabilities

Early threat detection

Embrace a suite of next-gen threat detection tools spanning inline malware and hacker tools detection to proactive threat assessment on backup servers.

Avoid reinfection

Collaborative YARA Rule Management and content analysis pinpoints identified ransomware strains to prevent the reintroduction of malware into your environment.

Guarantee survival

Prevent accidental or malicious deletion or encryption of backups by employing a zero-trust architecture, "Four-Eyes" admin protection and immutable backups.

Leading Security Integrations

Uncover, report, and react to anomalies detected by your data resiliency platform, through integrations with trusted industry-leading partners such as Splunk and Palo Alto Networks.

Automate clean recovery

Perform orchestrated recovery of an entire environment using malware-free restore points.

Verify security and compliance

Ensure recovery success with automated scans using the Security & Compliance Analyzer, leveraging infrastructure hardening and data protection best practices.

Intelligence at your fingertips

Empower resilience with AI that keeps you up to date on backup and production infrastructure status in response to questions in natural language.

Secure cloud storage made easy

Gain instant access to secure, predictably priced cloud object storage with Veeam Vault, completely integrated with Veeam Data Platform.

Put the spotlight on malware

Highlight threats, identify risks and measure the security score of your environment in the Veeam Threat Center.

Veeam Protects Everything

We've got your workloads covered — cloud, on-premises, remote sites, and everything else in between. Ensure your data is protected and ready for recovery, wherever it lives.
