

VESA Arm Option for Pro Tools® | S6

The VESA Arm Option for Pro Tools® | S6 provides an arm to mount a computer display (maximum weight 25 lbs / 11.3 kg). The VESA Arm option includes a Back Foot and VESA Arm Mount in the outer package, and the VESA Arm and its components in the inner box.

Contents of VESA Arm Option Package

Legend	Component
A	Back Foot (PN 7600-31294-01)
B	VESA Arm Mount
C	VESA Arm, with Collar
Not Shown	Fasteners, tools, and VESA Arm instructions

Before you begin, determine where you want to install the VESA Arm, and remove the upper Rear Cover at that location.

To install the VESA Arm Option:

- 1 Make sure the Back Foot that the VESA Arm Mount is inserted into is identical to the one shown above (PN 7600-31294-01). If not, remove the existing Back Foot and replace it with the one included with the VESA Arm Option, using four M5x10 Hex fasteners.
- 2 Insert the VESA Arm Mount into the Back Foot and secure it using six more M5x10 Hex fasteners.
- 3 Remove the small cutout from the upper Rear Cover you removed earlier, then re-install the Rear Cover using its thumbscrew.
- 4 Unpack the VESA Arm and follow its instructions to attach your monitor, install the Collar, assemble and install the VESA Arm.
